| General description | <p>Augmentative and Alternative Communication systems (AAC systems) is an optional subject aimed to endow the future ordinary education teacher with a toolbox kit of augmentative and alternative communication strategies. The ultimate goal of AAC strategies is to facilitate access to communication, and to facilitate access to the ordinary or adapted curriculum for those disabled students with educational special needs with severe speech impairments who produce a limited amount of speech or lack it. The use of AAC systems based either in objects, pictograms, Blissymbolics, PIC, orthography or manual signs, together with the use of low and high assistive technology options, alternative access and special communication and writing programs are the basic tools for students with disabilities to learn and participate at school.</p> |        |                          |           |         |

## Study programme competences / results

| Code | Study programme competences / results  |
|------|--|
| A3   | Dominar os coñecementos necesarios para comprender o desenvolvemento da personalidade destes estudantes e identificar disfuncións.   |
| A4   | Identificar dificultades de aprendizaxe, informais e colaborar no seu tratamento.  |
| A6   | Identificar e planificar a resolución de situacións educativas que afectan a estudantes con diferentes capacidades e distintos ritmos de aprendizaxe.  |
| A11  | Coñecer os procesos de interacción e comunicación na aula.   |
| A13  | Promover o traballo cooperativo e o traballo e esforzo individuais.  |
| A17  | Coñecer e aplicar experiencias innovadoras en educación primaria.  |
| A30  | Desenvolver e avaliar contidos do currículo mediante recursos didácticos apropiados e promover a adquisición de competencias básicas nos estudantes.   |
| B1   | Aprender a aprender.   |
| B2   | Resolver problemas de forma efectiva.  |
| B6   | Comportarse con ética e responsabilidade social como cidadán e como profesional.   |
| B11  | Capacidade de comprensión dos distintos códigos audiovisuais e multimedia e manexo das ferramentas informáticas.   |
| B12  | Capacidade de selección, de análise, de avaliación e de utilización de distintos recursos na rede e multimedia.  |
| B14  | Capacidade para traballar en equipo de forma cooperativa, para organizar e planificar o traballo, tomando decisións e resolvendo problemas, tanto de forma conxunta como individual.   |
| B16  | Capacidade crítica e creativa na análise, planificación e realización de tarefas, como froito dun pensamento flexible e diverxente.  |
| B18  | Compromiso ético para o exercicio das tarefas docentes.  |
| B21  | CB1 - Que os estudantes demostrasen posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeneral, e se adoita encontrar a un nivel que, se ben se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vangarda do seu campo de estudo |
| B22  | CB2 - Que os estudantes saiban aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo   |

|     |  |
|-----|--|
| B23 | CB3 - Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da súa área de estudo) para emitir xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética              |
| B24 | CB4 - Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como non especializado  |
| B25 | CB5 - Que os estudantes desenvolvesen aquelas habilidades de aprendizaxe necesarias para emprender estudos posteriores cun alto grao de autonomía  |
| C3  | Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.  |
| C4  | Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común. |
| C7  | Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.   |

| Learning outcomes  |  |   |                |
|--|--|---|----------------|
| Learning outcomes  | Study programme competences / results      |   |                |
| To know, respect and value the different groups of students that may benefit from alternative and augmentative communication systems.  | A3<br>A4<br>A6                             | B1<br>B18                                     | C4             |
| To know the symbolic and non-symbolic options as well as to know and to develop augmentative and alternative communication assistive technology options and to know its role as systems of access to the curriculum. | A3<br>A4<br>A6<br>A11<br>A13<br>A17<br>A30 | B11<br>B12<br>B14<br>B18                      | C3<br>C4<br>C7 |
| To recognize the different barriers to communication and participation in the classroom and within the school environment and to know how to intervene to eliminate them.  | A6<br>A11<br>A13<br>A17                    | B14<br>B18                                    | C4             |
| To master the process of teaching and applying alternative and augmentative communication systems in the school environment.   | A17<br>A30                                 | B14<br>B16<br>B21<br>B22<br>B23<br>B24<br>B25 | C3<br>C4<br>C7 |
| To value and respect alternative communication modalities, insofar as these may constitute the main form of language for people with speech impairments  |  | B2<br>B6<br>B18                               | C4             |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies                  |   |
|--------------------------------|---|
| Methodologies                  | Description   |
| Guest lecture / keynote speech | Face to face presentation of augmentative and alternative communication program contents for each topic.  |
| Supervised projects            | Students organized in small working groups will hand out the teacher all the required materials that are the product of procedural learning activities: communication boards and overlays, PECS book, aided technology catalogue, literacy learning materials, adaptive didactic unit, and assessment materials and materials for successful participation at school of students with special needs. Supervised projects compute in the evaluation. |
| Events academic / information  | Attendance to programmed scientific-information academic events for this subject is compulsory.<br>A professional from the assistive technology AAC area is invited to virtually show AAC software.   |
| Workshop                       | Practical learning about the specific topic of unaided AAC systems (manual alphabet, manual sign systems, and cued speech) will be carried out by students with the lecturer's assistance and supervision.  |
| Collaborative learning         | Students will be organized into small groups; groups will work together to solve task assigned by the teacher. Students will be guided either personally or using information and communication technologies.   |
| Simulation                     | Students will be presented with hypothetical situations, similar to those they will encounter as professionals in the educational environment, regarding the application of augmentative and alternative communication systems.   |

|                |   |
|----------------|---|
| Objective test | The students' learning will be evaluated continuously. Students, throughout the course, will have to pass objective tests of the contents (of part of the topics or of the whole topics). Objective tests will consist of true-false, multiple-choice and short-answer questions. Tests will be taken through Moodle. |
|----------------|---|

### Personalized attention

| Methodologies  | Description   |
|--|---|
| Guest lecture /<br>keynote speech<br>Supervised projects | Personalized or virtual attention will be given through out the four-month period to students in scheduled time for trouble-shooting regarding any theoretical or practical doubt of the subject.<br><br>Likewise, the lecturer will virtually counsel students on any matter related to the preparation of supervised projects, or on any question that may arise during practices, workshops, and so. |

### Assessment

| Methodologies       | Competencies /<br>Results      | Description  | Qualification |
|---------------------|--------------------------------|--|---------------|
| Supervised projects | A13 A30 B14 B16<br>B22 B23 B24 | The acquisition of "knowing-how to" procedures is valued through the delivery of supervised projects. Supervised projects will be hand out by small working groups to the teacher, properly identified and in duly time, in order to assess procedural learning regarding interactive lessons contents. Supervised projects compute 50% of the final mark. | 50            |
| Objective test      | A6 A17 B2 B11 B21              | The objective tests are aimed to continuously assess the students' learning of this subject contents. These objective tests consist of a combination of true-false, multiple choice and brief answer questions to be taken through Moodle.   | 50            |

### Assessment comments

|  |
|--|
| <p>In order to pass the subject, students must take and pass all the continuous evaluation programmed objective tests. In addition, all supervised projects need to be presented. Academic exemption is admitted. These students will necessarily have to inform in a virtual meeting about this situation to the lecturer. This will be communicated at the beginning of the course to receive the corresponding guidelines. The same requirements to pass this subject will be applied to these students; they will have to take the exam on the official date and deliver the same supervised projects.</p> <p>With regard to the commission of fraud in the tests or assessment activities, once it has been proven, it will directly imply the qualification of failure in the exam session in which it is committed: the student will be graded with a "fail" (numerical grade 0) in the corresponding call of the academic year, whether the fault is committed at the first or second opportunity. To this end, the student's grade will be modified in the first opportunity report, if necessary".</p> |
|--|

**Recommendations**

**Subjects that it is recommended to have taken before**

**Subjects that are recommended to be taken simultaneously**

**Subjects that continue the syllabus**

**Other comments**

Non-assisted communication systems practice is recommended from the very beginning of the course. It is also recommended to carry out the scheduled tasks and deliver them within the established deadlines.

(\*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
