General description	In this course, we will explore the	theoretical conc	epts of information	management, as w	ell as the software and tools for
	obtaining, extracting, labelling, vis	ualising and exp	oloiting biomedical	knowledge. We will	explore the syntactic and semantic
	modelling of information, methods	of obtaining an	d collecting informa	ation, methods of int	egration, extraction and
	terminological labelling, standards	s for semantic re	presentation of bio	medical information	, and techniques for analysis and
	visualisation of knowledge				

	Study programme competences / results
Code	Study programme competences / results
A6	CE6 - Ability to identify software tools and most relevant bioinformatics data sources, and acquire skill in their use
В3	CB8 - Students to be able to integrate knowledge and deal with the complexity of making judgements from information that could be
	incomplete or limited, including reflections on the social and ethical responsibilities linked to the application of their skills and judgments
В6	CG1 -Search for and select the useful information needed to solve complex problems, driving fluently bibliographical sources for the field
C3	CT3 - Use the basic tools of the information technology and communications (ICT) necessary for the exercise of their profession and
	lifelong learning
C8	CT8 - Rating the importance that has the research, innovation and technological development in the socio-economic and cultural progress
	of society

Topic	Sub-topic
Introduction	-
Standards for biomedical information	-
Resources for biomedical information	-
Exploitation of biomedical information	-

Ethical and legal aspects

	Plannir	ıg		
Methodologies / tests	Competencies /	Teaching hours	Student?s personal	Total hours
	Results	(in-person & virtual)	work hours	
Laboratory practice	C3 C8	8	22	30
Supervised projects	B3 B6	2	9	11
Mixed objective/subjective test	A6 B3 B6 C3 C8	0	1	1
Guest lecture / keynote speech	A6 B3	11	22	33
Personalized attention		0		0

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies
Methodologies	Description
Laboratory practice	Use of standards, resources and methods of exploitation to solve problems
Supervised projects	Tutored work proposed by the teacher and developed by students either in groups or individually.
Mixed	The mastery of theoretical and operative knowledge of the subject will be evaluated.
objective/subjective	
test	
Guest lecture /	Lessons about the contents of the subject by encouraging student participation
keynote speech	

	Personalized attention
Methodologies	Description
Laboratory practice	The teacher will advise the particular problems of each student taking into account their degree of effort and participation
Supervised projects	during the lessons
	The individual work of the students will be evaluated.
	Values of equality will be promoted following current recommendations.

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		
Mixed	A6 B3 B6 C3 C8	Questions about acquired knowledge.	50
objective/subjective		Questions that involve reasoning based on the knowledge acquired to solve practical	
test		problems of real interest. It is mandatory to reach 40% of the grade to pass the subject	
Laboratory practice	C3 C8	Correction and completeness of the practices proposed for the proper use of the	40
		explained tools. It is mandatory to reach 40% of the grade to pass the subject	
Supervised projects	B3 B6	Follow up of the work and evaluation on the result achieved and individual	10
		participation of the students in the classes. It is mandatory to reach 40% of the grade	
		to pass the subject	

Assessment comments

For the second opportunity and not ordinary exams, both practice and theory will be evaluated in the mixed exam. If the minimum grade in the different tests is not reached, the maximum grade of the student will be 4.5. For part-time students, the grading scale and continuous assessment are the same as for other students. If plagiarism is detected the student will not pass the subject.

- The fraudulent performance of tests or evaluation activities, once verified, will directly imply the qualification of fail in the call in which it is committed: the student will be graded with "suspense" (numerical note 0) in the corresponding call of the academic year, whether the commission of the foul occurs on the first opportunity or on the second. To do this, her rating will be modified in the first opportunity report, if necessary.
