Descrición xeral	The objective of this course is to provide students with knowledge in the field of digital twins of marine systems, including the requirements, architecture and components necessary to develop one of these systems.			

Competencias / Resultados do título	
Código	Competencias / Resultados do título

Resultados da aprendizaxe		
Resultados de aprendizaxe	Competencias / Resultados do título	
Knowledge of the concept, structure and design constraints of digital twins applicable to the maritime sector.		BM6 CM2
Ability to develop a basic approach to a digital twin.		BM7 CM3
		BM9 CM4
		BM10 CM6
		BM11 CM7
		BM12 CM8

Contidos	
Temas	Subtemas
1. Introduction	a. Industry 4.0 overview b. Basic concepts of Digital Twins c. Digital Twin for ships
2. Ship. Ship systems. Sensorization.	a. Ships and ship systems b. Ship sensorization
3. Simulation models	a. Physics based models vs data driven models. b. Modeling of the arquitectura of basic simulations and development of basic simulations models. c. Preparation of models for FMU export. Export types (co-simulación, real time, etc.) and their implications. d. Running the simulation models in the digital twin environment e. Co-simulation of FMUs.
4. Data Analysis	a. Data analytics and machine learning application.
5. Edge solutions and cloud solutions for digital twin	a. Edge solutions b. Cloud solutions
6. Practicas use cases	a. Practical use cases

Planificación

Metodoloxías / probas	Competencias / Resultados	Horas lectivas (presenciais e virtuais)	Horas traballo autónomo	Horas totais
Sesión maxistral	B12 C3	20	20	40
Prácticas a través de TIC	C7	20	40	60
Proba mixta	B7 B8 B10 C2 C4 C6	1.5	0	1.5
Traballos tutelados	B11 B13 C8	1.5	45	46.5
Atención personalizada		2	0	2

*Os datos que aparecen na táboa de planificación son de carácter orientativo, considerando a heteroxeneidade do alumnado

Metodoloxías

Metodoloxías	Descrición
Sesión maxistral	Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning. Presentations of this type are variously referred to as 'expository method', 'guest lectures' or 'keynote speeches'. (The term 'keynote' refers only to a type of speech delivered on special occasions, for which the lecture sets the tone or establishes the underlying theme; it is characterised by its distinctive content, structure and purpose, and relies almost exclusively on the spoken word to communicate its ideas.)
Prácticas a través de TIC	Practice-based learning method for theoretical subject content using ICT resources (demonstrations, simulations, etc.) ICT is an excellent medium for practical knowledge applications and information processing, and a key aid to student learning and skills development.
Proba mixta	The mixed objective will consist of an oral presentation about the supervised project.
Traballos tutelados	Supervised learning process aimed at helping students to work independently in a range of contexts (academic and professional). Focused primarily on learning 'how to do things' and on encouraging students to become responsible for their own learning. In this course, the supervised project will consist on a group based technical work based on an assignment done by the professors, and dealing about some of the topics of the course.

Atención personalizada

Metodoloxías	Descrición
Sesión maxistral Prácticas a través de TIC Traballos tutelados	Students personal attention could be in class or through Teams. The student will be monitored during the completion of the project.

Avaliación

Metodoloxías	Competencias / Resultados	Descrición	Cualificación
Traballos tutelados	B11 B13 C8	In this course, the supervised project will consist on a group based technical report based on an assignment done by the professors, and dealing about some of the topics of the course. The qualification of the group based technical report will represent a 80 % of the student's final qualification.	80
Proba mixta	B7 B8 B10 C2 C4 C6	The mixed objective will consist of an oral presentation about the supervised project. The qualification of the oral presentation will represent a 20 % of the student's final qualification.	20

Observacións avaliación

According to the degree regulations, the students will have the opportunity to pass this course in two opportunities (first and second opportunity). The evaluation of the total mark will be the same both in the first opportunity and in the second opportunity.

General EMJMD Sustainable Ship and Shipping SEAS 4.0 evaluation rules:

- Students will have only two opportunities to pass a course. If failing to do so, they may be forced to leave the degree.
- No part time or lecture attendance exemption are allowed in this degree.

Observacións

To help in achieving a sustainable environment and to get the objective of number 5 action of the "Ferrol Green Campus Action Plan" (Healthy and environmentally and socially sustainable research and teaching): The assignments to be done in this course:- Will be required in digital format.- Will be delivered using Moodle, with no need to print them. In case it is necessary to print them:- Plastics won't be used.- Two side printing will be used.- Recycled paper will be used.- Printing drafts will be avoided. A sustainable use of the resources should be done, together with the prevention of negative impacts on the environment. In this course, an effort will be pursued towards the incorporation of gender inclusion aspects: no sexist language will be allowed, bibliography from authors of both genders will be used, and the participation of students of both gender in class will be promoted. The situations of gender discrimination will be detected, and actions will be implemented to correct them. The full integration of students who for physical, sensorial, psychic, or socio-cultural reasons may have difficulties in their academic life will be promoted.
