

Teaching Guide						
Identifying Data				2023/24		
Subject (*)	Fields and Waves		Code	730G04047		
Study programme	Grao en Enxeñaría en Tecnoloxías Industriais					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	1st four-month period	Second	Obligatory	6		
Language	Spanish					
Teaching method	Face-to-face					
Prerequisites						
Department	Enxeñaría Naval e Industrial					
Coordinador	Yañez Casal, Armando Jose	E-mail	armando.yanez@udc.es			
Lecturers	Yañez Casal, Armando Jose	E-mail	armando.yanez@udc.es			
Web						
General description	The fundamentals and basic applications of the time independent electric and electromagnetic fields are presented. An introduction to electrodynamics and electromagnetic waves is also done.					

Study programme competences	
Code	Study programme competences
B1	CB1 Que os estudantes demostren posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral e adoita encontrarse a un nivel que, áinda que se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vanguarda do seu campo de estudo
B2	CB2 Que os estudantes saibam aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo
B3	CB3 Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da súa área de estudo) para emitiren xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética
B6	B3 Ser capaz de concibir, deseñar ou poñer en práctica e adoptar un proceso substancial de investigación con rigor científico para resolver calquera problema formulado, así como de comunicar as súas conclusións ?e os coñecementos e razóns últimas que as sustentan? a un público tanto especializados como leigo dun xeito claro e sen ambigüidades
B7	B5 Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas
B8	B7 Deseñar e realizar investigacións en ámbitos novos ou pouco coñecidos, con aplicación de técnicas de investigación (con metodoloxías tanto cuantitativas como cualitativas) en distintos contextos (ámbito público ou privado, con equipos homoxéneos ou multidisciplinares etc.) para identificar problemas e necesidades
B9	B8 Adquirir unha formación metodolóxica que garanta o desenvolvemento de proxectos de investigación (de carácter cuantitativo e/ou cualitativo) cunha finalidade estratéxica e que contribúan a situarnos na vanguarda do coñecemento
C1	C3 Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C5	C7 Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

Learning outcomes			
Learning outcomes			Study programme competences
Know and understand the fundamentals and basic applications of stationary electric field and magnetic field. Know and understand the fundamentals and basic applications electromagnetic fields varying in time, electrodynamics and electromagnetic waves.		B1 B2 B3 B6 B7 B8 B9	C1 C5

Contents	
Topic	Sub-topic
The following blocks and themes develop the contents that are presented in the Proposal of the Studies	Fundamentals Electrostatics Magnetostatics Electrodynamics
Fundamentals	Vector analysis. Potential theory.
Electrostatics	Electric field calculation. Electric fields in matter. Work and energy in electrostatics. Electric current.
Magnetostatics	Magnetics fields produced by electric currents. Magnetics fields in matter
Electrodynamics	Electromagnetic induction. Electromagnetic waves.
Ondas electromagnéticas	Ondas electromagnéticas

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student?s personal work hours	Total hours
Guest lecture / keynote speech	B3 B7 B9 C5	30	33	63
Problem solving	B1 B2 B6 B8 C1	20	24	44
ICT practicals	B2 B3 B6 B7 B8 B9 C1	10	24	34
Mixed objective/subjective test	B1 B2 B7 C5	3	4	7
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Theoretical classes on the blackboard.
Problem solving	Resolution by the teacher and the students of the exercises..
ICT practicals	Some of the proposed practical exercises are solved using MATLAB and/or Python.
Mixed objective/subjective test	Final exam

Personalized attention	
Methodologies	Description
ICT practicals	For any aspect that students consider appropriate, in addition to small group tutoring, six hours per week of tutoring in the time published through the UDC website.
Guest lecture / keynote speech	Students who have an academic exemption will not be required to attend class but must submit the same works and, in general, on the same dates as the other students of the course.
Problem solving	

Assessment					
Methodologies	Competencies	Description			Qualification
ICT practicals	B2 B3 B6 B7 B8 B9 C1	Se valorarán los resultados alcanzados y la discusión de los mismos			30
Mixed objective/subjective test	B1 B2 B7 C5	Final exam.			70
Others					

Assessment comments

There will be a maximum of two tests, your last of them coinciding with the date of the examination passed in Centre Board.

The tests consist of practical problems and may include theoretical questions.

In each test will be a maximum of 4 hours.

In second opportunity assessed parties pending with the partial results to be as valid as the first one.

In the advanced opportunity the final exam mark will be 100% of the qualification

Students with academic exemption will not have to attend, but they must pass the same tests as other students.
