

## Teaching Guide

Identifying Data					2023/24
Subject (*)	Administration of Infrastructures and Information Systems		Code	614G01113	
Study programme	Grao en Enxeñaría Informática				
Descriptors					
Cycle	Period	Year	Type	Credits	
Graduate	2nd four-month period	Fourth	Optional	6	
Language	SpanishGalician				
Teaching method	Face-to-face				
Prerequisites					
Department	Enxeñaría de Computadores				
Coordinador	Rey Expósito, Roberto	E-mail	roberto.rey.exposito@udc.es		
Lecturers	Rey Expósito, Roberto	E-mail	roberto.rey.exposito@udc.es		
Web	campusvirtual.udc.gal				
General description	O obxectivo desta materia é proporcionar ao alumnado o coñecemento básico necesario para a administración de sistemas informáticos. Isto inclúe a administración e despregamento de infraestruturas servidor e clúster facendo uso de tecnoloxías de virtualización e almacenamento en rede. A orientación da materia é eminentemente práctica, traballando con tecnoloxías, ferramentas e servizos habituais nestas contornas.				

## Study programme competences / results

Code	Study programme competences / results
A52	Capacidade para comprender o contorno dunha organización e as súas necesidades no ámbito das tecnoloxías da información e as comunicacións.
A53	Capacidade para seleccionar, deseñar, despregar, integrar, avaliar, construír, xestionar, explotar e manter as tecnoloxías de hardware, software e redes dentro dos parámetros de custo e calidade adecuados.
A55	Capacidade para seleccionar, deseñar, despregar, integrar e xestionar redes e infraestruturas de comunicacións nunha organización.
B1	Capacidade de resolución de problemas
B3	Capacidade de análise e síntese
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

## Learning outcomes

Learning outcomes	Study programme competences / results		
Capacity to select, design, deploy, integrate, evaluate, build, manage, exploit and maintain the hardware, software and network technologies within appropriate cost and quality parameters.	A52	B1	C6
	A53	B3	C8
Capacity for selecting, designing, deploying, integrating and managing infrastructure and network communication infrastructures in an organization.	A52	B1	C6
	A55	B3	C8

## Contents

Topic	Sub-topic
Despregamento e administración de infraestrutura	
1. Cloud Computing	Introduction Service Models Deployment Example of a public cloud provider: Amazon Web Services

2. Virtualization	Virtualization Technologies Server Virtualization Container technologies Seminar and exercises on Docker
3. Clusters	Cluster Elements Administration Monitorization Seminar on container clustering Seminar on distributed Big Data infrastructures

**Planning**

Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Laboratory practice	A53 A55 B1 B3 C6	21	63	84
Mixed objective/subjective test	A52 A53 A55 B1 B3	3	6	9
Guest lecture / keynote speech	A52 A53 A55 C6 C8	21	31.5	52.5
Personalized attention		4.5	0	4.5

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

**Methodologies**

Methodologies	Description
Laboratory practice	Practical exercises on selection, design, deployment, evaluation and management of storage infrastructure, both on premises and on the cloud, to work on the concepts discussed in the classroom.
Mixed objective/subjective test	Test made up of evaluation questions to validate that the students have understood the theoretical concepts and they know how to put it into practice.
Guest lecture / keynote speech	Classroom presentation on the topics of the subject to transmit knowledge and ease the learning and assimilation process of the discussed concepts.

**Personalized attention**

Methodologies	Description
Guest lecture / keynote speech	Solving doubts of the students on the lab exercises.
Laboratory practice	Personalized attention to those students with part-time enrollment or with difficulties to attend lectures due to special circumstances.

**Assessment**

Methodologies	Competencies / Results	Description	Qualification
Laboratory practice	A53 A55 B1 B3 C6	A avaliación das prácticas propostas polo profesorado realizarase de forma continua ao longo do cuadrimestre en función das actividades entregadas debidamente en tempo e forma. Ademais poderán realizarse probas complementarias de avaliación continua sobre os contidos específicos das prácticas nas que o alumnado debe demostrar a asimilación dos conceptos traballados nas sesións de laboratorio.	50
Mixed objective/subjective test	A52 A53 A55 B1 B3	Ao final do cuadrimestre realizarase un exame individual que conterà preguntas relacionadas cós contidos do temario desenvolvido durante as sesións maxistras có obxectivo de avaliar os coñecementos adquiridos polo alumnado.	50

### Assessment comments

It is required at least 40% of lab exercises and 40% of the written exam. If these conditions are not met but the final mark (applying the formula) is above 5 then the final mark will be 4 (Fail) out of 10. Thus, an 8 in labs and 3 in exam then the pondered mark is 5.5, but in the academic record of the student it will be specified a 4 (Fail).

Failing in June means that there is an opportunity of retake the exam in July, maintaining the lab qualification. In this case it will be required only a 40% in the written exam and a final note over 5.

Part time students will be specially considered in order to support his/her work. There will be some additional flexibility and personalized treatment for them.

### Recommendations

#### Subjects that it is recommended to have taken before

Operating Systems Administration/614G01047

Network Administration/614G01048

Computer Systems Security/614G01079

#### Subjects that are recommended to be taken simultaneously

Computer Infrastructure Engineering/614G01059

#### Subjects that continue the syllabus

#### Other comments
