| General description | <p>Recommendation systems are used in a variety of areas, with commonly recognized examples taking the form of playlist generators for video and music services, product advocates for online stores, or content advocates for social media platforms, and advocacy advocates. open web content. By the end of this course, you should be able to identify potential application domains for recommendation systems, design recommendation systems, identify potential strengths and weaknesses of a recommendation model, and compare design alternatives.</p> |        |                       |           |         |

## Study programme competences

| Code | Study programme competences  |
|------|--|
| A27  | CE27 - Compresión e dominio de fundamentos e técnicas básicas para a procura e o filtrado de información en grandes coleccións de datos.   |
| B2   | CB2 - Que os estudantes saiban aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo |
| B3   | CB3 - Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da súa área de estudo) para emitir xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética                                  |
| B4   | CB4 - Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como non especializado  |
| B7   | CG2 - Elaborar adecuadamente e con certa orixinalidade composicións escritas ou argumentos motivados, redactar plans, proxectos de traballo, artigos científicos e formular hipóteses razoables.   |
| B8   | CG3 - Ser capaz de manter e estender formulacións teóricas fundadas para permitir a introdución e explotación de tecnoloxías novas e avanzadas no campo.   |
| B9   | CG4 - Capacidade para abordar con éxito todas as etapas dun proxecto de datos: exploración previa dos datos, preprocesado, análise, visualización e comunicación de resultados.  |
| B10  | CG5 - Ser capaz de traballar en equipo, especialmente de carácter multidisciplinar, e ser hábiles na xestión do tempo, persoas e toma de decisións.  |
| C1   | CT1 - Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.  |
| C4   | CT4 - Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.  |

| Methodologies                   |  |
|---------------------------------|--|
| Methodologies                   | Description  |
| Laboratory practice             | Classes dedicated to the development of practical work involving the resolution of complex problems, and the analysis and design of solutions that constitute a means for their resolution. This activity may require students to present their work orally. The work carried out by the students can be done individually or in work groups   |
| Guest lecture / keynote speech  | Oral exposition complemented with the use of audiovisual media and the introduction of some questions directed to the students, with the purpose of transmitting knowledge and facilitating learning. In addition to the time of oral exposition by the professor, this formative activity requires the student to dedicate some time to prepare and review on their own the materials object of the class |
| Mixed objective/subjective test | Final exam   |

| Personalized attention |             |
|------------------------|-------------|
| Methodologies          | Description |
|                        |             |

|                     |  |
|---------------------|--|
| Laboratory practice | <p>Monitoring of the development of the practices in the reserved hours of laboratory and attention to the student in the necessary cases of problems of particular difficulty</p> <p>The individual work of the students will be evaluated.</p> <p>Values of equality will be promoted following current recommendations.</p> |

| Mixed objective/subjective test | A27 B2 B3 B4 B7 B8<br>C4 | Final exam                              | 50            |
| Laboratory practice             | B2 B9 B10 C1             | Evaluation of the student's assignments | 50            |

| Assessment comments  |
|--|
| <p>It will be necessary to reach 40% of the score in each part.</p> <p>The evaluation will be considered as not presented when no practical work or final exam is not submitted.</p> <p>Second opportunity</p> <p>The evaluation will be carried out with the same criteria described above. A new deadline will be opened for the delivery of the practical works, in the event that they are not delivered at the first opportunity.</p> <p>- The fraudulent performance of tests or evaluation activities, once verified, will directly imply the qualification of fail in the call in which it is committed: the student will be graded with "suspense" (numerical note 0) in the corresponding call of the academic year, whether the commission of the foul occurs on the first opportunity or on the second. To do this, her rating will be modified in the first opportunity report, if necessary.</p> |
