| <b>General description</b> | This subject intends to introduce students to the basic aspects of animal biotechnology. Main aspects involve the understanding of the fundamentals of molecular tools for the study of genomes and how molecular markers allow for species identification, population analysis and development of genetic improvement programs. Also the knowledge of tools and application of technologies for chromosomal manipulation and in vitro fertilization. |               |  |         |

| Study programme competences / results |  |
|---------------------------------------|--|
| Code                                  | Study programme competences / results  |
| A21                                   | Coñecer os recursos microbianos, vexetais e animais de interese biotecnolóxico así como as súas aplicacións na industria alimentaria e agropecuaria. |
| A24                                   | Coñecer as estratexias de produción e mellora de alimentos por métodos biotecnolóxicos.  |

|     |  |
|-----|--|
| B1  | Capacidade de análise e síntese (localización de problemas e identificación das causas e a súa tipoloxía).   |
| B2  | Capacidade de organización e planificación de todos os recursos (humanos, materiais, información e infraestruturas).   |
| B3  | Capacidade de xestión da información (con apoio de tecnoloxías da información e as comunicacións).   |
| B4  | Capacidade de planificación e elaboración de estudos técnicos en biotecnoloxía microbiana, vexetal e animal.   |
| B5  | Capacidade de identificar problemas, buscar solucións e aplicarlas nun contexto biotecnolóxico profesional ou de investigación.  |
| B6  | Capacidade de comunicación oral e escrita dos plans e decisións tomadas.   |
| B7  | Capacidade para formular xuízos sobre a problemática ética e social, actual e futura, que propón a Biotecnoloxía.  |
| B8  | Capacidade de comunicación eficazmente coa comunidade científica, profesional e académica, así como con outros sectores e medios de comunicación.  |
| B9  | Capacidade de Traballo en equipo multidepartamental dentro da empresa.   |
| B10 | Capacidade de Traballo nun contexto de sostibilidade, caracterizado por: sensibilidade polo medio ambiente e polos diferentes organismos que o integran así como concienciación polo desenvolvemento sostible. |
| B11 | Racionamento crítico e respecto profundo pola ética e a integridade intelectual.   |
| B12 | Adaptación a novas situacións legais, ou novidades tecnolóxicas así como a excepcionalidades asociadas a situacións de urxencia.   |
| B13 | Aprendizaxe autónoma.  |
| B14 | Liderazgo e capacidade de coordinación.  |
| B15 | Sensibilización cara á calidade, o respecto medioambiental e o consumo responsable de recursos e a recuperación de residuos.   |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies                  |   |
|--------------------------------|---|
| Methodologies                  | Description   |
| Guest lecture / keynote speech | Lectures will be given by the course teachers in order to convey a general knowledge of the subject.<br>Lectures will be held by videoconference and dialogue between students and teachers will be encouraged. |
| Laboratory practice            | Visit a laboratory where biotechnology tools are used for animal reproduction   |
| ICT practicals                 | Knowledge application activity based on the use of computer resources. It will be carried out under the guidance of a teacher.  |
| Supervised projects            | Students, in groups or individually, will write an essay about some aspect of the subject   |
| Objective test                 | This test will be used to assess the knowledge acquired in this subject. It may consists of the following types of questions: multiple choice, true/false, short answer and/or association.                     |

| Personalized attention |   |
|------------------------|---|
| Methodologies          | Description   |
| Supervised projects    | Custom and group tutorial sessions are possible, either in person or via videoconference, for advice on jobs and to review any subject-related issue. |

| Assessment     |                        |   |               |
|----------------|------------------------|---|---------------|
| Methodologies  | Competencies / Results | Description   | Qualification |
| ICT practicals | A24 A21 B2 B3          | The degree of understanding of analyzes carried out and the skill with bioinformatics tools used will be evaluated. | 10            |

|                                |                                       |   |    |
|--------------------------------|---------------------------------------|---|----|
| Supervised projects            | A21 A24 B1 B2 B6 B7<br>B8 B10 B13 B14 | Originality, degree of understanding of the topic, ability to synthesize and review and consulted literature sources will be evaluated. | 20 |
| Guest lecture / keynote speech | A21 A24 B11 B12<br>B15                | Attitude attendance and participation in the dialogues promoted by teachers will be evaluated.  | 15 |
| Laboratory practice            | A21 A24 B9                            | Attendance at practices will be assessed. Students will respond to a questionnaire on visit they make.                                  | 15 |
| Objective test                 | A21 A24 B1 B3 B4 B5<br>B6             | The objective test will allow the student to demonstrate mastery of the knowledge acquired on basic issues of the subject.              | 40 |

**Assessment comments**

To be assessed it is necessary to take the objective test.

Preferably, first class honors will be awarded in June among students with a score of 9 or higher.

The grade of Non Attendance (NP) will be applied to students that do not complete any of the proposed activities.

In the case of justified exceptional circumstances, additional measures may be taken, so that the student can pass the subject.

**Recommendations**

**Subjects that it is recommended to have taken before**

Genetic Engineering and Transgenetics /610475101

Cellular and Tissue Engineering/610475102

Genomics and Proteomics/610475103

**Subjects that are recommended to be taken simultaneously**

Organisation and management of a laboratory/610475201

Legal and ethical aspects in Biotechnology/610475203

Analysis of foodstuff. food security and traceability /610475302

**Subjects that continue the syllabus**

Assisted reproduction technology/610475502

**Other comments**

Recommendations: Students are recommended to have the necessary English level to understand scientific information sources for the proper learning of the skills of the subject. Follow the development of the course regularly. Check Moodle/Faitic and email to obtain materials and know the schedule of activities. Attend tutorials to resolve any questions or difficulties that may arise. Consult the recommended bibliography.

(\*) The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
