Subject (*)	Speech Therapy Intervention in Speech and Voice Disorders		Code	652G04027
Study programme	Grao en Logopedia			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Third	Obligatory	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Didácticas Específicas e Métodos de Investigación e Diagnóstico en Educación			
Coordinador	García Real, Teresa Juana	E-mail	teresa.greal@udc.es	
Lecturers	García Real, Teresa Juana	E-mail	teresa.greal@udc.es	
Web				
General description	This subject will learn different resources in treatment for dysarthria, phonological problems in children, stuttering and functional dysphonia).			

Study programme competences	
Code	Study programme competences
A1	Coñecer e integrar os fundamentos biolóxicos da Logopedia: a Anatomía e Fisioloxía.
A2	Coñecer e integrar os fundamentos psicolóxicos da Logopedia: o desenvolvemento da linguaxe, o desenvolvemento psicolóxico, a Neuropsicoloxía da linguaxe, os procesos básicos e a Psicolinguística.
A3	Coñecer e integrar os fundamentos lingüísticos da Logopedia: Fonética e fonoloxía, morfosintaxe, semántica, pragmática, sociolinguística.
A6	Coñecer a clasificación, a terminoloxía e a descripción dos trastornos da comunicación, a linguaxe, a fala, a voz e a audición e as funcións orais non verbais.
A7	Coñecer, recoñecer e discriminar entre a variedade das alteracións: os trastornos específicos do desenvolvemento da linguaxe, trastorno específico da linguaxe, retrasos da linguaxe, trastornos fonéticos e fonolóxicos; os trastornos da comunicación e a linguaxe asociados a déficit auditivos e visuais, o déficit de atención, a deficiencia mental, o trastorno xeneralizado do desenvolvemento, os trastornos do espectro autista, a parálise cerebral infantil e as plurideficiencias; os trastornos específicos da linguaxe escrita; as discalculias; as alteracións no desenvolvemento da linguaxe por deprivación social e as asociadas a contextos multiculturais e plurilingüismo; os trastornos da fluidez da fala; as afasias e os trastornos asociados; as disartrias; as disfonías; as disglosias; as alteracións da linguaxe no avellentamento e os trastornos degenerativos; as alteracións da linguaxe e a comunicación en enfermidades mentais; o mutismo e as inhibicións da linguaxe; as alteracións das funcións orais non verbais: deglución atípica, disfagia e alteracións tubáricas.
A8	Coñecer os fundamentos do proceso de avaliación e diagnóstico.
A9	Coñecer e aplicar os modelos, técnicas e instrumentos de avaliación.
A10	Realizar a avaliación das alteracións da linguaxe nos trastornos específicos do desenvolvemento da linguaxe: trastorno específico da linguaxe, retrasos da linguaxe, trastornos fonéticos e fonolóxicos; os trastornos da comunicación e a linguaxe asociados a déficit auditivos e visuais, o déficit de atención, a deficiencia mental, o trastorno xeneralizado do desenvolvemento, os trastornos do espectro autista, a parálise cerebral infantil e as plurideficiencias; os trastornos específicos da linguaxe escrita; as discalculias; as alteracións no desenvolvemento da linguaxe por deprivación social e as asociadas a contextos multiculturais e plurilingüismo; os trastornos da fluidez da fala; as afasias e os trastornos asociados; as disartrias; as disfonías; as disglosias; as alteracións da linguaxe no avellentamento e os trastornos degenerativos; as alteracións da linguaxe e a comunicación en enfermidades mentais; o mutismo e as inhibicións da linguaxe; as alteracións das funcións orais non verbais: deglución atípica, disfagia e alteracións tubáricas.
A11	Redactar un informe de avaliación logopédica.
A12	Realizar unha avaliación tras a intervención.
A13	Coñecer os principios xenerais da intervención logopédica.
A14	Coñecer as funcións da Intervención logopédica: prevención, educación, reeducación, rehabilitación e tratamiento.
A15	Coñecer e aplicar os modelos e as técnicas de intervención.
A16	Coñecer as características diferenciais da intervención logopédica nos ámbitos familiar, escolar, clínico-sanitario e asistencial.

A17	Coñecer e realizar a intervención logopédica nos trastornos específicos do desenvolvemento da linguaxe: trastorno específico da linguaxe, retrasos da linguaxe, trastornos fonéticos e fonolóxicos; os trastornos da comunicación e a linguaxe asociados a déficit auditivos e visuais, o déficit de atención, a deficiencia mental, o trastorno xeneralizado do desenvolvemento, os trastornos do espectro autista, a parálise cerebral infantil e as plurideficiencias; os trastornos específicos da linguaxe escrita; as discalculias; as alteracións no desenvolvemento da linguaxe por deprivación social e as asociadas a contextos multiculturais e plurilingüismo; os trastornos da fluidez da fala; as afasias e os trastornos asociados; as disgracias; as disfonías; as disglosias; as alteracións da linguaxe no avelantamento e os trastornos dexenerativos; as alteracións da linguaxe e a comunicación en enfermidades mentais; o mutismo e as inhibicións da linguaxe; as alteracións das funcións orais non verbais: deglución atípica, disfagia e alteracións tubáricas.
A18	Coñecer e realizar a intervención logopédica en Atención Temprá.
A21	Saber deseñar e elaborar informes logopédicos.
A22	Saber deseñar, programar e avaliar a actuación logopédica.
A23	Coñecer, aplicar e valorar criticamente as técnicas pedagógicas, así como os recursos metodolóxicos e didácticos para o ensino da linguaxe.
A27	Realizar a planificación estratégica da intervención logopédica.
A28	Adquirir un coñecemento práctico en intervención logopédica (formación práctica en ámbitos escolares, clínico-sanitarios e asistenciais).
B1	Acceso, selección e xestión das fontes de información relevantes para a práctica profesional.
B2	Aplicar un pensamento crítico, lóxico e creativo.
B3	Apreciar as distintas manifestacións da diversidade.
B4	Aprender a aprender.
B5	Aprender autonomamente, e motivarse para facelo de forma continuada.
B6	Capacidade de adaptarse aos cambios.
B7	Capacidade de análise e síntese.
B8	Capacidade de observar e de escutar de forma activa.
B9	Capacidade de organizar e planificar.
B10	Capacidade para motivarse e procurar a calidade na actuación profesional.
B11	Comportarse con ética e responsabilidade social como cidadán e como profesional.
B12	Comunicarse de maneira efectiva nun contorno de traballo.
B13	Coñecer e manexar as novas tecnoloxías da comunicación e da información.
B14	Destreza e empatía nas relacións interpersoais.
B15	Poñer en valor a súa profesión no contorno en que desenvolve o seu traballo.
B16	Resolver problemas de forma efectiva.
B17	Saber expresarse en público.
B18	Ser creativo no exercicio da profesión.
B19	Ter compromiso ético.
B20	Ter iniciativa e espírito emprendedor.
B21	Tomar decisións con autonomía e responsabilidade.
B22	Traballar de forma autónoma con iniciativa.
B24	Traballar en equipo e, de ser o caso, de forma interdisciplinar.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguaas oficiais da comunidade autónoma.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes

Learning outcomes

Study programme
competences

Knowing the assessment protocols and therapy in these pathologies.	A1 A2 A6 A7 A8 A13 A14 A15 A17 B1 B3 B5 B7 B8 B11 B13 B14 B16 B17 B19 B21 B22 B24	C1 C6 C7
Ability to design a treatment program and ability to solve problems during speech therapy process.	B9 B16 B17 B19 B21 B22 B24	C1 C6 C7
To know different methods and techniques to speech and voice therapy.	A3 A9 A10 A11 A12 A16 A18 A21 A22 A23 A27 A28	B2 C8

Contents	
Topic	Sub-topic
UNIT 1.General aspects of the speech and voice therapy.	1.1. Anatomy and physiology for voice and speech systems. 1.2. Fundamental concepts of Linguistics. 1.3. Embryonic development. 1.4. Neuro-muscular control of speech.
UNIT 2. Vocal therapy for Dysphonia.	4.1. Concept of functional and organic dysphonias. Types of functional dysphonias. 4.2. Voice assessment: history and acoustic and visual exploration. 4.3. Objectives and bases for vocal therapy. 4.4 . Therapeutic approaches. 4.5. Overall treatment resources.
UNIT 3.Vocal technique:respiration, phonation and resonance aspects.	5.1.Physiological aspects. 5.2 Correction of the functional errors. 5.3 Specific vocal techniques.

UNIT 4. Therapy for specific dysphonia.	6.1. Vocal paralysis 6.2. Mutation disorders.
UNIT 5. Fundamental bases about Dysarthria	2.1. Concept, etiologies and clinical classification. 2.2. Assessment of dysarthria: history, exploration of respiration functions, swallowing, mastication, phonation and articulation
UNIT 6. Speech therapy in Dysarthria.	3.1. Objectives and principles 3.2. Therapeutic approaches. 3.3. Techniques and resources specific to swallowing and chewing problems. 3.4. Techniques and resources specific to respiration, phonation and articulation problems.
UNIT 7. Fundamental bases about Stuttering.	7.1. Concept and principal etiopathogenic theories. 7.2. Clinical feautures and differential diagnostics. 7.3. Stuttering evaluation.
UNIT 8. Therapy for Stuttering.	8.1. Bases and objectives. 8.2. Specific resources for dysfluency, logofobie and neurovegetative symptoms.
UNIT 9. Speech therapy for Disglosias.	9.1. Concept, etiologies and types. 9.2. Speech therapy: principles, objectives and therapeutic resources.

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

Methodologies	Description
Case study	Therapeutic programming of the language disorder study cases that have been taught in theoretical classes to learn how to design and treat with their objectives, systematic and selection of specific exercises. This activity will be done in working groups of 5-6 people, on Mondays in interactive practical classes.
Introductory activities	An initial questionnaire to evaluate students' previous competencies on the assessment and fundamentals of speech and voice disorders. This activity will be done the first day of class.
Clinical practice placement	The theoretical and practical contents will be taught to the whole group (Fundamentals, assessment, intervention and therapeutic programming) and every file will be attached to the Moodle platform previously teaching.
Simulation	In order to learn some therapeutic practical skills, working groups will perform a logopaedic intervention simulation in a supposed patient with dysphonia (Role Playing). ICT media can be used (video presentation, power-point with audios, chat by TEAMS, Moodle forum, etc.) and each group's student is going to have a different role (patient, evaluator/ra, programming, intervention). In this way, students will practice the theoretical knowledge, communication skills and problem solving in their teams. This activity will be done in a small group (5-6 students) and will be carried out virtually or in the class during interactive sessions. Any questions will be resolved in interactive sessions or in tutoring schedules. This activity computes for evaluation of the subject.
Online discussion	Activity to think about the theoretical contents with questions related to the topic and it will be done at the end or beginning of each master session for the whole group. The time considered for this activity is about 20 minutes with TEAMS platform.
Multiple-choice questions	Individual test to assess the knowledge and skills acquired during the learning of the subject. For this purpose, a test will be held on the official date. These tests will be done virtually, using the Moodle platform.
Critical bibliographical	The student will do a bibliographic review about a topic or a clinical aspect. This bibliographical search will be presented in a written report, synthesizing the most relevant found in the literature (introduction) in 6-7 pages. It will be accompanied by the references used, according to APA standards. Recent (last 5 years), quality, international and national contributions will be assessed, including at least 10 references in English. This bibliographic recession will compute in the final evaluation of the subject.

Personalized attention	
Methodologies	Description
Case study	Students will have a personalized attention to resolve doubts in practical activities (case studies, collaborative learning, ICT practices, virtual debate and bibliographic research).
Critical bibliographical	This attention will be offered to the students in the schedules in which these activities are developed (interactive sessions) or in the schedules of tutorials (Tuesday 10-14 hours, 2nd semester).
Simulation	
Online discussion	This personalized attention will preferably be virtual (TEAMS-chat platform, Moodle-forum). Student will do an appointment by email or TEAMS chat for better organization.

Assessment			
Methodologies	Competencies	Description	Qualification
Critical bibliographical	A7 A8 A14 A15 A17 B2 B5 B7 B9 B13 B21 B22 B24 C1 C6	About the evaluation criteria: capacity to synthesize, bibliographic quality - international and national reviews, last 5 years and from well-known and high-quality databases such as Web of Science, Scopus, PubMed, etc. - and correct written expression (spelling, narration and bibliographical references according to APA). The search will be about voice disorders and the document there will be in 6-7 pages plus 1 in order to include the references. It is an activity for working in group of 5-6 students.	10

Simulation	A1 A6 A7 A8 A13 A14 A15 A17 B18 B16 B15 B14 B13 B11 B9 B8 B7 B24 B20 B19 C1 C6 C7	Role playing in a case of dysphonia (group): Evaluation criterias: Same criteria as those presented in the case study. In addition, the following criterias will be considered: 1. Communication skills: sonority, clarity, diction and fluency in oral presentation. 2. Level of knowledge and use correct of technical terms. 3. Quality of the slides or video presented. 4. Spelling/ orthographic rules.	20
Multiple-choice questions	A1 A6 A7 A8 A13 A14 A15	Individual objective test to assess the knowledge and skills acquired during the learning of the subject. For this purpose, a test will be held on the official date. Incorrect answers will be penalized with 0.20 points. These tests will be taken virtually, using the Moodle platform.	70

Assessment comments

1. First opportunity: Once all the results of the assessment activities (group and individual) have been added together, you must obtain at least 5 points out of a possible 10 to pass the subject.
- Simulation 20% and Literature review 10% as group activities and Multiple choice test 70% as individual activity.
2. Second chance: in order to pass the subject at the second opportunity, students must obtain 5 points out of a possible 10 in a single multiple-choice test, which will take place on the official exam date and which counts for 100%.
3. Students with recognition of part-time dedication and academic dispensation of exemption from attendance will take a single multiple-choice test that counts for 100%, both in the first and in the second opportunity. They must inform the lecturer of this condition at the beginning of the semester in which the subject is taught.
4. According to article 11, section 4 b), of the UDC Student Discipline Regulations, in the case of plagiarism: The student will have the grade of suspension in the call in which the fault is committed and with respect to the subject in which the fault was committed: o/ the student will be graded with "suspension" (numerical grade 0) in the corresponding call of the academic year, whether the commission of the fault occurs in the first opportunity or in the second opportunity. To this end, their grade will be modified in the first opportunity report, if necessary.
