General description	External practices constitute a perio	od of apprent	iceship in companies	and institutions .	
	Coordinates the external practices I	Esperanza C	erdán Villanueva.		
	Although only appear in the applica	tion as teach	ners those who particip	oated in external pr	actices in the previous year, all
	teachers officially associated with the	ne Master BN	MCG can participate as	s academic tutors of	of external practices, and each
	company appoints for each student	a tutor in co	mpany.		

	Study programme competences / results
Code	Study programme competences / results
A1	Skills of working in a sure way in the laboratories knowing operation handbooks and actions to avoid incidents of risk.
A2	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and
	instruments as well as understanding potentials of their uses and applications.
А3	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A8	Skills of having an integrated view of the previously acquired knowledge about Molecular and Cellular Biology and Genetics, with an
	interdisciplinary approach and experimental work.
A13	Skills to become a professional in health, pharmacy, veterinary, animal production, biotechnology or food sectors.
B2	Skills of decision making for the problem solving: that are able to apply theoretical knowledges and practical acquired in the formulation of
	biological problems and the looking for solutions.
B4	Organization and work planning skills: that are able to manage the use of the time as well as available resources and to organize the work
	in the laboratory.
B6	Skills of team work: that are able to keep efficient interpersonal relationships in an interdisciplinary and international work context, with
	respect for the cultural diversity.
B7	Personal progress skills : that are able to learn from freelance way, adapting to new situations, developing necessary qualities as the
	creativity, skills of leadership, motivation for the excellence and the quality.
B12	That students are able to integrate knowledge and face the complexity of formulating judgments based on information, which, being
	incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and
	judgments
C1	Ability to express oneself correctly, both orally and in writing, in the official languages of the autonomous community

Ability to know and use appropriately the technical terminology of the field of knowledge of the master, in the native language and in English, as a language of international diffusion in this field C3 Using ICT in working contexts and lifelong learning. C4 Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective. C5 Understanding the importanceof entrepreneurial culture and the useful means for enterprising people. C6 Acquiring skills for healthy lifestyles, and healthy habits and routines. C7 Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development. C8 Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society. C9 Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and accomplishing them.

	Contents
Topic	Sub-topic
Once each student has been assigned to a company /	
institution, the tutor in the company will prepare a descriptive	
plan of the practical work and methodology. This plan will also	
include the timetables for the implementation of practices and	
methods of supervision by the tutor of the company. There is	
a standard form available on the website of Master BMCG .

	Methodologies
Methodologies	Description

Introductory activities	Interview and presentation of training plan. The academic tutor will supervise the student practices and procedures as well as informs necessary for the realization of external practices.
Document analysis	Analysis of literature and protocols necessary for the implementation of practices and understanding of its various applications to the solution of problems and the development of ideas for innovation.
Laboratory practice	This methodology refers to practical work in the company / institution and its specific development for each case will be proposed by the tutor in the company.
Summary	The student will develop a memory in which techniques and procedures developed during their stay in the company are collected and their personal assessment of the application of this knowledge to solve problems related to the fields of application of the Master and its potential for business development. There is a type format available on the website of the Master.

	Personalized attention
Methodologies	Description
Introductory activities	The academic tutor will guide students in their choice of practical work and how to prepare and submit the written summary.

		Assessment	
Methodologies	Methodologies Competencies / Description		Qualification
	Results		
Laboratory practice	A1 A2 A3 B4 B6 C5	The tutor in the company makes a report on the skills developed by the student.	50
	C6 C7 C9		
Summary	A8 C3	The student makes a report on the external practices that must be made ??with the	50
		approval of the company tutor and academic supervisor. There is a standard form of	
		memory that is available to students on the website of the Master .	
		The academic tutor assesses the report of the tutor in the company and the report	
		submitted by the student and in turn issued a report with a recommendation rating.	

Assessment comments

The overall process of assessing the PEX is based on three processes

- a) The report by the tutor of the company
- b) The report prepared by the academic tutor who assesses the report of the company tutor and memory prepared by the student
- $\ensuremath{\text{c}}$) The joint evaluation by the Commission of the Degree of the evidence collected in a) and $\ensuremath{\text{b}}$)

Subjects that it is recommended to have taken before
Subjects that are recommended to be taken simultaneously
Subjects that continue the syllabus
Other comments

Gender PerspectiveAccording to the different regulations applicable to university teaching, the gender perspective must be incorporated in this subject (non-sexist language will be used, bibliography of authors of both sexes will be used, the intervention of male and female students in class will be encouraged...). We will work to identify and modify sexist prejudices and attitudes and will influence the environment to modify them and promote values of respect and equality. Situations of gender discrimination should be detected and actions and measures will be proposed to correct them. Green Campus Program Faculty of SciencesTo help achieve an immediate sustainable environment and comply with point 6 of the "Environmental Statement of the Faculty of Science (2020)", any documentary homework to be carried out in this subject:a. They will be requested mostly in virtual format and computer support.b. If on paper:- No plastics will be used.- Double-sided printing shall be used.- Recycled paper shall be used.- Drafts shall be avoided. The Environmental Statement is available in:https://ciencias.udc.es/images/Facultade/Green_Campus/Regulamento_Comit%C3%A9_Green_Campus_FCiencias.pdf

(*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
