General description	<p>In increasingly globalized and competitive environments, the figure of the entrepreneur acquires a leading role in the economic and social context of a community, especially the creation of high added value companies based on development of scientific and technological advances in strategic sectors such as dynamic element of growth. This subject is part of the Master's Degree in Molecular, Cellular and Genetic Biology. The main contributions of the subject are: understanding the importance of entrepreneurial culture, learning how to start a business and analyzing the context, as well as evaluating the opportunities and risks of entrepreneurial actions.</p>				

Study programme competences / results

Code	Study programme competences / results
A3	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A13	Skills to become a professional in health, pharmacy, veterinary, animal production, biotechnology or food sectors.
B7	Personal progress skills : that are able to learn from freelance way, adapting to new situations, developing necessary qualities as the creativity, skills of leadership, motivation for the excellence and the quality.
B8	Critical reasoning skills and ethical commitment with the society: sensitivity in front of bioethical problems and to the ones related to the natural resource conservation
B9	Skills of preparation, show and defense of a work.
B11	That students know how to apply the knowledge acquired and their ability to solve problems in new or little-known environments within broader (or multidisciplinary) contexts related to their area of ??study
B12	That students are able to integrate knowledge and face the complexity of formulating judgments based on information, which, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments
B13	That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to specialized and non-specialized audiences in a clear and unambiguous way
C5	Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.
C9	Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and accomplishing them.

Methodologies	
Methodologies	Description
Supervised projects	Supervised learning process aimed at helping students to work independently in a range of contexts (academic and professional). Focused primarily on learning ?how to do things? and on encouraging students to become responsible for their own learning.

Seminar	Group work technique aimed at in-depth exploration of given topic, consisting of group discussion, individual engagement, preparation of texts and collective conclusions.
Guest lecture / keynote speech	Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning. Presentations of this type are variously referred to as 'expository method?', 'guest lectures?' or 'keynote speeches?'. (The term 'keynote?' refers only to a type of speech delivered on special occasions, for which the lecture sets the tone or establishes the underlying theme; it is characterised by its distinctive content, structure and purpose, and relies almost exclusively on the spoken word to communicate its ideas.)

Personalized attention

Methodologies	Description
Supervised projects	All doubts raised in the tutorial hours will be addressed via Teams

Assessment

Methodologies	Competencies / Results	Description	Qualification
Supervised projects	A3 A13 B7 B8 B9 B11 B12 B13 B7 B9 C5 C7 C8 C9 C7	Realization and presentation of a business plan where all the contents covered in the module are reflected.	100

Assessment comments

<p>1. Assessment conditions: Teams/Moodle</p> <p>2. Identification of the student: students must prove their personality in accordance with current regulations.</p> <p>B) TYPES OF RATING:</p> <p>1. No-show grade: when students only participate in assessment activities that have a weighting of less than 20% on the final grade, regardless of the grade achieved.</p> <p>2. Students with recognition of part-time dedication and academic waiver of attendance exemption: Except for the dates approved in the Faculty Board for the final objective test, for the remaining tests a specific calendar of compatible dates will be agreed at the beginning of the course with your dedication. The evaluation will follow the same criteria as full-time students.</p> <p>1. First opportunity: the evaluation criteria previously indicated in this section will be applied.</p> <p>2. Second Chance: The evaluation criteria are the same for all evaluation opportunities.</p> <p>3. Early call: in the early call it is possible to recover the points of the continuous evaluation by means of additional questions to the final objective test.</p>
