UNIVERSIDADE DA CORUÑA

Teaching Guide

Identifying Data				2023/24
Subject (*)	Proteomics		Code	610441014
Study programme	Máster Universitario en Bioloxía Molecular, Celular e Xenética			

Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	2nd four-month period	First	Optional	3
Language	SpanishGalicianEnglish			
Teaching method	Face-to-face			
Prerequisites				
Department	BioloxíaDepartamento profesorado máster			
Coordinador	Becerra Fernandez, Manuel	E-mail	manuel.becerra@udc.es	
Lecturers	Becerra Fernandez, Manuel	E-mail	manuel.becerra@udc.es	
	Calamia , Valentina		valentina.calamia@sergas.es	
	Fernández Puente, Patricia		patricia.fernandez.puente@udc.es	
	Lourido Salas, Lucía María		l.lourido@udc.es	
	Ruiz Romero, Cristina		crisruiz@canalejo.org	
Web				
General description	It is coordinated by Manuel Becerra (manuel.becerra@udc.es) and is taught by INIBIC teachers (contact: cristina.ruiz.romero@sergas.es) The aim of this subject is to train the student to: .-Understand the basic techniques of working in proteomics .-Obtain and manage protein samples .-Know the techniques for the separation and massive detection of proteins .-Understand large-scale proteomic data analysis methods .-Know the applications of proteomics in basic, applied and clinical research .-The critical reading and understanding of scientific publications in the field of proteomics			

Study programme competences	
Code	Study programme competences
A2	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and instruments as well as understanding potentials of their uses and applications.
A3	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A9	Skills of understanding the structure and dynamics of proteins to individual and proteomic level, as well as the techniques that are necessary to analyze them and to study their interactions with other biomolecules.
B1	Analysis skills to understand biological problems in connection with the Molecular and Cellular Biology and Genetics.
B3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions and to prepare reasoned reports on scientific and biotechnological questions
C1	Ability to express oneself correctly, both orally and in writing, in the official languages of the autonomous community
C2	Ability to know and use appropriately the technical terminology of the field of knowledge of the master, in the native language and in English, as a language of international diffusion in this field

Learning outcomes			
Learning outcomes	Study programme competences		
In this course knowledge and skills about the extraction, purification and characterization of proteins from biological systems is adquired.	AR2 AR3 AR9	BR1 BR3	CC1 CC2

Contents	
Topic	**Sub-topic**
Proteomics	1.-The concept of proteomics and its applications. 2.-Preparation of protein extracts and protein solubilization.
	3.-Proteomics by two-dimensional electrophoresis. 4.-Handling two-dimensional proteomics bioinformatics programs.
	5.-Identification and characterization of proteins in micro-scale. Differential expression proteomics: DIGE.
	6.-Protein expression and protein chips.
	7.-Protein identification by peptide mass fingerprinting.
	8.-Tandem mass spectrometry (MS/MS): peptide sequencing.
	9.- Databases and search programs for assisted protein identification by MS.
	10.-Proteomics differential expression without gel: ICAT, iTRAQ, SILAC.
	11.-Applications of proteomics in the field of Biomedicine.
	12.-The human proteome.

Planning				
Methodologies / tests	**Competencies**	**Ordinary class hours**	**Student?s personal work hours**	**Total hours**
Guest lecture / keynote speech	A9 C2	9	18	27
Laboratory practice	A2 A3 A9 B1 B3 C1	9	0	9
Objective test	A2 A3 A9 B1 B3	2	36	38
Personalized attention		1	0	1
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	**Description**
Guest lecture / keynote speech	Magistral exposures
Laboratory practice	A guided tour of techniques at the Proteomic unit
Objective test	Questionary about the program content

Personalized attention	
Methodologies	**Description**
Guest lecture / keynote speech Laboratory practice	Students with part-time dedication or waiver of presence should contact the teachers of the subject in the early going to establish a schedule of activities to acquire and evaluate in a complementary way the competences.

Assessment			
Methodologies	**Competencies**	**Description**	**Qualification**
Guest lecture / keynote speech	A9 C2	Attendance and participation	25
Laboratory practice	A2 A3 A9 B1 B3 C1	Attendance and participation	25
Objective test	A2 A3 A9 B1 B3	Multiple options selection/test	50

Assessment comments

Students with part-time dedication or waiver attendance may choose to

be evaluated in a final exam if they do not qualify for continuous evaluation.

Sources of information	
Basic	Se especifican en Moodle junto co resto dos materiais a utilizar. Se especifican en Moodle junto co resto dos materiais a utilizar.
Complementary	Se especificarán en la aplicación de la materia

Recommendations
Subjects that it is recommended to have taken before
Molecular Techniques/610441002
Subjects that are recommended to be taken simultaneously
Genomics /610441015
Subjects that continue the syllabus
Project/610441023
