Methodologies				
Methodologies	Description			
Collaborative learning	Guided teaching-learning procedures (overseen in person and/or using ICT methods) based on organisation of class into small			
	groups in which students work together to solve tasks assigned by teacher, with aim of optimising their learning experience			
	and that of other members of group.			
Online forum	Informal discussion space for students to exchange ideas concerning specific problem or topic. Interaction takes place in			
	online learning environment using asynchronous communication tools			
ICT practicals	Practice-based learning method for theoretical subject content using ICT resources (demonstrations, simulations, etc.)			
Mixed	Mixed test consisting of essay-type and objective test questions. Essay section consists of open (extended answer) questions;			
objective/subjective	objective test may contain multiple-choice, ordering and sequencing, short answer, binary, completion and/or			
test	multiple-matching questions.			
Guest lecture /	Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning			
keynote speech				

Personalized attention

		This section will be 100% of the mark for students without semestral assessment.	
		In order to encourage the use of the English language in this subject, 0.25 extra points	
		will be awarded in each part to those students who choose to take their assessment	
		tests in that language. These points will be added once the subject is passed.	

Assessment comments

Students with part-time enrollment and academic grant of attendance exemption, as established by the "NORMA QUE REGULA EL RÉGIMEN DE DEDICACIÓN AL ESTUDIO DE LOS ESTUDANTES DE GRADO Y MASTER EN LA UDC (Arts. 2.3; 3.b; 4.3 and 7.5) (05/04/2017) may take the mid-term exams, if any, without having to attend 80% of the face-to-face classes, as long as the professors are duly informed at the beginning of the course. Regardless of the foregoing, the professors may assign these students with different assignments/ problems throughout the course to be presented during tutorials, using the TEAMS system if appropriate in the teacher's opinion.

The fraudulent completion of exams or assessment activities, once confirmed, will result directly in a failing grade in the respective exam session: the student will be graded as "fail" (numerical grade of 0) in the corresponding academic year's exam session, whether the misconduct occurs in the first opportunity or the second. In this regard, their grade will be modified in the first opportunity's record, if necessary.

The assessment critieria reflected on table A-II/1 of the STCW Code, and also reflected in the Quality System, are taken into account to design and perform the assessment.
