| Descripción general | The main objective of this course is to provide the students with the essential concepts behind the latest and most popular Industry 4.0 enabling technologies, together with knowledge regarding the threats which could affect industrial connected systems. | | | |

| Competencias / Resultados del título | |
|--------------------------------------|---|
| Código | Competencias / Resultados del título |
| A3 | CE3 - Demonstrate knowledge, understanding and competences in applying information systems and data management tools during ship design, construction and operation (IDM). |
| B2 | CB6 - Acquire and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, usually in a research context. |
| B3 | CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study. |
| B4 | CB8 - That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments. |
| B5 | CB9 ? That students are able to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized publics in a clear and unambiguous way. |
| B6 | CB10 - That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous. |
| B7 | CG1 ? To display the adequate intercultural competence to successfully navigating within multicultural learning environments and to implement basic management principles suitable for a multicultural working environment. |
| B8 | CG2 ? To express an attitude of intellectual inquisitiveness and open-mindedness. |
| B10 | CG4 ? To have the capability to think creatively and explore new ideas outside of current boundaries of the field |
| B13 | CG7 ? To have the capability to critically analyse, synthesise, interpret and summarise complex scientific processes. |
| C2 | CT2 - Mastering oral and written expression in a foreign language. |
| C3 | CT3 - Using ICT in working contexts and lifelong learning. |
| C4 | CT4 - Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective. |
| C6 | CT6 - Acquiring skills for healthy lifestyles, and healthy habits and routines. |
| C7 | CT7 -Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development. |
| C8 | CT8 -Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society. |

| Metodologías / pruebas | Competencias / Resultados | Horas lectivas (presenciales y virtuales) | Horas trabajo autónomo | Horas totales |
| Sesión magistral | B2 C8 | 19 | 19 | 38 |
| Prácticas a través de TIC | A3 B3 B6 C3 | 9 | 9 | 18 |
| Trabajos tutelados | B2 B3 B5 B7 B8 B10 B13 C4 C6 C7 | 9 | 45 | 54 |
| Presentación oral | B5 C2 | 1 | 10 | 11 |
| Prueba mixta | B4 C2 | 1 | 25 | 26 |
| Atención personalizada | | 3 | 0 | 3 |

(*) Los datos que aparecen en la tabla de planificación són de carácter orientativo, considerando la heterogeneidad de los alumnos

Metodoloxías

| Metodoloxías | Descrición |
|---------------------------|---|
| Sesión magistral | Lectures on the content of the subject |
| Prácticas a través de TIC | ICT practicals to put in practice the concepts learned on the lectures |
| Trabajos tutelados | Project to put in practice the concepts learned in the theory lectures and the ICT practicals |
| Presentación oral | Oral presentation on the results of the supervised project |
| Prueba mixta | Test to assess the learned practical and theoretical concepts |

Atención personalizada

| Metodoloxías | Descrición |
|---|---|
| Trabajos tutelados Prácticas a través de TIC | The professors will tutor the students and will guide them during the practical lessons and the supervised project. |

Evaluación

| Metodoloxías | Competencias / Resultados | Descrición | Calificación |
|---------------------------|------------------------------------|--|--------------|
| Trabajos tutelados | B2 B3 B5 B7 B8 B10 B13 C4 C6 C7 | Evaluation of a deliverable whose development fuses theory and practice, and which is guided by the professors | 30 |
| Presentación oral | B5 C2 | Evaluation of a oral presentation on the results of the supervised project | 10 |
| Prácticas a través de TIC | A3 B3 B6 C3 | Evaluation of the results and knowledge acquired during the ICT practicals | 20 |
| Prueba mixta | B4 C2 | Evaluation of the competences acquired in the subject | 40 |

Observaciónes evaluación

FIRST CALL

The practical part of the subject will consist in developing practical examples about the content of the theory lessons. Its evaluation will be performed progressively, with clear deadlines. Such a practical part could be replaced with the development of a mobile application or a individual assignment. The objective test will be divided into two parts: one oriented towards evaluating the practical developments and a second one about the theoretical content.

SECOND CALL

The students will have the opportunity to maintain the marks obtained during the ICT practicals and the supervised project. Such students will carry out a mixed test, establishing the final mark according to the same percentages applied for the first call. The rest of the students will take a single mixed test (60% of the total mark) and will carry out a supervised project (40% of the total mark).

OTHER COMMENTS

The fraudulent performance of tests or assessment activities, once verified, will directly involve the qualification of failed in the call in which it is committed: the student will be qualified with "failed" (numerical grade 0) in the corresponding call of the academic year, both if the offense is committed in the first opportunity as in the second. For this, the qualification will be modified in the first opportunity report, if necessary.

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:

- Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree.
- No part time or lecture attendance exemption are allowed in this degree.

All aspects related to "academic exemption," "study dedication," "continuity," and "academic fraud" will follow current academic regulations of UDC.

Otros comentarios

This subject will comply with the different regulations for university teaching, respecting the gender perspective (e.g. non-sexist language will be used).To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmental and socially sustainable research and teaching):The assignments to be done in this course:- Will be required in digital format.- Will be delivered using Moodle, with no need to print them.In case it is necessary to print them:- Plastics won't be used.- Two side printing will be used.- Recycled paper will be used.- Printing drafts will be avoided.A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment. In this course, an effort will be pursued towards the incorporation of gender inclusion aspects: no sexist language will be allowed, bibliography from authors of both genders will be used, and the participation of students of both gender in class will be promoted. The situations of gender discrimination will be detected, and actions will be implemented to correct them. The full integration of students who for physical, sensorial, psychic, or socio-cultural reasons may have difficulties in their academic life will be promoted.
