|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methodologies | Description |
| Student portfolio | It is a folder or filing cabinet ordered by sections, duly identified or labeled, that contains the records or materials resulting from the learning activities carried out by the student over a period of time, with the comments and grades assigned by the teacher, which makes it possible to visualize the student's progress The portfolio includes everything the student does, such as: notes or class notes, research papers, work guides and their development, comments on notes, summaries, written tests, self-assessments, tasks developed, comments on student progress performed by the teacher, etc. |

|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Guest lecture / keynote speech | Oral presentation complemented with the use of audiovisual media and oral introduction of some questions addressed to students, in order to transmit knowledge and facilitate learning. The master class is also known as lecture, "expository method" or "master class". This last modality is usually reserved to a special type of lesson given by a teacher on special occasions, with a content that supposes an original elaboration and based on the almost exclusive use of the word as a way of transmitting the information to the audience. |
| Collaborative learning | Set of teaching-learning procedures guided in person and / or supported by information and communication technologies, which are based on the organization of the class into small groups in which students work together to solve tasks assigned by teachers to optimize their own learning and that of the other members of the group. |
| Simulation | Intervención inherente aos procesos de ensino-aprendizaxe. Exponse ao alumnado ante condicións hipotéticas nas que se pon a proba o seu comportamento ante situacións concretas, os seus coñecementos, a súa capacidade de analizar alternativas e as súas consecuencias. Baséase polo tanto, na configuración de situacións similares ás que se producen nun contexto real, coa finalidade de utilizalas como experiencias de aprendizaxe ou como procedemento para a avaliación. |
| Document analysis | Methodological technique that involves the use of audiovisual and / or bibliographic documents (fragments of documentary reports or films, current news, graphic panels, photographs, biographies, articles, legislative texts, etc.) relevant to the subject matter with activities specifically designed for the analysis of them. It can be used as a general introduction to a topic, as an instrument for the application of case studies, for the explanation of processes that can not be observed directly, for the presentation of complex situations or as a synthesis of contents of a theoretical or practical nature. |
| Mixed objective/subjective test | Proba que integra preguntas tipo de probas de ensaio e preguntas tipo de probas obxectivas. En canto a preguntas de ensaio, recolle preguntas abertas de desenvolvemento. Ademais, en canto preguntas obxectivas, pode combinar preguntas de resposta múltiple, de ordenación, de resposta breve, de discriminación, de completar e/ou de asociación. |

Personalized attention

| Methodologies | Description |
|-------------------|--------------------------------------------------------------------------------------------------------------------------|
| Student portfolio | It will require a personal tracking of the work done in the portfolio, which will be a key item in the final evaluation. |
| Simulation | Likewise, work will be done directly with the small groups that are formed to develop the proposed works |

| Student portfolio | A12 B5 B10 B7 B9 C3 C1 C4 C7 | In the portfolio will be collected the activity carried out in the interactive sessions, its evaluation; as well as the reflections generated in the group. | 50 |
| Simulation | A12 B12 C3 C1 C4 C7 | Consistirá na representación do traballo realizado na aula. | 20 |
| Mixed objective/subjective test | C7 | Proba que integra preguntas tipo de probas de ensaio e preguntas tipo de probas obxectivas. En canto a preguntas de ensaio, recolle preguntas abertas de desenvolvemento. Assessment comments

In order for the students to be evaluated according to the previous planning, they must have an attendance to the classes of 80%.

To pass the subject they must pass the mixed test and the group portfolio. In the portfolio the evaluation can be different for each member of the group, subject to the degree of involvement shown by each person. In the oral presentation, all the members of the group must participate in order to be evaluated. In case of not approving one of them, the final grade of the subject will be a maximum of 4 points (corresponding to a 10 in the portfolio). THE STUDENT WHO ATTENDS LESS THAN 80% OF THE CLASSES, must take a theoretical-practical examination that will be 100% of the final grade.
