| Descripción general | The objective of this course is to provide students with knowledge in the field of digital twins of marine systems, including the requirements, architecture and components necessary to develop one of these systems. | | | |

| Competencias / Resultados del título | |
|--------------------------------------|---|
| Código | Competencias / Resultados del título |
| B7 | CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to implement basic management principles suitable for a multicultural working environment. |
| B8 | CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness. |
| B10 | CG4 ? To have the capability to think creatively and explore new ideas outside of current boundaries of the field |
| B11 | CG5 ? To have the capability to identify, formulate and solve engineering problems within realistic constraints. |
| B12 | CG6 ? To appreciate the impact of sustainable development goals in maritime transport. |
| B13 | CG7 ? To have the capability to critically analyse, synthesise, interpret and summarise complex scientific processes. |
| C2 | CT2 - Mastering oral and written expression in a foreign language. |
| C3 | CT3 - Using ICT in working contexts and lifelong learning. |
| C4 | CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective. |
| C6 | CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines. |
| C7 | CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development. |
| C8 | CT8 -Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society. |

| Resultados de aprendizaje | | |
|--|--------------------------------------|-----|
| Resultados de aprendizaje | Competencias / Resultados del título | |
| Knowledge of the concept, structure and design constraints of digital twins applicable to the maritime sector. | BM6 | CM2 |
| Ability to develop a basic approach to a digital twin. | BM7 | CM3 |
| | BM9 | CM4 |
| | BM10 | CM6 |
| | BM11 | CM7 |
| | BM12 | CM8 |

| Contenidos | |
|------------|---------|
| Tema | Subtema |
| | |

| | |
|--|--|
| 1. Introduction | a. Industry 4.0 overview b. Basic concepts of Digital Twins c. Digital Twin for ships |
| 2. Ship. Ship systems. Sensorization. | a. Ships and ship systems b. Ship sensorization |
| 3. Simulation models | a. Physics based models vs data driven models. b. Modeling of the arquitectura of basic simulations and development of basic simulations models. c. Preparation of models for FMU export. Export types (co-simulación, real time, etc.) and their implications. d. Running the simulation models in the digital twin environment e. Co-simulation of FMUs. |
| 4. Data Analysis | a. Data analytics and machine learning application. |
| 5. Edge solutions and cloud solutions for digital twin | a. Edge solutions b. Cloud solutions |
| 6. Practicas use cases | a. Practical use cases |

| Planificación | | | | |
|---------------------------|---------------------------|---|------------------------|---------------|
| Metodologías / pruebas | Competencias / Resultados | Horas lectivas (presenciales y virtuales) | Horas trabajo autónomo | Horas totales |
| Sesión magistral | B12 C3 | 20 | 20 | 40 |
| Prácticas a través de TIC | C7 | 20 | 40 | 60 |
| Prueba mixta | B7 B8 B10 C2 C4 C6 | 1.5 | 0 | 1.5 |
| Trabajos tutelados | B11 B13 C8 | 1.5 | 45 | 46.5 |
| Atención personalizada | | 2 | 0 | 2 |

(*)Los datos que aparecen en la tabla de planificación són de carácter orientativo, considerando la heterogeneidad de los alumnos

| Metodologías | |
|---------------------------|--|
| Metodologías | Descripción |
| Sesión magistral | Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning. Presentations of this type are variously referred to as ?expository method?, ?guest lectures? or ?keynote speeches?. (The term ?keynote? refers only to a type of speech delivered on special occasions, for which the lecture sets the tone or establishes the underlying theme; it is characterised by its distinctive content, structure and purpose, and relies almost exclusively on the spoken word to communicate its ideas.) |
| Prácticas a través de TIC | Practice-based learning method for theoretical subject content using ICT resources (demonstrations, simulations, etc.) ICT is an excellent medium for practical knowledge applications and information processing, and a key aid to student learning and skills development. |
| Prueba mixta | The mixed objective will consist of an oral presentation about the supervised project. |
| Trabajos tutelados | Supervised learning process aimed at helping students to work independently in a range of contexts (academic and professional). Focused primarily on learning ?how to do things? and on encouraging students to become responsible for their own learning. In this course, the supervised project will consist on a group based technical work based on an assignment done by the professors, and dealing about some of the topics of the course. |

| Atención personalizada | |
|------------------------|-------------|
| Metodologías | Descripción |
| | |

| | |
|---|---|
| Sesión magistral Prácticas a través de TIC Trabajos tutelados | Students personal attention could be in class or through Teams. The student will be monitored during the completion of the project. |
|---|---|

| Evaluación | | | |
|--------------------|---------------------------|---|--------------|
| Metodologías | Competencias / Resultados | Descripción | Calificación |
| Trabajos tutelados | B11 B13 C8 | In this course, the supervised project will consist on a group based technical report based on an assignment done by the professors, and dealing about some of the topics of the course. The qualification of the group based technical report will represent a 80 % of the student´s final qualification. | 80 |
| Prueba mixta | B7 B8 B10 C2 C4 C6 | The mixed objective will consist of an oral presentation about the supervised project. The qualification of the oral presentation will represent a 20 % of the student´s final qualification. | 20 |

| Observaciones evaluación |
|---|
| <p>According to the degree regulations, the students will have the opportunity to pass this course in two opportunities (first and second opportunity). The evaluation of the total mark will be the same both in the first opportunity and in the second opportunity.</p> <p>General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:</p> <ul style="list-style-type: none"> - Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree. - No part time or lecture attendance exemption are allowed in this degree. |

Otros comentarios

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmental and socially sustainable research and teaching): The assignments to be done in this course: - Will be required in digital format. - Will be delivered using Moodle, with no need to print them. In case it is necessary to print them: - Plastics won't be used. - Two side printing will be used. - Recycled paper will be used. - Printing drafts will be avoided. A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment.
