

Teaching Guide						
Identifying Data				2023/24		
Subject (*)	Auxiliary Equipment in Building		Code	670G01127		
Study programme	Grao en Arquitectura Técnica					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	2nd four-month period	Third	Obligatory	6		
Language	Spanish					
Teaching method	Non-attendance					
Prerequisites						
Department	Construccións e Estruturas Arquitectónicas, Civís e Aeronáuticas					
Coordinador	Fernandez Prado, Ruben	E-mail	ruben.fprado@udc.es			
Lecturers	Fernandez Prado, Ruben Porta Rodriguez, Manuel	E-mail	ruben.fprado@udc.es m.porta@udc.es			
Web						
General description	Conocimiento de aquellos elementos necesarios para llevar a cabo el proceso constructivo, de uso temporal pero que sin embargo no forman parte del edificio terminado. Maquinaria y equipos de obra para los distintos oficios y sistemas constructivos. Andamios, apuntalamientos y apeos. Sistemas de encofrados. Sistemas de elevación de cargas y personas. Maquinaria de movimiento de tierras. Organización de equipos, maquinaria e instalaciones generales de obra. A guía docente oficial é a de Español.					

Study programme competences	
Code	Study programme competences
A56	A3.1 Ability to apply building rules and standards, and draw up technical specifications in relation to building methods and procedures.
A62	A4.1 Ability to plan and organise construction processes, equipment, and human and technical resources to carry out construction and maintenance work.
B31	B1 Students will demonstrate knowledge and understanding of subjects that build upon the foundation of a general secondary education using advanced textbooks and ideas and analyses from the cutting edge of their field.
B32	B2 Students will be able to use their knowledge professionally and will possess the skills required to formulate and defend arguments and solve problems within their area of study.
B33	B3 Students will have the ability to gather and interpret relevant data (especially within their field of study) in order to make decisions and reflect on social, scientific and ethical matters.
B34	B4 Students will be able to communicate information, ideas, problems and solutions to specialist and non-specialist audiences alike.
B35	B5 Students will develop the learning skills and autonomy they need to continue their studies at postgraduate level.
C1	Adequate oral and written expression in the official languages.
C3	Using ICT in working contexts and lifelong learning.
C4	Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C5	Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C6	Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.
C9	Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and accomplishing them.

Learning outcomes	
Learning outcomes	Study programme competences

Al finalizar con éxito esta asignatura, los estudiantes serán capaces de organizar, seleccionar, controlar e inspeccionar, conocer partes y características, proyectar, calcular, planificar y diseñar la implantación en obra, de los equipos, maquinaria y medios auxiliares necesarios para la ejecución de edificaciones. Realizar proyectos de implantación de grúa torre, de apeos y apuntalamientos, de demolición y planes de instalación de andamios.	A56 A62	B31 B32 B33 B34 B35	C1 C3 C4 C5 C6 C7 C8 C9

Personalized attention		2	0	2

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral and graphic exhibition on blackboard and support of audiovisual media with specific insertion of invitation to the students to comments and debate to appreciate points of view and facilitate learning.
Supervised projects	Practices will be carried out during the interactive sessions, complemented with the use of computer resources so that the student can solve in person the problems proposed by the teacher.  There will be 4 types of projects: scaffolding project (plan), demolition project (application + traditional), shoring project and tower crane implementation project, as a team, which will begin in the interactive classes and will be completed at home, also as a team.  The projects proposed by the professor will be presented publicly in the interactive sessions.
Events academic / information	There will be one or several outings to work or there will be an attendance to a conference that will be graded according to the attendance, the active participation of the student or the presentation of a work related to it.
Objective test	Individual written test that integrates open questions of both theory and problem solving. In addition, with regard to objective questions, you can combine multiple-choice, ordering, short answer, discrimination, completion and / or association questions.  The resolution of practical exercises may also be proposed.

Personalized attention	
Methodologies	Description
Objective test	In-office tutorials during the academic period of the course, at the request of the student or teacher.
Guest lecture / keynote speech	The personalized attention will not substitute in any case to the expository sessions or the interactive sessions exposed during the course, but it will serve as complement and support to the student in those matters in which, in spite of having made reasonable attempts to solve it, it does not reach assimilate the concept.
Supervised projects	
Events academic / information	The student must request a prior appointment for tutorials by mail.

Assessment			
Methodologies	Competencies	Description	Qualification
Objective test	A56 A62 B31 B32 B33 B34 B35 C1 C3 C4 C5 C6 C7 C8 C9	Individual written test that integrates open questions of both theory and problem solving. In addition, with regard to objective questions, you can combine multiple-choice, ordering, short answer, discrimination, completion and / or association questions. The resolution of practical exercises may also be proposed.	70

Guest lecture / keynote speech	A56 A62 B31 B32 B33 B34 B35 C1 C3 C4 C5 C6 C7 C8 C9	Oral and graphic exhibition on blackboard and support of audiovisual media with specific insertion of invitation to the students to comments and debate to appreciate points of view and facilitate learning.  The minimum compulsory attendance will be 80% of the expository classes to qualify for the qualification.	2
Supervised projects	A56 A62 B31 B32 B33 B34 B35 C1 C3 C4 C5 C6 C7 C8 C9	The 4 projects presented will be evaluated, both in their development part and the oral presentation of them in the interactive sessions.	27
Events academic / information	A56 A62 B31 B32 B33 B34 B35 C1 C3 C4 C5 C6 C7 C8 C9	The attendance will be essential, the active involvement of the student in the activity will be valued, and in his case, the teacher will be able to request a work about the subject matter for its qualification.	1

**Assessment comments**

Para superar la materia es obligatorio obtener una calificación de 5 sobre 10 en la prueba objetiva, que computará el 70% sobre la calificación final. La calificación obtenida en la resolución de los proyectos propuestos, entregados y defendidos en presentación oral durante las clases interactivas constituirá el 27% de la calificación final.

La participación activa en las sesiones magistrales computará el 2% de la nota final y la asistencia a conferencias (o salida al campo) computará el 1% según su aprovechamiento.

Podrán presentarse a la prueba objetiva (tanto en la primera oportunidad como en la segunda) todos los alumnos.

Si la prueba objetiva no ha sido aprobada la calificación final de la asignatura será la obtenida en el examen computando al 100%.

No se corregirá ninguna prueba objetiva que no se firme ni se cubran todos los datos personales.

El alumno que no asista a las clases prácticas o no realice la prueba objetiva será calificado con "No Presentado".

Los trabajos prácticos tendrán validez solamente para el curso en vigor.

Los alumnos con dispensa académica deberán realizar la prueba objetiva que computará al 100% de la calificación.

En la segunda oportunidad solamente se tendrá en cuenta para la calificación de la asignatura la calificación obtenida en el examen.
