Descripción general	The objective of this course is to provide the students the insights of how ships are used to earn money. In order to do so, the functioning of the maritime markets needs to be understood. Also, it is the aim to explain that ships are part of a larger logistics chain and that the interaction in the port and with the other transport modes is vital. Next to that, also the working principals of a port are explained even as hinterland transport. Finally, the current developments regarding emission reductions in the total transport chain are dealt with.			

Competencias del título	
Código	Competencias del título
A6	CE6 - Demonstrate knowledge, understanding and competences in fulfilling safety, economic and sustainability requirements in ship operation and management (SO).
B2	CB6 - Acquire and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, usually in a research context.
B3	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.
B4	CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
B5	CB9 ? That students are able to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized publics in a clear and unambiguous way.
B6	CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B7	CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to implement basic management principles suitable for a multicultural working environment.
B8	CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness.
B12	CG6 ? To appreciate the impact of sustainable development goals in maritime transport.
C2	CT2 - Mastering oral and written expression in a foreign language.
C4	CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C5	CT5 - Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C6	CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.
C8	CT8 -Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

Resultados de aprendizaje	
Resultados de aprendizaje	Competencias del título

Capability to understand how the maritime sector is structured, how it is part of a more complex logistic system and how ships and ports are integrated within it.	AM6	BM1 BM2 BM3 BM4 BM5 BM6 BM7 BM11	CM2 CM4 CM5 CM6 CM7 CM8

Contenidos	
Tema	Subtema
Lesson 1	Main introduction lesson where the global maritime transport chain is explained. This chain will include, maritime part of the transport, ports and the hinterland transport. The main objective here is to show that a ship is part of a bigger transport chain. A model (which has been developed by me) can also be offered to the students to make some calculations. This could be part of the paper/ assignment.
Lesson 2	Maritime lecture part 1: Economic organization of the shipping market. This will be a based on Stopford (2006)
Lesson 3	Maritime lecture part 2: Sub-markets & cash flow in shipping. Also this lecture will be based on Stopford (2006)
Lesson 4	Port lecture part 1: The organization of ports. What are ports, how do they function
Lesson 5	Port lecture part 2: The organization of ports. What are ports, how do they function, and what is the interaction with ships (bunkerings and provision of alternative fuels).
Lesson 6	Hinterland lecture part 1: Port hinterland transport. In this lecture is explained how cargo being shipped from ports to the hinterland and which transport modes can be used (road, rail, IWT).
Lesson 7	Hinterland lecture part 2: Modal choice, intermodal transport and hinterland infrastructure.
Lesson 8	Emission mitigation in maritime transport chains and the impact it has on both shippers and vessel owners.  This course can include: A short introduction in the propulsion system of a vessel, Investments in new (retrofitable) technologies in deepsea vessels due to legislation, Impact of the Environmental Efficiency Design Index (EEDI) of deepsea vessels on CO2 emissions, Impact of the Emission Control Area at the North Sea on port competition, Impact of the internalization of external cost on port competition.

Planificación				
Metodologías / pruebas	Competencias	Horas presenciales	Horas no presenciales / trabajo autónomo	Horas totales
Sesión magistral	A6 B4 B6 B7 B12 C4 C5 C6	18	18	36
Trabajos tutelados	B3 B5 B8 C2 C7 C8	4	26	30
Prueba mixta	B2	2	2	4
Atención personalizada		5	0	5

(\*)Los datos que aparecen en la tabla de planificación són de carácter orientativo, considerando la heterogeneidad de los alumnos

Metodologías	
Metodologías	Descripción

Sesión magistral	Oral presentation complemented with the use of audiovisual media and the introduction of some questions aimed at students, in order to transmit knowledge and facilitate learning
Trabajos tutelados	Supervised learning process aimed at helping students to work independently in a range of contexts (academic and professional). Focused primarily on learning ?how to do things? and on encouraging students to become responsible for their own learning.
Prueba mixta	Written test used for the assessment of learning, whose distinctive feature is the ability to determine whether or not the answers given are correct. It is a rigorously developed measuring instrument that allows to assess knowledge, abilities, skills, performance, aptitudes, attitudes, etc.

## Atención personalizada

Metodologías	Descripción
Sesión magistral Trabajos tutelados	Students will be able to solve their doubts through personalized tutorials. To contact the teaching staff, they may use email or Teams.

## Evaluación

Metodologías	Competencias	Descripción	Calificación
Trabajos tutelados	B3 B5 B8 C2 C7 C8	Group coursework: a research paper on a given topic for which a model can be given to the students to make use of	40
Prueba mixta	B2	The evaluation of the subject will be carried out through an exam where the knowledge acquired by the student during the course will be assessed.	60

## Observaciones evaluación

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules: - Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree. - No part time or lecture attendance exemption are allowed in this degree.
