| General description | <p>This subject is inteded to master the current solutions in Software Engineering for software validation and verification. These include:</p> <ul style="list-style-type: none"><li>- knowledge on functional and non-functional testing techniques and tools, applicable to different levels (unit, integration, system);</li><li>- knowledge on techniques and tools for automatic reasoning; and</li><li>- knowledge on techniques and tools for formal verification.</li></ul> |        |            |           |

## Study programme competences

| Code | Study programme competences                                                                                                                                                                                   |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A28  | Capacidade de identificar e analizar problemas, e deseñar, desenvolver, implementar, verificar e documentar solucións software sobre a base dun coñecemento adecuado das teorías, modelos e técnicas actuais. |
| B1   | Capacidade de resolución de problemas                                                                                                                                                                         |
| B3   | Capacidade de análise e síntese                                                                                                                                                                               |
| C2   | Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.                                                                                                                           |
| C3   | Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.                               |
| C6   | Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.                                                                             |
| C7   | Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.                                                                                                                              |
| C8   | Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.                                                                 |

| Laboratory practice | A28 B1 B3 C2 C3 C6 | Hand in and presentation of student assignments, up to a maximum of 4 points in the final score. These are not compulsory to pass.            | 40            |
| Supervised projects | A28 B1 B3 C2 C3 C6 | Student assignments presented during reduced-group classes, up to a maximum of 2 points in the final score. These are not compulsory to pass. | 20            |
| Objective test      | B1 B3 C6           | Written test, up to a maximum of 4 points in the final score. A minimum of 2 points is required to pass.                                      | 40            |

| Assessment comments |
|---------------------|
|---------------------|

Those students who do not reach the minimum in the objective test, will be qualified with the qualification they obtain in that objective test.

In the second opportunity, the objective test may include a specific evaluation of the laboratory practice.

In compliance with the academic rules at UDC that apply to part-time students, physical presence in the classroom/laboratory will not be regarded as qualification element. That is to say, students may officially apply to be dismissed from attending lectures and laboratory practices. All in all, part-time students will still need to comply with deadlines established for supervised projects and laboratory projects.
