| General description | Being able to learn , use and design | artificial lighting systems | optimizing their energy cor | nsumption. |

| | Study programme competences |
|------|---|
| Code | Study programme competences |
| A1 | CE1 - Apply methodologies and regulations for efficient energy management |
| A2 | CE2 - Analyze and implement energy saving and efficiency measures in the industrial, tertiary and residential sectors |
| A5 | CE5 - Analyze energy consumption and its associated costs |
| A9 | CE9 - Make decisions in a technological environment where materials are used in efficiency applications |
| B1 | CB6 - Possess and understand knowledge that provides a foundation or opportunity to be original in the development and/or application of ideas, often in a research context |
| B2 | CB7 - That students know how to apply the knowledge acquired and their ability to solve problems in new or little-known environments within broader (or multidisciplinary) contexts related to their area of study |
| В3 | CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments |
| В6 | CG1 - Search and select alternatives considering the best possible solutions |
| В7 | CG2 - Develop analysis and synthesis skills; encourage critical discussion, defending arguments, and drawing conclusions |
| В8 | CG3 - Incorporate their own vocabulary to express themselves accurately in effective communication, both written and oral |
| B11 | CG6 - Acquire new knowledge and skills related to the professional field of the master's degree |
| B13 | CG8 - Apply theoretical knowledge to practice |
| B14 | CG9 - Apply knowledge of advanced sciences and technologies to professional or research practice of efficiency |
| B16 | CG11 - Evaluate the application of emerging technologies in the field of energy and the environment |
| B18 | CG13 - Pose and solve problems, interpret a set of data and analyze the results obtained; in the field of energy efficiency and sustainability |
| C1 | CT1 - Express themselves correctly, both orally and in writing, in the official languages of the autonomous community |
| C2 | CT2 - Master the oral and written expression and comprehension of a foreign language |
| C3 | CT3 - Use the basic tools of information and communication technologies (ICT) necessary for the exercise of their profession and for learning throughout their lives |
| C4 | CT4 - Develop for the exercise of a respectful citizenship with the democratic culture, human rights and the gender perspective |
| C5 | CT5 - Understand the importance of entrepreneurial culture and know the means available to entrepreneurs |
| | |

| Contents | | | | |
|-----------------------|---|--|--|--|
| Topic | Sub-topic | | | |
| Lighting Basics | - Basic concepts | | | |
| | - Units | | | |
| | - Normative | | | |
| Lighting Technologies | - Lamps. | | | |
| | - Auxiliary electrical equipment . | | | |
| | - Luminaries . | | | |
| LED lighting devices | - Light-emitting semiconductor junction features. | | | |
| | - Types of LED light. | | | |
| | - Parameters of operation and efficiency. | | | |
| | - Lifetime | | | |
| LED control circuits | - Protections. | | | |
| | - Power Management . | | | |
| | - Smart lighting . | | | |
| LED lamp design | - Directionality and geometry. | | | |
| | - Reliability . | | | |
| | - Electromagnetic compatibility (EMC). | | | |

| | Planning | | | |

| Directed discussion | B1 B2 B3 B6 B7 B8 | 3 | 0 | 3 |
| | B11 C1 | | | |
| Personalized attention | | 3 | 0 | 3 |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| | Methodologies | | | |
|---------------------|--|--|--|--|
| Methodologies | Methodologies Description | | | |
| Case study | They will take place in the classroom. Solutions from differents brands will be analyzed. | | | |
| Laboratory practice | The student will have to deliver a report. This will be graded by the teacher and represents 30 % of the total evaluation. | | | |
| | You can do it both in person and by simulation via telematics. | | | |
| Objective test | Written test which represents 40 % of the total mark | | | |
| Supervised projects | They can be one or more . They represent the remaining 30 % of the grade. | | | |
| Guest lecture / | By the teacher in the classroom. | | | |
| keynote speech | | | | |
| Directed discussion | The teacher may grant extra score and will be added to 100 % of the grade . | | | |

| | Personalized attention | | | |
|---------------------|--|--|--|--|
| Methodologies | Description | | | |
| Supervised projects | It will take place in class during laboratory practices . The work will be individual and supervised by the teacher. In supervised | | | |
| Laboratory practice | projects will be done in the teacher's office. | | | |
| | | | | |

| | | Assessment | |
|---------------------|---------------------|--|---------------|
| Methodologies | Competencies | Description | Qualification |
| Supervised projects | A2 A9 B2 B3 B6 B7 | One or more . They will be qualified by the teacher of the subject | 30 |
| | B8 B13 B16 B18 C1 | | |
| | C2 C3 C4 C5 | | |
| Laboratory practice | A2 A9 B2 B6 B13 B14 | At the end of each practice the student must send a report to be qualified | 30 |
| | C5 | | |
| Objective test | B3 B8 C1 C4 | Final written test | 40 |

Assessment comments

You must be obtained at least 40 % of the mark in each of the parts (objective test , homework and practices) to average between them and to pass the subject .

Students who take part in the partial enrollment may agree with the teacher the possibility of doing alternative activities to the face-to-face ones.

The criteria

for passing the subject on the second opportunity are the same as for passing on the first.
