Identifying Data				2023/24		
Subject (*)	Environmental Engineering		Code	730G03017		
Study programme	Grao en Enxeñaría Mecánica					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	1st four-month period	Second	Obligatory	6		
Language	SpanishGalician					
Teaching method	Face-to-face					
Prerequisites						
Department	Enxeñaría Naval e IndustrialQuímica					
Coordinador	Filgueira Vizoso, Almudena	E-mail	almudena.filgueira.vizoso@udc.es			
Lecturers	Filgueira Vizoso, Almudena Robles Iglesias, Raúl Rodriguez Guerreiro, Maria Jesus	E-mail	almudena.filgueira.vizoso@udc.es raul.robles@udc.es maria.guerreiro@udc.es			
Web	https://campusvirtual.udc.gal/login/index.php					
General description	This subject aims to develop skills that allow students to know and identify the problem of air, water and soil pollution. Control of atmospheric pollution, liquid discharge treatments: ARU and ARI. and RSU and RSI treatment systems. The legal and environmental management aspects in the company will allow its application in the labor world.					

Study programme competences	
Code	Study programme competences
A16	CR10 - Coñecementos básicos e aplicación de tecnoloxías ambientais e sustentabilidade.
B2	CB02 - Que os estudantes saibam aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudio
B3	CB03 - Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da súa área de estudio) para emitiren xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética
B5	CB05 - Que os estudantes desenvolvan aquellas habilidades de aprendizaxe necesarias para emprenderen estudos posteriores cun alto grao de autonomía
B6	B3 - Ser capaz de concibir, deseñar ou poñer en práctica e adoptar un proceso substancial de investigación con rigor científico para resolver calquera problema formulado, así como de comunicar as súas conclusións ?e os coñecementos e razóns últimas que as sustentan? a un público tanto especializados como leigo dun xeito claro e sen ambigüidades
B7	B5 - Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas
B8	B7 - Deseñar e realizar investigacións en ámbitos novos ou pouco coñecidos, con aplicación de técnicas de investigación (con metodoloxías tanto cuantitativas como cualitativas) en distintos contextos (ámbito público ou privado, con equipos homoxéneos ou multidisciplinares etc.) para identificar problemas e necesidades
C1	C3 - Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C2	C4 - Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C4	C6 - Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C6	C8 - Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Field trip	B2 C6	2.5	2.5	5
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral presentation complemented by the use of audiovisual media and the introduction of some questions aimed at students, in order to transmit knowledge and facilitate learning. The master class is also known as a lecture, expository method or Lecture. This last modality is usually reserved for a special type of lesson given by a teacher on special occasions, with content that implies an original elaboration based on the almost exclusive use of the word as a way of transmitting information to the audience.

Supervised projects	Methodology designed to promote the autonomous learning of students, under the tutelage of teachers and in varied settings (academic and professional). It is primarily concerned with learning how to do things. It is an option based on the assumption by students of responsibility for their own learning. This teaching system is based on two basic elements: independent student learning and monitoring of that learning by the tutor.
Laboratory practice	Methodology that allows students to learn effectively through practical activities, such as demonstrations, exercises, experiments and research
Mixed objective/subjective test	Exam that integrates standard questions and objective type questions. As for the former, it includes open-ended questions of development, the latter can combine multiple-choice, ranking, short-answer, discrimination, completion and association questions.
ICT practicals	Practice-based learning method for theoretical subject content using ICT resources (demonstrations, simulations, etc.) ICT is an excellent medium for practical knowledge applications and information processing, and a key aid to student learning and skills development.
Problem solving	Technique through which a specific problem situation has to be solved, based on the knowledge that has been worked on, which may have more than one possible solution
Field trip	Activities developed in a context external to the university academic environment (companies, institutions, organizations, monuments, etc.) related to the field of study of the subject. These activities focus on the development of skills related to direct and systematic observation, information gathering, product development (sketches, designs ...)

Personalized attention	
Methodologies	Description
Problem solving	Traballos tutelados: Recoméndase a asistencia a tutorías personalizadas. Nelas o/a alumno/a recibirá orientación sobre o xeito de iniciar e levar a cabo o traballo de acordo aos criterios que se indicarán.
Guest lecture / keynote speech	
Supervised projects	Presentación oral: Realizarase con apoio de diapositivas ou o material que consideren oportuno e cada alumno/a do grupo dispoñerá dun determinado tempo para esta.
Field trip	
Laboratory practice	
Mixed objective/subjective test	Prácticas de Laboratorio: O/A alumno/a será convocado/a con anterioridade a través do Campus Virtual. As prácticas realizaránse no laboratorio de Tecnoloxía Química e Medio Ambiente (Edificio Talleres Tecnolóxicos), salvo que se indique o contrario.
ICT practicals	En caso de dispensa académica o/a alumno/a porase en contacto coas profesoras para acordar as mellores datas para realizar cada unha das actividades previstas na materia, dentro sempre das posibilidades que permitan os horarios.

Assessment			
Methodologies	Competencies	Description	Qualification
Supervised projects	B3 B7 C2 C4	A amplitud do guión As fontes consultadas A exposición oral	25
Laboratory practice	B8 C6	Realización de prácticas Elaboración informe	5
Mixed objective/subjective test	B2 B3	Exame	70
Others			

Assessment comments

The student with a grade higher than 4 in the objective tests will go on to weighing with the rest of the evaluation methodologies.

In the event that any of the activities mentioned above were not carried out, the qualification of that methodology will pass to the objective test.

In the first evaluation opportunity, both the qualification of the works and the laboratory practices will be taken into account, as long as they pass the minimum of 4 in the mixed test. This same criterion will be applicable for the second opportunity.

For the advanced call, the laboratory practices and the mixed test will be taken into account, therefore the latter having a value of 95% of the note and 5% the laboratory practices.

Attendance at laboratory practices is mandatory to pass the course. The student who presents proof of not attending the practice as must take an exam of the same as the day of the exam of the January call or, failing that, the day of the second opportunity exam.

The fraudulent performance of the tests or evaluation activities will directly imply the grade of failure a "0" in the matter in the corresponding call, thus invalidating any grade obtained in all the evaluation activities for the extraordinary call.

Other comments

1. The delivery of the documentary works carried out in this matter: 1.1. It will be requested in virtual format and / or computer support; 1.2. It will be done through Moodle or similar, in digital format without the need to print them; 1.3. If done on paper: - No plastics will be used. - Double-sided prints will be made. - Recycled paper will be used. - Draft printing will be avoided. 2.- A sustainable use of resources and the prevention of negative impacts on the natural environment must be made. 3.- The importance of ethical principles related to the values ??of sustainability in personal and professional behavior must be taken into account. 4.- As stated in the different regulations of application for university teaching, the gender perspective must be incorporated in this matter (non-sexist language will be used, bibliography of authors of both sexes will be used, intervention in class of students will be encouraged and students ...). 5.- Work will be done to identify and modify prejudices and sexist attitudes, and the environment will be influenced to modify them and promote values of respect and equality. 6. Situations of discrimination based on gender must be detected and actions and measures will be proposed to correct them. 7. The full integration of students who for physical, sensorial, psychic or sociocultural reasons, experience difficulties to adequate, equal and beneficial access to university life will be facilitated.

(*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
