

Teaching Guide				
Identifying Data				2023/24
Subject (*)	Proteomics	Code	610441014s	
Study programme	Máster Universitario en Bioloxía Molecular, Celular e Xenética (semipresencial)			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	2nd four-month period	First	Optional	3
Language	SpanishGalicianEnglish			
Teaching method	Hybrid			
Prerequisites				
Department	BioloxíaDepartamento profesorado máster			
Coordinador	Becerra Fernandez, Manuel	E-mail	manuel.becerra@udc.es	
Lecturers	Becerra Fernandez, Manuel	E-mail	manuel.becerra@udc.es	
Web				
General description	<p>It is coordinated by Manuel Becerra (manuel.becerra@udc.es) and is taught by INIBIC teachers (contact: cristina.ruiz.romero@sergas.es)</p> <p>The aim of this subject is to train the student to:</p> <ul style="list-style-type: none"> .-Understand the basic techniques of working in proteomics .-Obtain and manage protein samples .-Know the techniques for the separation and massive detection of proteins .-Understand large-scale proteomic data analysis methods .-Know the applications of proteomics in basic, applied and clinical research .-The critical reading and understanding of scientific publications in the field of proteomics 			

Study programme competences / results	
Code	Study programme competences / results
A2	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and instruments as well as understanding potentials of their uses and applications.
A3	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A9	Skills of understanding the structure and dynamics of proteins to individual and proteomic level, as well as the techniques that are necessary to analyze them and to study their interactions with other biomolecules.
B1	Analysis skills to understand biological problems in connection with the Molecular and Cellular Biology and Genetics.
B3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions and to prepare reasoned reports on scientific and biotechnological questions
C2	Ability to know and use appropriately the technical terminology of the field of knowledge of the master, in the native language and in English, as a language of international diffusion in this field

Learning outcomes			
Learning outcomes			Study programme competences / results
In this course knowledge and skills about the extraction, purification and characterization of proteins from biological systems is acquired.	AR2	BR1	CC2
	AR3	BR3	
	AR9		

Contents	
Topic	Sub-topic

Proteomics	<p>1.-The concept of proteomics and its applications. 2.-Preparation of protein extracts and protein solubilization.</p> <p>3.-Proteomics by two-dimensional electrophoresis. 4.-Handling two-dimensional proteomics bioinformatics programs.</p> <p>5.-Identification and characterization of proteins in micro-scale.</p> <p>Differential expression proteomics: DIGE.</p> <p>6.-Protein expression and protein chips.</p> <p>7.-Protein identification by peptide mass fingerprinting.</p> <p>8.-Tandem mass spectrometry (MS/MS): peptide sequencing.</p> <p>9.- Databases and search programs for assisted protein identification by MS.</p> <p>10.-Proteomics differential expression without gel: ICAT, iTRAQ, SILAC.</p> <p>11.-Applications of proteomics in the field of Biomedicine.</p> <p>12.-The human proteome.</p>

Planning

Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A9 B1 B3	9	18	27
Laboratory practice	A2 A3 C2	9	0	9
Objective test	A2 A9 B1 B3 C2	2	36	38
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

Methodologies	Description
Guest lecture / keynote speech	Magistral exposures
Laboratory practice	A guided tour of techniques at the Proteomic unit
Objective test	Questionary about the program content

Personalized attention

Methodologies	Description
Guest lecture / keynote speech	Students with part-time dedication or waiver of presence should contact the teachers of the subject in the early going to establish a schedule of activities to acquire and evaluate in a complementary way the competences.
Laboratory practice	

Assessment

Methodologies	Competencies / Results	Description	Qualification
Guest lecture / keynote speech	A9 B1 B3	Attendance and participation	25
Laboratory practice	A2 A3 C2	Attendance and participation	25
Objective test	A2 A9 B1 B3 C2	Multiple options selection/test	50

Assessment comments

Students with part-time dedication or waiver attendance may choose to be evaluated in a final exam if they do not qualify for continuous evaluation. Blended learning students who choose this subject must take into account that they will have to attend all the activities of this subject in person.

Sources of information

Basic	Se especifican en Moodle junto co resto dos materiais a utilizar. Se especifican en Moodle junto co resto dos materiais a utilizar.
Complementary	Se especificarán en la aplicación de la materia

Recommendations

Subjects that it is recommended to have taken before

Molecular Techniques/610441002s

Subjects that are recommended to be taken simultaneously

Genomics /610441015s

Subjects that continue the syllabus

Project/610441023s

Other comments

Blended learning students who choose this subject must take into account that they will have to attend all the activities of this subject in person.
