Identifying Data				2023/24		
Subject (*)	Management of Safety, Quality and Maritime Environment		Code	631G01315		
Study programme	Grao en Náutica e Transporte Marítimo					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	2nd four-month period	Third	Optional	6		
Language	Spanish/Galician					
Teaching method	Face-to-face					
Prerequisites						
Department	Ciencias da Navegación e Enxeñaría Mariña					
Coordinador	Cao Feijóo, Genaro	E-mail	genaro.cao@udc.es			
Lecturers	Cao Feijóo, Genaro	E-mail	genaro.cao@udc.es			
Web						
General description	This subject will emphasize knowledge of the legal framework so that students can understand what is based on adequate management of safety on board and the protection of the marine environment. For this, it will be studied in detail the regulations that concern the management of safety, quality and the environment in the maritime field. At the same time, the criteria and techniques of quality management will be applied and environmental sustainability in maritime transport.					

Study programme competences	
Code	Study programme competences
A54	RA1C-Write, explain and transmit the theoretical knowledge acquired both orally and in writing using scientific-technical language.
A55	RA2C-Identify and relate acquired knowledge to other disciplines
A57	RA4C-Collecting and interpreting relevant data
A58	RA5C-Identify ship components.
A59	RA6C-Identify critical situations and use available means in order to resolve them effectively.
A64	RA112C-Gather objective information in personal interviews
A65	RA116C-Know the national and international regulations applicable to activities related to maritime transport and port operations.
B32	RA10H-Know, analyse, synthesise and apply the contents, fundamental concepts and applications of the subject.
B33	RA11H-Develop both individual and group work
B34	RA12H-Handle bibliographic material and computer resources.
B35	RA13H-Handle with ease the tools, techniques, equipment and/or material/instrumental of each subject.
B107	RA121H-Know and apply the regulations and techniques in matters of maritime transport safety management and protection of the marine environment.
C15	RA17X-Communicating effectively in a work environment.
C16	RA18X-Reviewing compliance with maritime legislative requirements
C17	RA19X-Promote appropriate health and hygiene habits and encourage the interest and cooperation of workers in integrated preventive action.
C40	RA114X-Drafting technical reports.
C41	RA115X-Managing, directing and controlling companies and activities related to the maritime field.
C43	RA118X-Plan and report on inspections, internal and external audits.

Learning outcomes		
Learning outcomes	Study programme competences	
RA1C-Write, explain and transmit the theoretical knowledge acquired both orally and in writing using scientific-technical language.	A54

Methodologies	
Methodologies	Description
Objective test	Final exam
Supervised projects	Projects carried out by students (individuals and/or in groups) regarding two contents of the subject. Throughout the four-month period, one or several assignments will be provided around two contents of the agenda that must be based on the basic and complementary bibliography of the guide and with another selected by the teaching staff and/or student pole. Its realization will begin in the classroom and be completed through the autonomous work of the students, attending more indications provided through the differentiation of teachers. Through the exhibition in the classroom, the work done will be shared.
Oral presentation	On the supervised projects
Guest lecture / keynote speech	In the activity of the lecture guest, the contents that make up the theoretical framework will be worked on through oral presentation, guided by the use of presentations, audiovisual media and with the introduction of directed questions to the students with the purpose of favouring learning and the construction of knowledge. There will be an introductory general exposition of each one of the two different themes of which the program consists, indicating the aspects that the students should expand with their personal work, with the appropriate orientations bibliographic.

Personalized attention	
Methodologies	Description

Oral presentation	A atención personalizada que se describe en relación a estas metodoloxías concíbese como momentos de traballo có profesor da materia.
Objective test	
Supervised projects	

Assessment				
Methodologies	Competencies	Description	Qualification	
Oral presentation	A54 B33 B35 C15	To evaluate the presentation, it will be evaluated: - Relevance and organization of the exposed contents. - Coordination of the presentation (reflecting collaborative work, not a sum of parts). - Level of understanding of the basic contents. - Clear explanation	10	
Objective test	A55 A58 A65 B32 B107	The evaluation criteria referred to in Table A-II/1 of the STCW Code, and collected in the Quality Assurance System, will be taken into account when designing and carrying out the evaluation.	60	
Supervised projects	A54 A57 A59 B32 B33 B34 B35	To evaluate the projects it will be taken into account: - Structure: presentation, content organization, clear explanation and grammar. - Content: Understanding of basic ideas, conceptual mastery, use of the sources worked on in the treatment of content throughout the semester and relationships between them.	20	
Guest lecture / keynote speech	A55 A58 A64 A65 B107 C16 C17 C40 C41 C43	The evaluation criteria referred to in Table A-II/1 of the STCW Code, and collected in the Quality Assurance System, will be taken into account when designing and carrying out the evaluation.	10	

Assessment comments

- STCW Convention 2010: The evaluation criteria referred to in Table A-II/1 of the STCW Code, and collected in the Quality Assurance System, will be taken into account when designing and carrying out the evaluation.
- To pass the subject following the continuous evaluation it is necessary to pass each methodology. in-session lecture, at the same time as class attendance (minimum of 80%), the student participation will be valued too. Students who do not follow the continuous assessment will always have the option of taking the objective test. Consequently, under this circumstance, this will have a value in the evaluation of 100%.
- Students with recognition of part-time dedication and the corresponding academic waiver that provide the assistance exemption, as established in the "RULE THAT REGULATES THE DEDICATION REGIME TO THE STUDY OF UNDERGRADUATE STUDENTS AT UDC (Articles 2.3; 3.b; 4.3; 6.b and 7.5) (05/04/2017) may carry out the partial tests, if any, without the need to attend 80% of the face-to-face classes, as long as the teacher is duly informed at the beginning of the course. Notwithstanding the foregoing, the professor can entrust these students with different works (individual and/or in groups) throughout the course to be presented in the tutorial schedule in order to score in the continuous evaluation the proportional part of the value of the master session.
- About the sanctions applicable for de commission of serious offenses, article 11 of the Disciplinary Regulations of de student body of the University of A Coruña, approved by the Governing Council on 27/02/2023, point b) was amende in june 2023, to read:
 - b) Qualification of suspense in the call in which the fault it was committed, the student will be graded with ?fail? (numerical grade 0) in the corresponding call of the academic year, wheter the commission of the fault occurs at the first opportunity or at the second. For this, we will proceed to modify his qualification in the minutes of the first opportunity, if necessary.

Other comments

?As stated in the different regulations of application
for university teaching, the gender perspective must be incorporated in this
matter (Non-sexist language will be used, bibliography of authors of both sexes
will be used, te intervention in class of students will be encouraged. Work will be done to identify and modify prejudices
and sexist attitudes and will influence the environment to modify them and
promote values of respect and equality. Situations of discrimination based on gender should be
detected and actions and measures proposed to correct them?.
