General description	By focusing on the core concepts	of propagation of sound wa	aves, this course provi	des students with the skills necessary to
	study the acoustical problems in c	omplex fluids.		

	Study programme competences / results
Code	Study programme competences / results
A4	Knowing and applying statistical methods to analyze data from complex material testing
A5	Understanding the relationships between structure and properties of materials
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B12	Communicate effectively in the work environment
B18	Ability for abstraction, understanding and simplification of complex problems
B19	Will of continuous improvement
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

	Contents
Topic	Sub-topic
Acoustic waves in perfect and viscous fluids	
Phenomena at the interface.	
Introduction to non-linear effects, shock waves	
Diffraction theory (harmonic regime and impulses)	
Elastic waves in soft solids	

	Plannin	g		
Methodologies / tests	Competencies /	Teaching hours	Student?s personal	Total hours
	Results	(in-person & virtual)	work hours	
Guest lecture / keynote speech	A4 A5 B1 B4 B18 C2	10	18	28
Laboratory practice	B2 B8 B12 B19 B21	20	20	40
	C8			
Supervised projects	B4 B19 B21 C2 C6	5	25	30
	C7			
Personalized attention		2	0	2

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies
Methodologies	Description
Guest lecture /	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical
keynote speech	issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics pesented in the program and consolidate their
	acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in
	literature survey.

	Personalized attention		
Methodologies	Description		
Guest lecture /	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours		
keynote speech	of tutoring of the professor.		
	No academic dispensation is accepted.		

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		
Guest lecture /	A4 A5 B1 B4 B18 C2	Examination or objective test.	50
keynote speech			
Laboratory practice	B2 B8 B12 B19 B21	Continuous assessment through monitoring of student work in the classroom,	20
	C8	laboratory and / or tutorials.	
Supervised projects	B4 B19 B21 C2 C6	Presentation (oral and written) of the supervised work.	30
	C7		

## **Assessment comments**

No academic dispensation is accepted.

The evaluation criteria for the second opportunity and the extraordinary opportunity are the same as for the first opportunity.

## Other comments

To help achieve a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan: The delivery of the documentary work carried out in this subject: They will be requested in virtual format and/or computer supportIt will be done through Moodle, in digital format without the need to print them.If it is necessary to make them on paper:Plastics shall not be usedDouble-sided printing shall be carried out.Recycled paper will be used.Printing of drafts shall be avoided.A sustainable use of resources and the prevention of negative impacts on the natural environment must be made.It will work to identify and change gender biases and attitudes, and influence the environment to change them and promote values of respect and equality. Situations of discrimination should be identified and actions and measures proposed to correct them.
