General description	This subject provides an overview of logistics management in organisations based on the				
	concept of supply chain managem	nent (SCM).			

	Study programme competences / results
Code	Study programme competences / results
A9	To master the logistics process of a fashion firm from a global perspective, from procurement to manufacturing and transportation, with a
	special focus on the typical textile industry processes: selection of materials and fabrics, patternmaking, manufacturing, etc, ?
A13	To know the impact of technology on the different processes of the textile industry
B1	That students demonstrate that they acquired and understood knowledge in a study area that originates from general secondary education
	and that can be found at a level that, though usually supported by advanced textbooks, also includes aspects implying knowledge from the
	avantgarde of its field of study
B2	That students know how to apply their knowledge to their job or vocation in a professional form, and have the competencies that are
	usually demonstrated through elaboration and advocacy of arguments and problem resolution within their field of study
B3	That students have the capacity to collect and interpret relevant data (normally within their field of study) in order to issue judgements that
	include a reflection upon relevant topics in the social, scientific or ethical realm
B4	That students may convey information, ideas, problems and solution to the public, both specialized and not
B5	That students develop those learning skills that are needed to undertake ulterior studies with a high degree of autonomy
B6	Capacity for cooperation, team-work and collaborative learning in interdisciplinary settings
B7	Capacity to analyse trends (critical thinking)
B8	Capacity to plan, organize and manage resources and operations
B9	Capacity to analyse, diagnose and take decisions
C3	Using ICT in working contexts and lifelong learning.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable
	environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.
C9	Ability to manage times and resources: developing plans, prioritizing activities, identifying critical points, establishing goals and
	accomplishing them.

Assessment comments

Assessment criteria Second opportunity

The assessment criteria for the first and

the second opportunity are the same. The student has a chance to resit the mixed objective/subjective test and the practical test. If the score in any of the two tests in the first opportunity was higher than 4.0, the student does not need to resit that test and its score can be kept for the second opportunity.

Early call

If there were students who wanted to take

the early December call (Art. 19 "Standards for evaluation, review and claim of qualifications for undergraduate and master's degree studies"), those students will only have to take the mixed objective/subjective test (35% of the grade), the practical test (35% of the grade) and the supervised project (30% of the grade). The supervised project must be done individually.

As strict requirement to pass the course,

it will be necessary to obtain a minimum score of 3.5 points out of 10 in the mixed objective/subjective test and in the practical test. If this requirement is not met, the grade will be ?Fail? regardless of the average score. 'No Presentado' grade

The grade of "No presentado" (no

grade) will be given to those students who will not attend the final exam both in the first, second opportunity of assessment as well as in the early call. Students with recognition of part-time dedication and academic exemption waiver

The students with recognition of part-time

dedication and academic exemption waiver must inform the instructor of the course at the beginning of the course, to establish a plan and calendar of activities. The assessment system will be the following one: mixed objective/subjective test (35%), practical test (35%) and supervised project (30%). The student must form a team with other students to develop the supervised project. Minimum grade

As strict requirement to pass the course,

both in the first and second opportunity of assessment, it will be necessary to obtain a minimum score of 3.5 points out of 10 in the mixed objective/subjective test and in the practical test. If this requirement is not met, the grade will be ?Fail? regardless of the average score.

Students must attend at least to 80% of the classes. If this requirement is not met and the average score is 5.0 or higher, the grade will be 4.5 ?Fail?. Additional information

According to Article 11, section 4 b) of the "Reglamento disciplinar del estudiantado de la UDC", engaging in fraudulent behavior in any of the methodologies subject to assessment sections will result in a grade of "Fail (0)" for the final evaluation, both in the first and second opportunity, regardless of the opportunity in which the offense was committed.

It is forbidden to access the examination room with any device allowing for data transmission and/or warehousing (e.g., mobile phones, smart watches...) when any of the assessment test is taking place.
