

## Teaching Guide

Identifying Data					2023/24
Subject (*)	Acoustic Waves	Code	730495015		
Study programme	Mestrado Universitario en Materiais Complexos: Análise Térmica e Reoloxía (plan 2012)				
Descriptors					
Cycle	Period	Year	Type	Credits	
Official Master's Degree	1st four-month period	First	Optional	4	
Language	English				
Teaching method	Face-to-face				
Prerequisites					
Department	Enxeñaría Naval e Industrial				
Coordinador	López Beceiro, Jorge José	E-mail	jorge.lopez.beceiro@udc.es		
Lecturers	Dedore , Arnaud López Beceiro, Jorge José	E-mail	arnaud.dedore@espci.fr jorge.lopez.beceiro@udc.es		
Web					
General description	By focusing on the core concepts of propagation of sound waves, this course provides students with the skills necessary to study the acoustical problems in complex fluids.				

## Study programme competences / results

Code	Study programme competences / results
A4	Knowing and applying statistical methods to analyze data from complex material testing
A5	Understanding the relationships between structure and properties of materials
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B12	Communicate effectively in the work environment
B18	Ability for abstraction, understanding and simplification of complex problems
B19	Will of continuous improvement
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

## Learning outcomes

Learning outcomes	Study programme competences / results		
	AR4	BR1	CR2
	AR5	BR2	CR6
		BR4	CR7
		BR8	CR8
		BR12	
		BR18	
		BR19	
		BR21	

Contents	
Topic	Sub-topic
Acoustic waves in perfect and viscous fluids	
Phenomena at the interface.	
Introduction to non-linear effects, shock waves	
Diffraction theory (harmonic regime and impulses)	
Elastic waves in soft solids	

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A4 A5 B1 B4 B18 C2	10	18	28
Laboratory practice	B2 B8 B12 B19 B21 C8	20	20	40
Supervised projects	B4 B19 B21 C2 C6 C7	5	25	30
Personalized attention		2	0	2

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc..
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor.  No academic dispensation is accepted.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Guest lecture / keynote speech	A4 A5 B1 B4 B18 C2	Examination or objective test.	50
Laboratory practice	B2 B8 B12 B19 B21 C8	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials.	20
Supervised projects	B4 B19 B21 C2 C6 C7	Presentation (oral and written) of the supervised work.	30

Assessment comments

No academic dispensation is accepted.

The evaluation criteria for the second opportunity and the extraordinary opportunity are the same as for the first opportunity.

The fraudulent completion of exams or evaluation activities, once confirmed, will directly result in a failing grade in the session in which it occurs: the student will be awarded a 'fail' (numerical grade of 0) in the corresponding academic year session, whether the offense is committed during the first opportunity or the second. To this end, their grade will be modified in the first opportunity transcript, if necessary.

#### Sources of information

Basic	Apuntes e documentación facilitada en clase ou a través do correo electrónico
Complementary	

#### Recommendations

Subjects that it is recommended to have taken before

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

#### Other comments

To help achieve a sustained immediate environment and meet the objective of action number 5: "Healthy and sustainable environmental and social teaching and research" of the "Green Campus Ferrol Action Plan: The delivery of the documentary work carried out in this subject: They will be requested in virtual format and/or computer support. It will be done through Moodle, in digital format without the need to print them. If it is necessary to make them on paper: Plastics shall not be used. Double-sided printing shall be carried out. Recycled paper will be used. Printing of drafts shall be avoided. A sustainable use of resources and the prevention of negative impacts on the natural environment must be made. It will work to identify and change gender biases and attitudes, and influence the environment to change them and promote values of respect and equality. Situations of discrimination should be identified and actions and measures proposed to correct them.
