General description					

	Study programme competences / results
Code	Study programme competences / results
А3	To develop competencies for interpersonal relations and interaction with external and internal stakeholders (customers, suppliers, media, partners?)
A9	To master the logistics process of a fashion firm from a global perspective, from procurement to manufacturing and transportation, with a
	special focus on the typical textile industry processes: selection of materials and fabrics, patternmaking, manufacturing, etc, ?
A13	To know the impact of technology on the different processes of the textile industry
B1	That students demonstrate that they acquired and understood knowledge in a study area that originates from general secondary education
	and that can be found at a level that, though usually supported by advanced textbooks, also includes aspects implying knowledge from the avantgarde of its field of study
B2	That students know how to apply their knowledge to their job or vocation in a professional form, and have the competencies that are
	usually demonstrated through elaboration and advocacy of arguments and problem resolution within their field of study
В3	That students have the capacity to collect and interpret relevant data (normally within their field of study) in order to issue judgements that
	include a reflection upon relevant topics in the social, scientific or ethical realm
B4	That students may convey information, ideas, problems and solution to the public, both specialized and not
B5	That students develop those learning skills that are needed to undertake ulterior studies with a high degree of autonomy
B8	Capacity to plan, organize and manage resources and operations
В9	Capacity to analyse, diagnose and take decisions
C2	Mastering oral and written expression in a foreign language.
C3	Using ICT in working contexts and lifelong learning.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable
	environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.
C9	Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and accomplishing them.

Learning outcomes	
Learning outcomes	Study programme
	competences /
	results

To know the basic concepts of operations management	А3	B1	C2
	A9	B2	C7
	A13	В3	C8
		B4	
		B5	
		B8	
		В9	
To know how to solve problems related to operations management	A9	B1	С3
	A13	B2	C7
		В3	C9
		B4	
		B8	
		В9	
To become familiar with the technologies used in the operations management area	A3	B2	C2
	A9	В3	С3

		B9	C9

Contents		
Topic	Sub-topic Sub-topic	
Process design and capacity planning.	Introduction to operations strategy. Productivity. Capacity and utilization. Long term	
	capacity planning. Queuing models.	
Quantitative methods for operations management.	Linear optimization. Non linear problems. Solver. Metaheuristics. Modelling and	
	simulation.	
Inventory management.	Basic concepts. Types. ABC classification.	
Inventory costs.	Carrying costs. Ordering costs. Opportunity costs.	
Inventory models.	Methods based on the Economic Quantity Order. Safety stocks. Continuous and	
	periodic review policies. Methods based on the Newsvendor model.	
Project management.	Tasks. Resources. Costs.	
Schedulling.	Single server schedulling. Parallel servers. Flow line schedulling. Priorities.	
Quality Management.	ISO 9001. Six sigma methodology.	
Lean Enterprise.	Just in Time. Lean manufacturing. Types of waste. Methods to avoid waste. 5S	
	methodology.

	Methodologies
Methodologies	Description
Guest lecture /	Lectures on the content of this subject
keynote speech	
Supervised projects	Projects to be done as proposed by the teachers
ICT practicals	Solving practical problems with software (Excel, ProjectLibre, Flexsim, QuantumXL)
Problem solving	Solving practical problems
Mixed	Exam on the contents of the subject
objective/subjective	
test	
Practical test:	Examen on the practical contents of the subject that will be solved using a laptop.

	Personalized attention
Methodologies	Description
Supervised projects	During tutorial time, students can meet the teachers to clarify the doubts of the subject, as well as the ones concerning the supervised projects

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		
Practical test:	A3 A9 A13 B1 B2 C3	Practical test using software	30

Mixed	A3 A9 A13 B1 B2 B3	Exam on the theoretical contents of the subject	30
objective/subjective	B5 B9 C2 C9		
test			

**Assessment comments** 

Assessment criteria Second opportunity

The assessment criteria for the first and the second opportunity are the same. The student has a chance to resit the mixed objective/subjective test and the practical test. If the score in any of the two tests in the first opportunity was higher than 4.0, the student does not need to resit that test and its score can be kept for the second opportunity. However, the student cannot resit the supervised projects, guest lectures and ICT practicals because they are evaluated through continuous assessment. Early call

If there were students who wanted to take the early December call (Art. 19 "Standards for evaluation, review and claim of qualifications for undergraduate and master's degree studies"), those students will only have to take the mixed objective/subjective test (35% of the grade), the practical test (40% of the grade) and the supervised project (25% of the grade). The supervised project must be done individually.

As strict requirement to pass the course, both in the first and second opportunity of assessment, it will be necessary to obtain a minimum score of 3.5 points out of 10 in the mixed objective/subjective test and in the practical test. If this requirement is not met, the grade will be ?Fail? regardless of the average score.

'No Presentado' grade

The grade of "No presentado" (no grade) will be given to those students who will not attend the final exam both in the first, second opportunity of assessment as well as in the early call.

Students with recognition of part-time dedication and academic exemption waiver

The students with recognition of part-time dedication and academic exemption waiver must inform the instructor of the course at the beginning of the course, to establish a plan and calendar of activities. The assessment system will be the following one: mixed objective/subjective test (35%), practical test (30%), supervised project (25%), and the ICT Practicals (10%). The student must form a team with other students to develop the supervised project.

Minimum grade

As strict requirement to pass the course, both in the first and second opportunity of assessment, it will be necessary to obtain a minimum score of 3.5 points out of 10 in the mixed objective/subjective test and in the practical test. If this requirement is not met, the grade will be ?Fail? regardless of the average score.

Students must attend at least to 80% of the classes. If this requirement is not

Students must attend at least to 80% of the classes. If this requirement is not met and the average score is 5.0 or higher, the grade will be 4.5 ?Fail?. Additional information

Fraudulent behaviour in any of the parts subject to assessment will result in the grade of "Fail (0)" in the final assessment.

It is forbidden to access the examination room with any device allowing for data transmission and/or warehousing when any of the evaluations is taking place (mobile phones, smartwatches...).

	Other comments
In order to help in the achieve	ement of a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable

In order to help in the achievement of a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan", it will be encouraged, as far as possible, that the delivery of the documentary works in this subject was done in a virtual format and/or computer support, through Moodle and without the need to print them. If paper delivery is necessary, the following guidelines will be followed: Plastics will not be used Double-sided prints will be made Recycled paper will be used The printing of drafts will be avoided
