General description	The basic intentions that support the development of the subject are to delve into the medium-high level architecture					
	project, using the experiences and knowledge acquired also in other disciplines. It is also about promoting the					
	understanding that the project is part of a complex process that the student has to analyze and develop, synthesizing					
	previous stages of learning together with a personal process of continuous research.					
	The course studies the problems posed by intervention in the city, both in its consolidated and peripheral areas, with					
	coherent and free projects, penetrating the authentic lesson that knowledge of the past and the needs of the present-future					
	provides us, to revitalize the urban structure, understanding urban built space as the place where social relationships,					
	coexistence and human habitation develop.					
	The course has a unitary entity that focuses on the study of the place, with the basic objective of elaborating and					
	developing the theme of collective housing, the raison d'être of the construction of the city. For this, the analysis and					
	resolution of significant urban spaces are contemplated, the collective housing itself, in all its variants, and the public					
	building or equipment as a complement to both specifically and to the city in general.					

	Study programme competences / results
Code	Study programme competences / results
A1	"Ability to apply graphical procedures to the representation of spaces and objects (T) "
A2	Ability to conceive and represent the visual attributes of objects and master proportion and drawing techniques, including digital ones (T)
A7	"Knowledge of the principles of general mechanics, statics, mass geometry and vector and tensor fields, adapted and applied to
	architecture and urbanism "
A10	"Knowledge of basic topography, hypsometry, mapping and earthmoving techniques adapted and applied to architecture and
	urbanism "
A18	Ability to maintain building structures, foundations and civil works
A19	Ability to maintain the finished work
A20	Ability to assess the construction works
A25	Adequate knowledge of conventional construction systems and pathology
A30	Knowledge of the organization of professional offices
A34	Ability to design, implement and develop sketches and drafts, concept designs, developed designs and technical designs (T)
A35	Ability to design, implement and develop urban projects (T)
A37	Ability to develop functional programs for buildings and urban spaces (T)
A38	" Ability to take part in the preservation, restoration and renovation of the built heritage (T) "

A39	Ability to remove architectural barriers (T)
A40	Ability to practise architectural pathers (1)  Ability to practise architectural criticism
A40 A41	Ability to solve the passive environmental conditioning, including thermal and acoustic insulation, climate control, energy efficiency and
A41	
A 40	natural lighting (T)  Ability to cotal growths built and urban beritage and plan its protection (T)
A42	Ability to catalogue the built and urban heritage and plan its protection (T)
A43	Ability to carry out safety projects, evacuation and protection in buildings (T)
A44	Ability to develop civil work projects (T)
A45	Ability to design and execute urban layouts and urbanization, gardening and landscape design projects (T)
A46	Ability to apply standards and urban regulations
A51	Adequate knowledge of the methods of studying the social requirements, living conditions, habitability and basic housing programmes
A52	"Adequate knowledge of ecology, sustainability and the principles of conservation of energy and environmental resources. "
A53	Adequate knowledge of the architectural, urban and landscape traditions of Western culture, as well as their technical, climatic, economic,
	social and ideological foundationsxicos.
A57	Adequate knowledge of urban sociology, theory, economics and history
A58	Adequate knowledge of the methodological foundations of territorial, metropolitan and urban planning.
A60	Knowledge of the legal framework in terms of civil laws, administration, planning, construction and building industry according to the
	professional pratice
A63	Development, presentation and public review before a university jury of an original academic work individually elaborated and linked to any
	of the subjects previously studied
B2	Students can apply their knowledge to their work or vocation in a professional way and have competences that can be displayed by means
	of elaborating and sustaining arguments and solving problems in their field of study
В3	Students have the ability to gather and interpret relevant data (usually within their field of study) to inform judgements that include
	reflection on relevant social, scientific or ethical issues
B4	Students can communicate information, ideas, problems and solutions to both specialist and non-specialist public
B5	Students have developed those learning skills necessary to undertake further studies with a high level of autonomy
B6	Knowing the history and theories of architecture and the arts, technologies and human sciences related to architecture
B9	Understanding the problems of the structural design, construction and engineering associated with building design and technical solutions
B10	Knowing the physical problems, various technologies and function of buildings so as to provide them with internal conditions of comfort
	and protection against the climate factors in the context of sustainable development
B11	"Knowing the industries, organizations, regulations and procedures involved in translating design concepts into buildings and
	integrating plans into planning "
B12	Understanding the relationship between people and buildings and between these and their environment, and the need to relate buildings
	and the spaces between them according to the needs and human scale
C1	Adequate oral and written expression in the official languages.
СЗ	Using ICT in working contexts and lifelong learning.
C4	Exercising an open, educated, critical, committed, democratic and caring citizenship, being able to analyse facts, diagnose problems,
	formulate and implement solutions based on knowledge and solutions for the common good
C5	Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C6	Critically evaluate the knowledge, technology and information available to solve the problems they must face
C7	Assuming as professionals and citizens the importance of learning throughout life
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

Learning outcomes	
Learning outcomes	Study programme
	competences /
	results

Upon passing this subject, the student must be able to:	A1	B2	C1
	A2	В3	С3
-Develop projects of medium complexity, in which the compositional, spatial, technical and functional requirements inherent in	A7	B4	C4
architectural and urban design are adequately met.	A10	B5	C5
	A18	В6	C6
-Integrate within the compositional process and architectural proxectación the learning of the subjects of technological and	A19	В9	C7
urban profile, with a methodology that allows the practical application of the theoretical contents of all of them in a project of	A20	B10	C8
medium complexity.	A25	B11	
	A30	B12	
-Use the content of the HOUSING II teaching block. Regulations, standards. The neighborhood and urban space, solving	A34		
housing management projects that allow a global vision of the circumstances that make up the complex relationships that exist	A35		
in a PLACE. The change of scale with respect to previous semesters and the breadth of the work to be carried out requires the	A37		
use of experiences and knowledge acquired in other disciplines, as well as in the daily life of students. Also, other elements of	A38		
knowledge appear, such as fieldwork and interviews with residents that promote research proposals adapting to the needs of	A39		
its inhabitants. The workshop work is located in urban transition spaces or villas. Different types of housing are projected that	A40		
respond to different social groups, family organizations or alternative ways of living. The projects develop at the basic project	A41		
level and will advance towards the execution project, from initial ideas to more detailed elaboration, including the definition of	A42		
their materials and their construction and the incorporation, design and dimensioning of structural elements. It works with the	A43		
rules on habitability, removal of barriers, evacuation criteria, technical code and urban regulations.	A44		
	A45		
	A46		
	A51		
	A52		
	A53		
	A57		
	A58		
	A60		
	A63		

Contents				
Topic	Sub-topic			
HOUSING II	- Types of housing: single-family, free groups, groups of official protection, other types			
	- Housing and economy			
	- Accessibility criteria			
	- Spatial flexibility			
	- Private and shared areas			
	- Children's play spaces			
	- Exterior and interior transit areas			
	- Storage spaces			
	- Work areas			
	- The needs of daily life			
	- Housing and urban plot			
PUBLIC BUILDINGS II	- Cultural, educational, sports, social or civic facilities.			
	- Endowment typologies			
	- Social and community spaces			
	- Comprehensive treatment of the areas			

REGULATION II	- Local, state and regional regulations	
	- Town planning regulations	
	- Regulations for removing architectural barriers	
	- Regulations for public promotion and official protection in collective housing.	
	- Technical building Code.	
EXERCISES	- Collective housing and adaptation of its use by different social groups and types of	
	coexistence.	
	- Urban provisioning public buildings and equipment

	Methodologies
Methodologies	Description

Workshop	Training modality oriented to the application of learning in which knowledge of various subjects is introduced, always around
	an architectural project, where various methodologies / tests can be combined (exhibitions, simulations, debates, problem
	solving, guided practices, etc.) through which the students develop practical tasks on a specific subject, with the support and
	supervision of the teachers of the subjects involved.
Objective test	Written test used for learning assessment, whose distinctive feature is the possibility of determining whether or not the
	answers given are correct. It constitutes a measuring instrument, rigorously elaborated, that allows to evaluate knowledge,
	capacities, skills, performance, aptitudes, attitudes, intelligence, etc. It is applicable to both diagnostic, formative and additive
	evaluation. The objective test can combine different types of questions: multiple choice, ranking, short answer, discrimination,
	completion and / or association questions. It can also be built with just one type of any of these questions.
Field trip	Activities developed in a context external to the university academic environment (companies, institutions, organizations,
	monuments, etc.) related to the field of study of the subject. These activities focus on the development of capacities related to
	direct and systematic observation, information gathering, the execution of sketches, photographs, sketches, designs, etc.
Introductory activities	Activities that are carried out before starting any teaching-learning process in order to know the competences, interests and /
	or motivations that the students possess to achieve the objectives that they want to achieve, linked to a training program. The
	aim is to obtain relevant information that allows teaching to be articulated to promote effective and meaningful learning, based
	on prior knowledge.
Directed discussion	Group dynamics technique in which the members of a group discuss freely, informally and spontaneously on a topic, although
	they may be coordinated by a moderator.
Diagramming	It consists of a synthesis of the main contents worked on. It is an optimal resource to facilitate the understanding of reality and
	/ or text and personal concentration on the material under study. It is also an important aid for reviewing and preparing for
	exams.
Workbook	They are a set of texts and written documentation that constitute a source of deepening in the contents worked on.
Multiple-choice	Objective test that consists of formulating a question in the form of a direct question or an incomplete statement, and several
questions	options or answer alternatives that provide possible solutions, of which only one is valid.
Guest lecture /	Oral presentation complemented by the use of audiovisual media and the introduction of some questions for students, in order
keynote speech	to transmit knowledge and facilitate learning. The magisterial session is also known as a lecture, expository method, or
	magisterial lesson. This last modality is usually reserved for a special type of lesson given by a teacher on special occasions,
	with content that involves original elaboration and based on the almost exclusive use of the word as a way of transmitting
	information to the audience.

Personalized attention					
Methodologies	Description				
Objective test	The student receives personalized attention regarding the work he is developing in the subject and in the Workshop, through				
Workshop	the teacher of the group to which he was assigned. In the Workshop, in addition, you will have the possibility to comment and				
	obtain critical reviews from the teachers of the other groups and subjects, in order to contrast opinions and criteria and				
	confront them with your own.				
	The student's portfolio will be subject to personalized reviews, to observe their evolution and verify their authorship.				

	Assessment				
Methodologies	Competencies /	Description	Qualification		
	Results				
Objective test	A34 A35 A37 A38	The instrumental knowledge contained in the syllabus of expository teaching,	20		
	A39 A40 A43 A44	theoretical and practical of the course will be evaluated through an objective test.			
	A45 A46 A51 A52				
	A53 B2 B3 B11				

Workshop	A1 A2 A7 A10 A18	The final result of the work carried out on the subject will be reflected in the student's	80
	A19 A20 A25 A30	personal, physical and digital portfolio, physically available on paper and accessible	
	A34 A35 A37 A38	through the Moodle teaching computer tool.	
	A39 A41 A42 A43		
	A44 A45 A46 A51	The results will be evaluated, but through a supervised and guided teaching process,	
	A52 A53 A57 A58	where the student's personal effort and intellectual evolution must be reflected in the	
	A60 A63 B2 B3 B4 B5	final documentation.

## **Assessment comments**

In order to pass the subject it will be necessary to meet the following requirements:10 Deliver all of the proposals to the proposals and forms indicated in the subjects involved, not Workshop.20 Regularly attend the classes and workshop. You would choose a minimum attendance of 80%3rd Facer to obxective proof

Terá on condition of NON PRESENTED or / to a student who runs into any of the following circumstances:1º Do not comply with assistance from the classes or the Workshop.2º Do not deliver the proposals in the form of the estate, or do not submit them incomplete. Those horses that do not contain the required documentation in all the subjects that compose or Workshop will be considered incomplete.3º Do not attend the mandatory test. In accordance with the report established in the Bachelor's Degree in Architecture, a Workshop Assessment Council will be convened, which will analyze the overall results of the same and will decide, not in its case, on the special situations of student assessment.

When you do not pass the subject at the first opportunity, you will be allowed to complete and modify the work presented at the workshop, as long as it is completed with minimum attendance, all the work delivered of all subjects involved at the workshop and at the mandatory test of the first opportunity. To pass the subject, in this case, and the compulsory completion of the objective test of the second opportunity.

Students who do not exceed in any of these days opportunities in the subject of Proxectos 7 must attend either a workshop or the following year. In this case, the students, in addition to Proxectos 7, will unravel your work on subjects that you would not have passed the workshop of the previous year.

Those students who, once passed the subject of Proxectos 7, will not pass some other subjects of the workshop, will have to present, in consecutive calls, de novo e coas opportune corrections, the non-workshop proposals that did not participate.
