General description	In increasingly globalized and competitive environments, the figure of the entrepreneur acquires a leading role in the economic and social context of a community, especially the creation of high added value companies based on development of scientific and technological advances in strategic sectors such as dynamic element of growth. This subject is part of the Master's Degree in Molecular, Cellular and Genetic Biology. The main contributions of the subject are: understanding the importance of entrepreneurial culture, learning how to start a business and analyzing the context, as well as evaluating the opportunities and risks of entrepreneurial actions.

Methodologies	
Methodologies	Description
Supervised projects	<p>Methodology designed to promote autonomous learning of students, under the tutelage of the teacher and in various scenarios (academic and professional). It refers primarily to learning &quot;how to do things&quot;. It constitutes an option based on the assumption by students of responsibility for their own learning.</p> <p>This teaching system is based on two basic elements: the independent learning of the students and the monitoring of that learning by the teacher-tutor.</p>
Seminar	Group work technique whose purpose is the intensive study of a topic. It is characterized by the discussion, participation, preparation of documents and the conclusions that all the components of the seminar have to reach.
Guest lecture / keynote speech	<p>Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning.</p> <p>Presentations of this type are variously referred to as 'expository method', 'guest lectures' or 'keynote speeches'. (The term 'keynote' refers only to a type of speech delivered on special occasions, for which the lecture sets the tone or establishes the underlying theme; it is characterised by its distinctive content, structure and purpose, and relies almost exclusively on the spoken word to communicate its ideas.)</p>

Personalized attention	
Methodologies	Description
Supervised projects	All doubts raised in the tutorial hours will be addressed via Teams

Assessment comments

1. Assessment conditions: It is forbidden to access the exam room with any device that allows communication with the outside and / or storage of information.
 2. Identification of the student: students must prove their personality in accordance with current regulations.
- B) TYPES OF RATING:**
1. No-show grade: when students only participate in assessment activities that have a weighting of less than 20% on the final grade, regardless of the grade achieved.
 2. Students with recognition of part-time dedication and academic waiver of attendance exemption: Except for the dates approved in the Faculty Board for the final objective test, for the remaining tests a specific calendar of compatible dates will be agreed at the beginning of the course with your dedication. The evaluation will follow the same criteria as full-time students.
 1. First opportunity: the evaluation criteria previously indicated in this section will be applied.
 2. Second Chance: The evaluation criteria are the same for all evaluation opportunities.
 3. Early call: in the early call it is possible to recover the points of the continuous evaluation by means of additional questions to the final objective test.

Other comments

1. The delivery of the documentary works that are carried out in this subject: a. It will be requested in virtual format and/or computer support b. It will be done through Moodle, in digital format without the need to print them
2. The importance of ethical principles related to sustainability values in personal and professional behavior must be taken into account.
3. Work will be done to identify and modify prejudices and sexist attitudes and the environment will be influenced to modify them and promote values of respect and equality.
4. As stated in the different applicable regulations for university teaching, the gender perspective is incorporated in this matter and in the event of detecting discrimination based on gender, actions and measures will be proposed to correct them.
5. The full integration of students who, for physical, sensory, psychological or sociocultural reasons, experience difficulties in gaining adequate, equal and beneficial access to university life will be facilitated.
