Methodologies	
Methodologies	Description
Oral presentation	Intervention inherent to the teaching-learning processes based on verbal presentation through which students and teachers interact in an orderly manner, proposing questions, making clarifications and presenting topics, works, concepts, facts or principles in a dynamic way.
Supervised projects	Methodology designed to promote autonomous learning of students under the tutelage of the teacher and in various settings (academic and professional). It refers primarily to learning "how to do things." It constitutes an option based on the assumption by students of responsibility for their own learning. This teaching system is based on two basic elements: the independent learning of the students and the monitoring of that learning by the teacher-tutor.

Personalized attention	
Methodologies	Description
Supervised projects	The tutor will supervise the development of the master's thesis until its completion.
