		Teaching Guide	е		
	Identifying	Data			2023/24
Subject (*)	AI in Health			Code	614544022
Study programme	Máster Universitario en Intelixencia Artificial				
		Descriptors			
Cycle	Period	Year		Туре	Credits
Official Master's Degre	ee 1st four-month period	Second		Optional	3
Language	English		'		'
Teaching method	Face-to-face				
Prerequisites					
Department	Ciencias da Computación e Tecnolo	oxías da Información	l		
Coordinador	Pazos Sierra, Alejandro		E-mail	alejandro.pazo	s@udc.es
Lecturers	Ortega Hortas, Marcos E-mail m.ortega@udc.es			.es	
	Pazos Sierra, Alejandro			alejandro.pazo	s@udc.es
Web				,	
General description					

	Chudy programme competences
Code	Study programme competences
	Study programme competences
A8	CE07 - Ability to understand the consequences of the development of an explainable and interpretable intelligent system
A9	CE08 - Ability to design and develop secure intelligent systems, in terms of integrity, confidentiality and robustness
A10	CE09 - Ability to obtain a deep knowledge about fundamental principles and models of quantum computing and to apply them for the
	interpretation, selection, evaluation, modelling and creation of new concepts, theories, uses and technological developments related to
	Artificial Intelligence
A14	CE13 - Knowledge of computer tools in the field of data analysis and statistical modelling and ability to select those ones most suitable for
	problem solving
A15	CE14 - Understanding and command of the main machine learning techniques, including those devised for big volumes of data.
	Understanding and command of basic concepts and techniques for information search and filtering in big collections of data.
A16	CE15 - Knowledge of computer tools in the field of machine learning and ability to select those ones most suitable for problem solving
A20	CE19 - Knowledge of the different environments where AI based technologies can be applied and awareness of their capability to provide
	a differentiating added value
A21	CE20 - Ability to combine and adapt different techniques, extrapolating knowledge among different application domains
A22	CE21 - Knowledge of the techniques that facilitate the efficient organisation and management of AI projects in real environments, including
	resources management and tasks scheduling and taking into account the concepts of knowledge dissemination and open science
A23	CE22 - Knowledge of the techniques that facilitate the security of data, applications and communications and the derived consequences
	on different application domains in Al
A28	CE27 - Understanding the significance of the entrepreneurial culture and knowledge of the resources within the enterpreneur person's
	means
A29	CE28 - Appropriate knowledge of the concept of enterprise, its organisation and management, and of the different business sectors, with
	the goal of providing solutions from the AI perspective
A30	CE29 - Being able to apply knowledge, abilities and attitudes to the business and professional world, by planning, managing and
	evaluating projects in the scope of AI
A31	CE30 - Being able to set out, model and solve problems that require the application of AI methods, techniques and technologies
B1	CG01 - Maintaining and extending theoretical foundations to allow the introduction and exploitation of new and advanced technologies in
	the field of Al
B2	CG02 - Successfully addressing each and every stage of an AI project
B4	CG04 - Suitably elaborating written essays or motivated arguments, including some point of originality, writing plans, work projects,
	scientific papers and formulating reasonable hypotheses in the field
B5	CG05 - Working in teams, especially of multidisciplinary nature, and being skilled in the management of time, people and decision making

	to them
C9	CT09 - Being able to manage time and resources: outlining plans, prioritising activities, identifying criticisms, fixing deadlines and sticking
	society
C8	CT08 - Appreciating the importance of research, innovation and technological development in the socioeconomic and cultural progress of
	means
C5	CT05 - Understanding the importance of the entrepreneurial culture and knowledge of the resources within the entrepreneur person's
B10	CB05 - The students will acquire learning abilities to allow them to continue studying in way that will mostly be self-directed or autonomous
	non-specialised audiences, using a clear style language, free from ambiguities
В9	CB04 - The students will be able to communicate their conclusions, their premises and their ultimate justifications, both to specialised and
	environments inside wider (or multidisciplinary) contexts related to their field of study
В7	CB02 - The students will be able to apply the acquired knowledge and to use their capacity of solving problems in new or poorly explored
	ideas, frequently in a research context
В6	CB01 - Acquiring and understanding knowledge that provides a basis or opportunity to be original in the development and/or application of

Learning outcomes			
Learning outcomes	Stud	y progra	amme
			ces
Developing sound capabilities for creating complex models that allow personalised diagnostics and clinic trends prediction	AC7	BC1	CC5
based on heterogeneous sources	AC8	BC2	CC8
	AC9	BC4	CC9
	AC13	BC5
