General description	The current importance of enzymatic	processes	applied to the food	and drug industry allo	ows the production of compounds	
	that could not obtain by any other way. Industrial production of enzymes is a business that at the beginning of the 21st					
	century moves around 1600 million of dollars a year. The use of enzymes in industrial processes is often limited by factors					
	inherent to the nature of enzymes as for example a lack of stability in extreme conditions of temperature or pH,					
	denaturation in presence of organic solvents or poor activity against certain substrates. Currently, there are a wide range of					
	techniques of expression and engineering of proteins that allow the generation of modified proteins in order to overcome					
	these limitations. There are a wide range of products developed by these pathways that are used in various fields. This					
	course will describe current methods for expression and modification of proteins, both in basic research and					
	biotechnological applications.					

	Study programme competences / results
Code	Study programme competences / results
A1	Skills of working in a sure way in the laboratories knowing operation handbooks and actions to avoid incidents of risk.
A2	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and
	instruments as well as understanding potentials of their uses and applications.
A10	Skills of modifying genes, proteins and chromosomes with biotechnological applications
В3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions
	and to prepare reasoned reports on scientific and biotechnological questions
B7	Personal progress skills : that are able to learn from freelance way, adapting to new situations, developing necessary qualities as the
	creativity, skills of leadership, motivation for the excellence and the quality.
C2	Ability to know and use appropriately the technical terminology of the field of knowledge of the master, in the native language and in
	English, as a language of international diffusion in this field
C3	Using ICT in working contexts and lifelong learning.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

Learning outcomes			
Learning outcomes Study progra		ımme	
	con	npetenc	es/
		results	
Ability to learn and use biochemical concepts, techniques and resources available in databases related to the subject	AR1	BR7	CC2
	AR2		CC3
	AR10		CC8

Ability to solve practical cases through the acquisition of skills that allow to carry out a simulated project of expression of	AR1	BR3	CC2
recombinant proteins and directed evolution of proteins.	AR2	BR7	CC3
	AR10		CC8

Contents				
Topic	Sub-topic Sub-topic			
Systems for expresión of native and recombinant proteins:	Systems of expression of Heterologous proteins in bacteria and purification.			
bacterias				
Systems for expresión of native and recombinant proteins:	Systems of expression of Heterologous proteins in yeast and down-stream			
yeasts	processing.			
Systems for expresión of native and recombinant proteins:	Genetic manipulation of animal cells. Systems of expression and production of			
animal cells	proteins in mammalian cells.			
Protein engineering I	Introduction. Site-directed mutagenesis techniques.			
Protein engineering II	Techniques of artificial evolution of proteins.			
Protein engineering III	Techniques of stabilization and immobilization of enzymes.			
Industrial applications of protein engineering	Applications in Enzymology, pharmaceutical, food industry and other applications.			

	Plannir	ng		
Methodologies / tests	Competencies /	Teaching hours	Student?s personal	Total hours
	Results	(in-person & virtual)	work hours	
Guest lecture / keynote speech	A10 B7	7	7	14
Laboratory practice	A2 A1 A10 B3 C3	7	14	21
Mixed objective/subjective test	B3	2	16	18
Directed discussion	B3 C2 C3 C8	7	14	21
Personalized attention		1	0	1
(*)The information in the planning table is for	guidance only and does no	t take into account the I	heterogeneity of the stu	dents.

Methodologies			
Methodologies	Description		
Guest lecture /	Oral presentation complemented with the use of audiovisual media in order to pass on knowledge and facilitate learning.		
keynote speech			
Laboratory practice	A methodology that allows students to learn effectively through practical activities.		
Mixed	Exam comprising questions type of testing trial, questions objective type testing and resolution of cases and problems.		
objective/subjective			
test			
Directed discussion	Technique of group dynamics in which the members of a group discussed free, informal and spontaneous way on a subject		
	coordinated by a moderator.		

Personalized attention			
Methodologies Description			
Directed discussion	The directed discussion is conceived as moments of face-to-face student work with the teacher by involving compulsory		
	student participation.		

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		

Mixed objective/subjective test	В3	Test to evaluate the knowledge acquired during the master classes, practical classes of laboratory as well as directed discussion	60
Laboratory practice	A2 A1 A10 B3 C3	Regular attendance and active participation to laboratory practices as well as the report made by students will be evaluated	20
Directed discussion	B3 C2 C3 C8	Regular attendance and active participation will be evaluated	20

Assessment comments

To get honours preference will be given to the best notes of the call of June

Recommendations Subjects that it is recommended to have taken before Molecular Techniques/610441002 Subjects that are recommended to be taken simultaneously Protein Structure and Dynamics/610441012 Bioinformatics and Biomolecular models /610441021 Subjects that continue the syllabus Project/610441023 Other comments

To contribute to achieving an immediate sustainable environment and comply with point 6 of the "Environmental Declaration of the Faculty of Sciences (2020)", the documentary work carried out in this area:a. They will be requested mainly in virtual format and computer support.B. To do on paper:Plastics will not be used.- Double-sided prints will be made.- Recycled paper will be used.- Drafts will be avoided.
