Descripción xeral	The goal of this subject is to provide a basic theoretical and practical understanding of modelling and simulation technologies (M&S) applied to shipbuilding. M&S is considered one of the Industry 4.0 technologies that allows shipyards to optimize manufacturing processes and logistics. The simulation software Flexsim will be used to solve practical cases based on real problems solved in shipyards.			

Competencias do título	
Código	Competencias do título
B7	CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to implement basic management principles suitable for a multicultural working environment.
B8	CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness.
B11	CG5 ? To have the capability to identify, formulate and solve engineering problems within realistic constraints.
B13	CG7 ? To have the capability to critically analyse, synthesise, interpret and summarise complex scientific processes.
C2	CT2 - Mastering oral and written expression in a foreign language.
C3	CT3 - Using ICT in working contexts and lifelong learning.
C4	CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C6	CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.

Resultados da aprendizaxe			
Resultados de aprendizaxe			Competencias do título
To have basic knowledge about the modelling and simulation methodology.			BM6 CM2 BM7 CM3 BM10 CM4 BM12 CM6 CM7
To solve realistic problems about process optimization and planning in shipyards using simulation.			BM6 CM2 BM7 CM3 BM10 CM4 BM12 CM6 CM7

## Contidos

Temas	Subtemas
Modelling and Simulation	The M&S methodology. M&S technologies. Simulation projects.
Model development in Flexsim	Flexsim basics. Fixed resource library. Task executors. Networks and conveyors. Introduction to process flows.
Shipbuilding processes	Cutting-welding. Block assembly. Outfitting. Painting. Blocks erection.
Shipyard simulation.	Material receipts. Assembly workstations. Blocks erection. Cranes. Planning.
Optimization	Input data analysis. Simulation experiments. Optimization concepts. Linear models. Heuristics. Evolutionary algorithms.

#### Observacións avaliación

Criterios de avaliação

Segunda oportunidade

Os criterios de avaliação son iguais tanto na primeira como na segunda oportunidade..

Cualificación 'Non Presentado'

Os alumnos que non fagan entrega do traballo tutelado terán cualificación de "Non presentado"

Información Adicional

De acordo co artigo 11, apartado 4 b) do Regulamento disciplinar do estudiantado da UDC, o comportamento fraudulento en cualquera dos apartados sometidos a avaliação suporá a cualificación de "Suspensu (0)" na avaliação final tanto na primeira como na segunda oportunidade e independentemente da oportunidade na que se cometese a falta.

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:

- Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree.
- No part time or lecture attendance exemption are allowed in this degree.

#### Observacións

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmentaly and socially sustainable research and teaching); Will be required in digital format; Will be delivered using Moodle, with no need to print them; In case it is necessary to print them; Plastics won't be used; Two side printing will be used; Recycled paper will be used; Printing drafts will be avoided; A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment. In this course, an effort will be pursued towards the incorporation of gender inclusion aspects: no sexist language will be allowed, bibliography from authors of both genders will be used, and the participation of students of both gender in class will be promoted. The situations of gender discrimination will be detected, and actions will be implemented to correct them. The full integration of students who for physical, sensorial, psychic, or socio-cultural reasons may have difficulties in their academic life will be promoted.
