General description	Law and biomedicine (Health La	w) is concerned	with the legal ans	wers to human life an	d health, which are considered two
	highly appreciated social and individual values. By means of the analysis of legal sources, case study, lecture			s, case study, lectures and special	
	workshops students learn into depth both classical and current legal answers to life and health issues, stressing the human				
	rights approach. Special attention is paid to classical and contemporary cases, mainly the judgments of national				
Constitutional and Supreme Courts, as well as			e European Cour	t of Human Rights and	d the European Court of Justice.

	Study programme competences
Code	Study programme competences
A2	Knowledge of the role of law as a regulatory system of social relations
А3	Grasping the systematic nature of the legal system
A4	Appreciating the interdisciplinary nature of legal problems
A5	Knowing the constitutional principles and values.
A8	Basic knowledge of legal argumentation.
A9	Ability to handle legal sources (legal, jurisprudential and doctrinal).
A10	Ability to interpret and critically assess the legal system.
A15	Ability to negotiate and mediate.
B2	Ability to know how to apply their knowledge to their work or vocation in a professional way and possess the skills that are usually
	demonstrated through the elaboration and defense of arguments and the resolution of problems within their area of study.
В3	Ability to gather and interpret relevant data (usually within their area of study) to make judgments that include a reflection on social,
	scientific or ethical relevant issues.
B5	Acquisition and assessment of those learning skills necessary to undertake further studies with a high degree of autonomy
В7	Effective problem solving.
B8	Critical, logical, and creative thinking.
B10	Teamwork and collaboration.
B11	Ethical and social responsibility.
C1	Adequate oral and written expression in the official languages.
C4	Exercising an open, educated, critical, committed, democratic and supportive citizenship for the sake of the common good.
C6	Critically assess the knowledge, technology and information available to solve the problems they face.
C7	Assume as a professional and citizen the importance of lifelong learning.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

	Methodologies
Methodologies	Description
Case study	The knowledge of life and health issues requires the analysis both of national and international statutes and case law.
	Students learn into depth classical and contemporary cases, specially the rulings of the Constitutional and Supreme Courts as
	well as the European Court of Human Rights and the European Court of Justice
	Case study trains the students to identify the legal issues at stake, deliberate about them and find a solution using legal
	arguments
	Case study includes other methodologies: analysis of bibliographical and normative sources, as well as research papers.
Multiple-choice	Assessment of the knowledge and understanding of bibliographical and legal sources.
questions	
Guest lecture /	Lectures ease the understanding of the special features, language, and concepts of health law, following a human
keynote speech	rights-based approach. Furthermore, lectures are intended to clarify the meaning of the bibliographical and normative sources
	and the main topics
Workshop	Specific topics are studied thoroughly combining different methodologies (legal sources analysis, case study). It is expected
	the student takes part more actively and individually, implementing his/her knowledge and argumentative skills.
	Some of the workshops are given by guest and visiting professors.
Document analysis	The main legal answers to life and health issues come from international and national statutes and case law. Identifying,

	Personalized attention
Methodologies	Description
Document analysis	Advise on selection and assessment of bibliographical and normative sources.
Workshop	Advise on selection of workshop issues and on deliberation on document analysis and clinical and legal cases.
	Students with part-time dedication and exemption from class attendance. Supervision through tutorials.

biomedicine and law.

understanding and assessing these legal sources is an important feature to grasp the meaning of relations between

		Assessment

Multiple-choice	A2 A3 A4 A5 A8 A9	Assessment of the knowledge and understanding of bibliographical and legal sources.	40
questions	A10 B7 B8 B3 C1	The test consists of several short questions to be responded orally.	
Workshop	A3 A4 A5 A8 A9 A10	Assessment of the ability to select, understand, analyse and communicate the	30
	A15 B7 B8 B10 B11	different issues dealt with using the bibliographical and normative (legislation and	
	B2 B3 B5 C1 C4 C6	case-law) sources.	
	C7 C8	Assessment of the argumentative abilites, mainly the oral ones, as well as	
		participation in deliberations.	

Assessment comments

1. Assessment of the second opportunity

The student can keep the grade obtained in the workshops, document analysis, and multiple-choice questions if it is equal or higher than a passing grade in each of these parts. In case of a failing grade in the workshops, he/she will be able to use the modality for students with acknowledged part-time dedication and exemption from class attendance.

2. Plagiarism or academic fraud

Student fraudulent behavior in the assessment activities, and particularly plagiarism (in the workshops and document analysis), will result in a grade of "0 (Failing grade)" in the corresponding opportunity.

3. Assessment criteria for students with acknowledged part-time dedication and exemption from class attendance.

The multiple-choice questions (40%) will have the same conditions as for the rest of the students.

The assessment of the workshops and the document analysis will consist of the delivery of written comments on the normative or bibliographic sources and a brief oral comment before the professor before the date of the exam (multiple-choice questions).
