Identifying Data				2022/23
Subject (*)	Networks and Communications	Code	631G02366	
Study programme	Grao en Tecnoloxías Mariñas			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Third	Optional	6
Language	SpanishGalicianEnglish			
Teaching method	Face-to-face			
Prerequisites				
Department	Enxeñaría de Computadores			
Coordinador	Bregains Rodriguez, Julio Claudio	E-mail	julio.bregains@udc.es	
Lecturers	Bregains Rodriguez, Julio Claudio	E-mail	julio.bregains@udc.es	
Web	campusvirtual.udc.es			
General description	In this course the student is expected to acquire knowledge about the hardware, software and protocols of the network and communications systems, both of the ship and of part of the port facilities.			

Study programme competences / results	
Code	Study programme competences / results
A1	CE1 - Capacidade para a realización de inspeccións, medicións, valoracións, taxacións, peritacións, estudos, informes, planos de labores e certificacións nas instalacións do ámbito da súa especialidade.
A2	CE2 - Capacidade para a dirección, organización e operación das actividades obxecto das instalacións marítimas no ámbito da súa especialidade.
A3	CE3 - Capacidade para o manexo de especificacións, regulamentos e normas de obrigado cumprimento.
A11	CE11 - Observar prácticas de seguridade no traballo, no ámbito da súa especialidade.
A16	CE16 - Ensambalar e realizar tarefas básicas de mantemento e reparación de equipos informáticos. Instalar e manexar sistemas operativos e aplicacións informáticas. Instalar e realizar as tarefas básicas de xestión de redes de ordenadores, no ámbito da súa especialidade.
A18	CE18 - Redacción e interpretación de documentación técnica.
A19	CE19 - Coñecer as características e limitacións dos materiais utilizados para a reparación de buques e equipos.
A59	CE34 - Utilizar os sistemas de comunicación interna
A64	CE54 - Supervisar o funcionamento dos sistemas de control automático da máquina propulsora principal e sistemas auxiliares
A67	CE57 - Facer funcionar os ordenadores e redes informáticas a bordo dos buques
A68	CE58 - Manter e reparar o equipo eléctrico e electrónico
A70	CE60 - Manter e reparar os equipos de navegación da ponte e dos sistemas de comunicación do buque
B1	CT1 - Capacidad para gestionar los propios conocimientos y utilizar de forma eficiente técnicas de trabajo intelectual
B2	CT2 - Resolver problemas de forma efectiva.
B4	CT4 - Traballar de forma autónoma con iniciativa.
B5	CT5 - Traballar de forma colaboradora.
B6	CT6 - Comportarse con ética e responsabilidade social como cidadán e como profesional.
B7	CT7 - Capacidade para interpretar, seleccionar e valorar conceptos adquiridos noutras disciplinas do ámbito marítimo, mediante fundamentos físico-matemáticos.
B9	CT9 - Capacidade para a aprendizaxe de novos métodos e teorías, que lle doten dunha gran versatilidade para adaptarse a novas situacións.
B11	CT11 - Capacidade para resolver problemas con iniciativa, toma de decisións, creatividade, razoamento crítico e de comunicar e transmitir coñecementos habilidades e destrezas.
C2	C2 - Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	C3 - Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C7	C7 - Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

C8	C8 - Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.
C9	CB1 - Demostrar que posúen e comprenden coñecementos na área de estudo que parte da base da educación secundaria xeneral, e que inclúe coñecementos procedentes da vangardia do seu campo de estudo
C10	CB2 - Aplicar os coñecementos no seu traballo ou vocación dunha forma profesional e poseer competencias demostrables por medio da elaboración e defensa de argumentos e resolución de problemas dentro da área dos seus estudos
C11	CB3 - Ter a capacidade de reunir e interpretar datos relevantes para emitir xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética
C12	CB4 - Poder transmitir información, ideas, problemas e solucións a un público tanto especializado como non especializado.
C13	CB5 - Ter desenvolvido aquelas habilidades de aprendizaxe necesarias para emprender estudos posteriores con un alto grao de autonomía.

Learning outcomes

Learning outcomes	Study programme competences / results		
	A1	B2	C2
Basic knowledge of data transmission concepts and on-board computer network architecture.	A2	B4	C3
	A3	B5	C7
	A11	B6	C8
	A18	B7	C9
	A19	B9	C10
		B11	C11
			C12
			C13
To know the fundamental technical aspects of data transmission installations and communications networks for a good professional operation.	A1	B1	C2
	A2	B2	C3
	A3	B4	C10
	A11	B5	C11
	A16	B6	C12
	A18	B7	C13
	A19	B9	
	A59	B11	
	A64		
	A67		
	A68		
	A70		
To know the most commonly used communications protocols, and being able to interpret and implement them.	A3	B1	C2
	A18	B2	C3
	A67	B4	C7
		B5	C8
		B6	

Contents

Topic	Sub-topic
1: Basic concepts of networks and communications.	Networks: definition and classification. Fundamentals of communications. Fundamentals of the ISO OSI model: lower layers. Ethernet standard. Switches and routers. TCP/IP protocols. Network addressing and subnets. Data encapsulation.

2. More advanced concepts on telematics.	Data transmission. Error detection and control. Physical and logical topology. Circuit switching and packet switching. Coding and packaging. Protocols. Redundancy, reliability. Measurement parameters.
3. OSI reference models.	Description of the 5-layer OSI model. Physical, link and network layers. Transport layer and higher layers. Internet. Protocol stacks.
4. Wired network.	Transmission media. Connectors. Protocols. Switch, hub, router, modem. Protocol converter, bridge. Mass memory, node. Structured cabling.
5. Wireless network.	WiFi networks, 802.11 x protocols. Configuration of a WiFi. Sensor networks. PANs: Bluetooth, 802.15.4 WiMAX.
6. Marine buses and networks.	Point to point and multipoint protocols. Null modem, RS232C, RS422. USB. CanBus and variants. NMEA standards. SeaTalk. Industrial local area networks: Profibus. Industrial Ethernet. Power line transmission (PLCs). TCP/IP. IP telephony (VoIP, ToIP).
7. Marine networks.	Monitoring and control networks. Management networks. Interconnection of bridge equipment. Interconnection of networks on the ship. Internet access and external networks. Satellite data connections. Regulations: entities and main standards.

Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	The professor will develop the theoretical contents of the course, under a practical approach, relating whenever possible the theoretical contents with real examples on ships and boats.
Problem solving	Students will learn how to formulate and solve, with the use of ICT tools, representative exercises or works formulated by the teacher.
Laboratory practice	Practices to be developed: interconnection, wiring and basic configuration of computer networks and devices, using software tools or directly by means of specific measuring equipment.

ICT practicals	Practices to be developed: simulation of the design, wiring and basic configuration of computer networks and devices, using software tools.
Mixed objective/subjective test	At the end of the term there will be an exam on the contents of the course.

Personalized attention

Methodologies	Description
Laboratory practice ICT practicals Problem solving	<p>Lecture session: Attending and solving student's doubts related to the theoretical material presented in the lecture sessions.</p> <p>Problem solving: Attending and solving the student's doubts related to the problems presented in class.</p> <p>Laboratory practices: Attending and solving student's doubts related to the practices proposed or carried out in the laboratory.</p> <p>Practices through ICT: Attending and solving student's doubts related to the practices proposed or carried out through ICT.</p> <p>Personalized attention: In relation to the theory and problem solving classes, individualized tutoring hours will be preferably used. Tutorials may be face-to-face or telematic (via Teams).</p> <p>In relation to the practical classes, individualized tutoring hours will be preferably used, being also possible the use of e-mail. Tutorials may be face-to-face or telematic (via Teams).</p>

Assessment

Methodologies	Competencies / Results	Description	Qualification
Laboratory practice	A1 A2 A3 A11 A16 A18 A67 A68 A70 B2 B4 B5 B6 B7 B9 B11 C2 C7 C8 C9 C10 C11 C12 C13	The work done by the student in each of the sessions will be evaluated. Students with part-time dedication or with academic waiver from teaching exemption will have the option of taking a laboratory practice test at the end of the course.	10
Mixed objective/subjective test	A3 A18 A19 A59 A64 B1 B2 B4 B6 B7 B11 C2 C3 C7 C8 C9 C10 C11 C12 C13	It will consist of two theoretical exams and problem solving on the contents exposed throughout the course during the lectures sessions, evaluating the understanding of such contents, and its application to problem solving.	60
ICT practicals	A18 A67 B1 B2 B4 B5 B6 B7 B9 B11 C2 C3 C7 C8 C9 C10 C11 C12 C13	The work done by the student in each of the sessions will be evaluated. Students with part-time dedication or with academic waiver from teaching exemption will have the option of taking an ICT practice test at the end of the course.	10
Problem solving	A18 B2 B4 B5 B7 B9 B11 C2 C3 C7 C8 C9 C10 C11 C13	It will consist of problem-solving assessment through a set of tests.	20

Assessment comments

The mixed test and the problem-solving tests constitute 80% of the grade. The evaluation of laboratory practices and through ICT constitute the remaining 20%.

Description of the evaluation and distribution of points.

FIRST OPPORTUNITY

A) MIXED TEST:

It will consist of two midterm exams of 6 points (maximum) each. In order to pass the subject, a minimum of 3 points must be obtained in each one. Once obtained, the grade of the mixed exam will be the average of the grades of both midterm exams.

If any of the midterm exams are not passed, the student will have the opportunity to pass them in the final exam (1st opportunity).

B) PROBLEM SOLVING:

It will consist of a set of tests with a maximum combined evaluation of 2 points, with a minimum of 1 to pass the course.

In case of not passing the tests, the student will have a problem solving exam on the same date and time as the final exam (see item A).

This exam must be passed in order to pass the course.

C) LABORATORY/TIC PRACTICES:

It will consist of a set of laboratory and computer simulation tasks (ICT) with a maximum joint evaluation of 2 points, with a minimum of 1 to pass the course. At the beginning of each practice, the student must pass a previous test. If the student fails the test, the grade of the corresponding practice will be halved.

In case of not passing the assignments, the student will have a laboratory exam on the same date and time as the final exam (see item A). This exam must be passed in order to pass the course.

FINAL GRADE: if the three parts

(A, B and C) are passed, the final grade will be the sum of them. In case of failing, such a sum will be halved.

Additional work (optional): the

student who has passed the course will have the option of voluntarily submitting a written work whose content and length (no more than 20 DIN A4 pages, single spaced, New Roman font size 10 or similar, with margins of 2 cm on each side of the page) will be determined by the theory professor. The score for this work (1 point maximum) will be added to the FINAL grade indicated above (to be reduced if the maximum of 10 points is exceeded).

Detection of plagiarism or copying of work: the

fraudulent performance of the tests or evaluation activities will directly imply the qualification of failure '0' in the corresponding opportunity of the subject, thus invalidating any qualification obtained in all the evaluation activities for the second and advanced calls.

SECOND OPPORTUNITY

For

the second opportunity the student may take a mixed test similar in

content and difficulty to that of the first opportunity, and must pass both parts. The grade obtained in the mixed test will be added to the laboratory practices, ICT and problem solving grades obtained in the first opportunity. In case of not passing the problem solving or the practicals, the student will have the corresponding exams, within the timetable corresponding to the mixed test. For the calculation of the total grade, the same criteria will be followed as for the first opportunity.

Students enrolled part-time or who have been granted academic dispensation of exemption from attendance, as established by the Rule that regulates the regime of dedication to the study of undergraduate students at UDC (Arts. 2.3; 3.b; 4.3 and 7.5) (04/05/2017), will take the same evaluation tests as students enrolled full-time. He/she will have the option of taking a lab/ICT practicum exam at each opportunity.

The evaluation criteria contemplated in Table A-II/1 of the STCW Code, and collected in the Quality Assurance System, will be taken into account when designing and carrying out the evaluation.
