General description	Realización, presentación e defensa dun exercicio orixinal realizado individualmente ante un tribunal universitario, consistente nun proxecto integral de Enxeñería Industrial de natureza profesional no que se sinteticen as competencias adquiridas nos ensinos.					

Study programme competences	
Code	Study programme competences
A24	TFM - Realization, presentation and defense, once all the credits of the syllabus have been obtained, from an original exercise carried out individually before a university court, consisting of a comprehensive project of Industrial Engineering of a professional nature in which the competences acquired in the teachings.
B1	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
B2	CB7 - That students know how to apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of ??study.
B3	CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.

B4	CB9 - That the students know how to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized audiences in a clear and unambiguous way.
B5	CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B6	G1 - Have adequate knowledge of the scientific and technological aspects in Industrial Engineering.
B13	G8 - Apply the knowledge acquired and solve problems in new or unfamiliar environments within broader and multidisciplinary contexts.
B14	G9 - Be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments.
B15	G10 - Knowing how to communicate the conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized publics in a clear and unambiguous way.
B16	G11 - Possess the learning skills that allow to continue studying in a self-directed or autonomous way.
B17	G12 - Knowledge, understanding and ability to apply the necessary legislation in the exercise of the profession of Industrial Engineer.
C1	ABET (a) - An ability to apply knowledge of mathematics, science, and engineering.
C3	ABET (c) - An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
C6	ABET (f) - An understanding of professional and ethical responsibility.
C7	ABET (g) - An ability to communicate effectively.
C8	ABET (h) - The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
C9	ABET (i) - A recognition of the need for, and an ability to engage in life-long learning.
C11	ABET (k) - An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Methodologies	Description
Supervised projects	Realización, presentación e defensa dun exercicio orixinal realizado individualmente ante un tribunal universitario, consistente nun proxecto integral de Enxeñería Industrial de natureza profesional no que se sinteticen as competencias adquiridas nos ensinos.

Personalized attention	
Methodologies	Description
Supervised projects	<p>La atención personalizada en tutorías es importante para el seguimiento del alumnado y la resolución de las dificultades que puedan encontrar en el aprendizaje de los conceptos de las sesión magistrales, en la resolución de los problemas, y de la realización de las memorias y hojas de cálculo de las prácticas de laboratorio.</p> <p>Las prácticas de laboratorio se realizarán en parejas, dentro de grupos reducidos. Esto permite a los docentes prestar una atención personalizada en el laboratorio. En cada momento, cada pareja está realizando una práctica diferente, y las parejas van rotando a lo largo de la sesión.</p> <p>Al alumnado con reconocimiento de dedicación a tiempo parcial y dispensa académica de exención de asistencia se le podrá adaptar los horarios de tutorías y prácticas de laboratorio para hacerlos compatibles con sus circunstancias laborales y personales.</p>

Assessment comments	
Esta asignatura regularase polo "Regulamento para a realización do traballo de fin de grao ou mestrado da Escola Politécnica Superior" e os procedementos asociados que se publicarán en Moodle. Non se admite a dispensa académica. A avaliación en 2ª oportunidade e na convocatoria adiantada (decembro) será igual que en 1ª oportunidade.
