General description	A industria química está suxeita	a unha estricta	lexislación en ma	ateria de seguridade labo	oral. Por iso o profesional da		
	química debe de coñecer todos a	aqueles aspecto	os que poden da	r lugar a situación de risc	co no solo para as persoas si non		
	tamén, para os bens e o medioa	mbiente.					
	A seguridade das persoas, dos t	raballadores e o	do medioambient	e son fundamentáis, ho	e en día, e cada vez máis nas		
	empresas. A xestión da seguridade industrial evita grandes gastos nas empresas xa que as catástrofes xeradas por unha						
	inadecuada xestión se resolven pola vía do código civil e evita que os profesionais se teñan que enfrontar á vía do código						
	penal. Ademas, de xerar unha m	ala imaxe das e	empresas na soc	iedade.			
Contingency plan	1. Modifications to the contents						
	- There are no modifications.						
	2. Methodologies						
	*Teaching methodologies that an	e maintained					
	- All teaching methodologies are	maintained (ma	agisterial session	, seminars and objective	test).		
	*Teaching methodologies that an	e modified					
	The teaching methodologies will be adapted to the hybrid modality:						
	- The master sessions and seminars will be held synchronously at the time established in the calendar of activities, through						
	the Teams platform.						
	the reams platform.				the calendar of activities, throug

Study programme competences / results

Code	Study programme competences / results
A2	Suggest alternatives for solving complex chemical problems related to the different areas of chemistry.
A5	Properly assess risks and environmental and socioeconomic impacts associated with special chemicals
A6	Design processes involving the treatment or disposal of hazardous chemicals
A9	Promote innovation and entrepreneurship in the chemical industry and in research.
B1	Possess knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often within a
	research context
B4	Students should be able to communicate their conclusions, and the knowledge and the reasons that support them to specialists and
	non-specialists in a clear and unambiguous manner
B5	Students must possess learning skills to allow them to continue studying in a way that will have to be largely self-directed or autonomous.
B9	Demonstrate ability to analyze, describe, organize, plan and manage projects
B10	Use of scientific terminology in English to explain the experimental results in the context of the chemical profession
B11	Apply correctly the new technologies to gather and organize the information to solve problems in the professional activity.
B12	Being able to work in a team and adapt to multidisciplinary teams.
C1	CT1 - Elaborar, escribir e defender publicamente informes de carácter científico e técnico
C3	CT3 - Traballar con autonomía e eficiencia na práctica diaria da investigación ou da actividade profesional.
C4	CT4 - Apreciar o valor da calidade e mellora continua, actuando con rigor, responsabilidade e ética profesional.

	Methodologies
Methodologies	Description
Guest lecture /	Twelve full group class sessions by videoconference are scheduled. The students will have access to the different materials
keynote speech	through the Moodle platform of the UDC.
Seminar	During the seminar classes, exercises and case studies will be discussed. The student should also develop different papers
	and written reports and present them orally.
Objective test	The objective test will consist of theoretical, practical and/or theoretical-practical questions about all the contents of the
	subject.

	Personalized attention
Methodologies	Description
Seminar	Students with appreciation a part-time academic and attendance waiver of exemption may complete the seminars in individual
	and/or group tutoring schedule to be agreed with the teachers. The activities undertaken in these tutorials will be similar to
	those of students in ordinary regime and consideration for the final assessment.

Assessment			
Methodologies	Competencies /	Description	Qualification
	Results		

Seminar	B1 B4 B9 B10 B11	Ongoing evaluation will be the 45% of the final mark and will consist of the following	45
	B12	parts: Problem solving and case studies (15%), writing reports (10%), oral	
		presentations (papers, 10%) and evaluation through oral questions and questions	
		during the course (10%).	
Objective test	B1 B5 B12	The objective test will consist of theoretical, practical and/or theoretical-practical	55
		questions about all the contents of the subject.	

Assessment comments

Taking into account that, in the industry, the development of writing reports and oral presentations is important, it will be valued: - Clarity.

Clarity.

- Non-spelling errors.

- Quick response of the writing reports to be presented by the student.

In the case of students with recognition of part-time dedication and academic assistance waiver, the qualification of the seminars will be replaced by that obtained in the personal tutorials.

Students who attend fewer than 25% of planned academic activities and do not assist to the objective test, will be qualified as "Not presented".
