

		Teaching Guide			
Identifying Data			2023/24		
Subject (*)	Knowledge and Reasoning under Uncertainty		Code	614544007	
Study programme	Máster Universitario en Intelixencia Artificial				
	-	Descriptors			
Cycle	Period	Year	Туре	Credits	
Official Master's Degre	e 2nd four-month period	First	Optional	3	
Language	English				
Teaching method	Face-to-face				
Prerequisites					
Department	Ciencias da Computación e Tecnol	oxías da Información			
Coordinador		E-m	ail		
Lecturers	Alonso Ríos, David	E-m	ail david.alonso@	udc.es	
	Cabalar Fernandez, Jose Pedro		pedro.cabalar@	Dudc.es	
Web					
General description					

	Study programme competences / results
Code	Study programme competences / results
A6	CE05 - Ability to design and develop intelligent systems through the application of inference algorithms, knowledge representation and automated planning
A7	CE06 - Ability to recognise those problems that require a distributed architecture, not predetermined during the system design, suitable for the implementation of multiagent systems
A8	CE07 - Ability to understand the consequences of the development of an explainable and interpretable intelligent system
A9	CE08 - Ability to design and develop secure intelligent systems, in terms of integrity, confidentiality and robustness
B1	CG01 - Maintaining and extending theoretical foundations to allow the introduction and exploitation of new and advanced technologies in the field of AI
B2	CG02 - Successfully addressing each and every stage of an AI project
B3	CG03 - Searching and selecting that useful information required to solve complex problems, with a confident handling of bibliographical sources in the field
B6	CB01 - Acquiring and understanding knowledge that provides a basis or opportunity to be original in the development and/or application of ideas, frequently in a research context
B7	CB02 - The students will be able to apply the acquired knowledge and to use their capacity of solving problems in new or poorly explored environments inside wider (or multidisciplinary) contexts related to their field of study
B8	CB03 - The students will be able to integrate different pieces of knowledge, to face the complexity of formulating opinions (from information that may be incomplete or limited) and to include considerations about social and ethical responsibilities linked to the application of their knowledge and opinions
B9	CB04 - The students will be able to communicate their conclusions, their premises and their ultimate justifications, both to specialised and non-specialised audiences, using a clear style language, free from ambiguities
C2	CT02 - Command in understanding and expression, both in oral and written forms, of a foreign language
C3	CT03 - Use of the basic tools of Information and Communications Technology (ICT) required for the student's professional practice and learning along her life
C4	CT04 - Acquiring a personal development for practicing a citizenship under observation of the democratic culture, the human rights and the gender perspective
C5	CT05 - Understanding the importance of the entrepreneurial culture and knowledge of the resources within the entrepreneur person's means
C6	CT06 - Acquiring abilities for life and healthy customs, routines and life styles
C7	CT07 - Developing the ability to work in interdisciplinary or cross-disciplinary teams to provide proposal that contribute to a sustainable environmental, economic, political and social development

C8	CT08 - Appreciating the importance of research, innovation and technological development in the socioeconomic and cultural progress of society			
	Learning outcomes			
	Learning outcomes	Study	y progra	amme
		con	npetenc	;es /
			results	
knowing a	and understanding the concepts of imprecision and uncertainty versus certainty	AC5	BC1	CC2
		AC6	BC2	CC3
		AC7	BC3	CC6
		AC8	BC6	CC7
			BC7	CC8
			BC8	
			BC9	
knowing t	he main models of imprecise reasoning and assessing their adequacy for problem solving in the scope of Artificial	AC5	BC1	CC2
Intelligend	be	AC6	BC2	CC4
		AC7	BC7	CC5
		AC8	BC8	CC7

	Methodologies	
Methodologies	Description	
Laboratory practice Practical work, normally in groups, with tools of real time systems		
Objective test	Individual exam	
Guest lecture /	Classes of concepts and foundations with small exercises	
keynote speech		

**Personalized attention** 

Methodologies	Description
Guest lecture /	Tutorials and remote guidance by e-mail or online platform (Teams, moodle, etc)
keynote speech	
Laboratory practice	
Objective test	

		Assessment	
Methodologies	Competencies /	Description	
	Results		
Guest lecture /	A6 A7 A8 A9 B1 B2	Depending on how the course evolves, a part of the exam could be consolidated by	0.5
keynote speech	B3 B6 B7 B8 B9 C2	submitting solved exercises along the lecture classes period	
	C3 C4 C5 C6 C7 C8		
Laboratory practice	A6 A7 A8 A9 B1 B2	Submission of one or several practical assignments	49.5
	B3 B6 B7 B8 B9 C2		
	C3 C4 C5 C6 C7 C8		
Objective test	A6 A7 A8 A9 B1 B2	An individual exam consisting of several exercises that will be assessed up to a	50
	B3 B6 B7 B8 B9 C2	maximum of 50 points	
	C3 C4 C5 C6 C7 C8
