Descrición xeral	This course is focused on provid	ing the students	with practical k	nowledo	ge in the Internet o	f Things (IoT) and, specifically,
	regarding its application to industrial environments (Industrial Internet of Things, IIoT). The theoretical lessons will cover a					
	broad view of all relevant aspects of IoT, while practical lessons will prepare the students for carrying out the					
	implementation of those theoretical concepts.					

	Competencias / Resultados do título
Código	Competencias / Resultados do título
B2	CB6 - Acquire and understand knowledge that provides a basis or opportunity to be original in the development and / or application of
	ideas, usually in a research context.
В3	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or unfamiliar environments
	within broader (or multidisciplinary) contexts related to their area of study.
B4	CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being
	incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and
	judgments.
B5	CB9 ? That students are able to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized
	and non-specialized publics in a clear and unambiguous way.
B6	CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous
B7	CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to
	implement basic management principles suitable for a multicultural working environment.
B8	CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness.
B11	CG5 ? To have the capability to identify, formulate and solve engineering problems within realistic constraints.
B13	CG7 ? To have the capability to critically analyse, synthesise, interpret and summarise complex scientific processes.
C2	CT2 - Mastering oral and written expression in a foreign language.
C3	CT3 - Using ICT in working contexts and lifelong learning.
C4	CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C6	CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a
	sustainable environmental, economic, political and social development.

	Contidos
Temas	Subtemas
Introduction.	- Background and definitions.
	- Involved technologies.
	- IoT vs. IIoT.
	- Relationship with Industry 4.0.
Devices.	- Sensors and endpoints.
	- Actuators.
	- Hardware platforms.
	- Low level communication.
Communication networks.	- Types of networks.
	- Gateways.
	- Protocols.
Data processing.	- Edge, fog, and cloud computing.
	- Data analytics and machine learning application.
	- Software platforms.
User interfaces.	- Standalone.
	- Cloud-based.
Security.	- Firewalls.
	- Encryption.
	- Authentication.

	Metodoloxías	
Metodoloxías	Descrición	
Proba mixta	It will consist of a written test with short and / or multiple choice questions, in order to check the consolidation of the most	
	important theoretical concepts seen in the subject.	

Sesión maxistral	Activity in the classroom that serves to establish the fundamental concepts of the subject. It consists of oral presentation making profuse use of audiovisual media and seeking the participation of students by posing practical cases and asking questions, in order to facilitate learning and foster a critical spirit.
Prácticas de	Through this activity, students will implement small systems in the laboratory that will exemplify the concepts seen in the
laboratorio	lectures, so that they can test some of the methods and techniques in the real world, and assess the problems (and their
	implications) that arise in the implementation of IoT systems.
Traballos tutelados	Completion of one or more assignments throughout the term, carried out autonomously and supervised by the teachers, which
	will involve putting into practice the concepts seen in the lectures. At least the final work will be done in groups and students
	will submit a report and they will also have to make a presentation to the teacher and their classmates.

	Atención personalizada
Metodoloxías	Descrición
Traballos tutelados	Laboratory practice: personalized attention in laboratory practices will consist of solving conceptual or procedural doubts that
Prácticas de	may arise during students' work.
laboratorio	
	Supervised projects: it will be necessary to show the progress that is being made to offer the appropriate guidance, resolve
	doubts and ensure the quality of the work. These tutorials will be carried out in groups and in person in the teacher's office or
	using Teams.

		Avaliación	
Metodoloxías	Competencias /	Descrición	
	Resultados		
Traballos tutelados	B3 B4 B5 B6 B7 B8	Development of one or more individual projects or in small groups. It will be necessary	70
	B11 B13 C2 C3 C4	to deliver the materials (document and presentation) in a timely manner following the	
	C6 C7	instructions. At least the final work will require oral presentation by all members of the	
		working group. Not to perform the presentation will result in a score of zero in this	
		activity.	
		Nomenclature used in the observations section for this activity:	
		P: mark obtained in the supervised project (70% of the final mark).	
Proba mixta	B4 B11 B13 C2	It will consist of a written exam with short and / or multiple choice questions, in order to	30
		check the consolidation of the most important theoretical concepts seen in the subject.	
		General evaluation criteria:	
		* Correct answers.	
		Nomenclature used in the observations section for this activity:	
		E: mark obtained in this test (30% of the final mark).	

Observacións avaliación

In order to pass the subject, the student must meet the following requirements (score between 0 and 10 in all activities):1) P>=5.2) E>=5.1f all the above requirements are not met, the maximum qualification mark that can be obtained, in the corresponding opportunity, will be 4.5 points. If the required requirements are met, the final mark will be calculated as follows:FINAL MARK = $0.7 \times P + 0.3 \times$

- Students will have only two oportunities to pass a course. If failing to do so, they may be forced to leave the degree.
- No part time or lecture attendance exemption are allowed in this degree.

Fraudulent performance of tests or evaluation activities, once verified, will directly imply the qualification of failing in the opportunity in which it is committed: the student will be graded with "fail" (numerical grade 0) in the corresponding opportunity, whether the commission of the offense occurs on the first opportunity or on the second. For this, their qualification will be modified in the first opportunity certificate, if necessary.

Observacións

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmentally and socially sustainable research and teaching): The assignments to be done in this course: Will be required in digital format. Will be delivered using Moodle, with no need to print them. In case it is necessary to print them: Plastics won't be used. Two side printing will be used. Recycled paper will be used. Printing drafts will be avoided. A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment. Anbsp;===In this course, an effort will be pursued towards the incorporation of gender inclusion aspects: no sexist language will be allowed, bibliography from authors of both genders will be used, and the participation of students of both gender in class will be promoted. The situations of gender discrimination will be detected, and actions will be implemented to correct them. The full integration of students who for physical, sensorial, psychic, or socio-cultural reasons may have difficulties in their academic life will be promoted.
