Methodologies	
Methodologies	Description
Oral presentation	In the practical class, the group designated by the lecturer must present the set reading and / or the work from complementary activities. Group members must answer the questions that are formulated.
Events academic / information	So that they can become familiar with the practical cases presented by professionals in the field, students must also attend complementary practical activities (conferences, seminars, workshops and so on). They must reflect on the content and produce an analysis, which will be subject to assessment.
Workbook	To complement the lectures, texts and readings and/or practical tasks based on a variety of topics will be provided for analysis. Students must work in groups to answer the set questions.
Multiple-choice questions	Individual multiple choice test. Each wrong answer will lower the test score.
Guest lecture / keynote speech	The contents of the subject's theoretical programme will be introduced in a formal lecture, through audiovisual media. The slides will be delivered to the students. The lecturer will monitor lecture attendance; regular attendance is a requirement in assessment procedure.

Personalized attention	
Methodologies	Description
Oral presentation Workbook	<p>The students will be able to resolve any doubts while they work on the practical cases or readings that they must present. They can also ask questions about topics explained in class. The teacher is assigned an availability for tutorials.</p> <p>ATTENTION TO DIVERSITY:</p> <p>The subject may be adapted to students who require the adoption of measures aimed at supporting diversity (physical, visual, auditory, cognitive, learning or related to mental health). If this is the case, they should contact the services available at the UDC/in the center: within the official deadlines stipulated prior to each academic semester, with the Diversity Attention Unit (https://www.udc.es/cufie/ADI/support_students/); failing that, with the ADI tutor from the Faculty of Humanities.</p>

Assessment comments

1st Opportunity Evaluation. In the development of the practical part (teamworks / projects) (mark of 40%), the following will be evaluated: application of the theoretical bases, quality of presentation, precision and clarity of presentation and quality of the answers, primary and secondary sources used and bibliographic review. For the evaluation of the theoretical part, a multiple choice test (multiple object test) (mark of 50%) with several answer alternatives will be used, where errors will reduce the score to avoid the "lottery effect". The formula is $NOTE = (\text{correct answers} \times 1) - (\text{errors} / k - 1)$, with $k =$ number of answer options. Net points earned are transferred to a rating on a scale of 0 to 10. Part-time dedication and academic exemption (attendance exemption): in the case of students with part-time dedication and academic exemption of attendance exemption, the Moodle and MS Teams platforms will be used, as well as email as the main communication vehicle. Content management, tutorials and homework delivery. At the beginning of the course, a specific calendar of dates compatible with their dedication will be agreed, but they will have the same obligation to carry out activities and attend any type of evaluation test as full-time students. Except for the dates approved by the Faculty Council in which the objective test corresponds, for the rest of the tests a specific calendar of dates compatible with their dedication will be agreed at the beginning of the course. The evaluation process for the 2nd opportunity is exactly the same as for the 1st opportunity: the practical grade (obtained in the works / projects) is saved and @alumn @ will take a new multiple choice exam, with identical characteristics to those described above. In the event of an extraordinary call, the evaluation will only be with multiple choice tests (multiple choice test) (mark 100%) with several answer alternatives, where errors will subtract score based on the formula $NET\ POINTS = (\text{correct answers} \times 1) - (\text{errors} / k - 1)$ with $k =$ number of answer options. Net points earned are transferred to qualification on a scale of 0 to 10. The student who, being enrolled, has not participated in the different evaluation activities (continuous/practical and/or exam/test) established for the academic year will be considered as "Not presented" (NP). PLAGIARISM/COPY. The fraudulent performance of the tests or evaluation activities will directly imply the qualification of failure (0) in the matter in the corresponding call, thus invalidating any qualification obtained in all the evaluation activities for the extraordinary call.
