General description	This course aims to develope the as a small introduction to linear alg	2		knowledge in differen	tial and integral calculus as w	

Contingency plan	1. Modifications to the contents
	No changes will be made.
	2. Methodologies
	*Teaching methodologies that are maintained
	Supervised projects.
	Personalized attention.
	*Teaching methodologies that are modified
	Guest lecture / keynote speech: Attendance in person is replaced by material (PDF, videos) available in Moodle.udc.es
	and by video conference using Teams platform.
	Problem solving: compute in the assessment. The attendance is replaced by material (PDF, videos) available in
	Moodle.udc.es and video conference using Teams platform.
	Multiple-choice questions: compute in the assessment. The following changes will be made:
	(a) Tests related to the practical part of Mathematics will take place on line on moodle.udc.es
	(b) Tests related to the theoretical part will be take place on line on moodle.udc.es.
	3. Mechanisms for personalized attention to students
	E-mail: daily to ask for virtual meetings in order to answer queries and to supervised the students work.
	Moodle: daily, taking into account the needs of the students. Thematic forums associated to the modulus of the course, to
	ask the necessary queries.
	Teams: a weekly session in large groups to advance the theoretical content and supervised tasks at the time assigned to
	the subject in the teacher's classroom calendar. There may also be weekly sessions or as requested by students in small
	groups, for follow-up and support in doing supervised work. This dynamic allows a standardized and adjusted monitoring of
	the student's learning needs to develop the work of the subject.
	4. Modifications in the evaluation
	Multiple-choice questions: 30%
	Other methodologies: 70%
	*Evaluation observations:
	1. Regular attendance and participation to the course activities.
	 Sen supervised projects in the fixed date.
	3. Get a minimum of 50% of the total score.
	4. The July opportunity will be subject to the same criteria as the June opportunity.
	5 Modifications to the hiblingraphy or webgraphy
	5. Modifications to the bibliography or webgraphy
	No changes will be made. All the materials are digitized in Moodle.

	Study programme competences		
Code	Study programme competences		
A15	Ability to recognise and analyse new problems and develop solution strategies		
A16	Ability to source, assess and apply technical bibliographical information and data relating to chemistry		
A20	Ability to interpret data resulting from laboratory observation and measurement		

A24	Ability to explain chemical processes and phenomena clearly and simply
A25	Ability to recognise and analyse link between chemistry and other disciplines, and presence of chemical processes in everyday life
A27	Ability to teach chemistry and related subjects at different academic levels
B1	Learning to learn
B2	Effective problem solving
B3	Application of logical, critical, creative thinking
B6	Ethical, responsible, civic-minded professionalism
C1	Ability to express oneself accurately in the official languages of Galicia (oral and in written)
C3	Ability to use basic information and communications technology (ICT) tools for professional purposes and learning throughout life
C6	Ability to assess critically the knowledge, technology and information available for problem solving

Learning outcomes				
Learning outcomes		Study programme		
		competences		
The study, representation and interpretation of elementary functions of one and several variables		B2	C6	
		B3		
Skillful use of primitive calculation techniques and their applications		B2	C6	
		B3		
Solve systems of linear equations and operate with matrix calculus		B2	C6	
		B3		
State and solve simple models involving equations and systems of differential equations.	A15	B1	C1	
	A16	B2	C3	
	A20	B3	C6	
	A24	B6		
	A25			
	A27			

	Contents		
Торіс	Sub-topic		
? Differentiation	o Basic Rules of Differentiation.		
	o The Chain Rule.		
	o Techniques Differentiation.		
	o L'Hôpital's Rule. Taylor's Theorem.		
	o Applications of Differentiation.		
	o Maxima and Minima.		
	o Optimisation Problems.		
	o The Newton-Raphson Method.		

? Integration	o Integration as Summation.		
	o Fundamental Theorem of Calculus.		
	o Some Basic Integrals.		
	o Integration by Substitution.		
	o Integration by Parts.		
	o Integration of Rational Functions.		
	o Geometrical Applications of Integration.		
	o Numerical Integration. Simpson's Rule.		
	o Improper Integrals.		
	Integración numérica: método de Simpson.		
	Integrales impropias.		
? Ordinary Differential Equations.	o First Order Differential Equations.		
	o Separable First Order Differential Equations.		
	o Linear First Order Differential Equations.		
	o Applications of First Order Differential Equations.		
	o Second Order Linear Differential Equations with Constant Coefficients.		
	o Homogeneous Linear Systems with Constant Coefficients.		
? Linear Algebra	o Systems of Linear Equations		
C C	o Elementary operations.		
	o The Algebra of Matrices.		
	o Determinants. Basic properties.		
	o The determinant rank.		
	o Eigenvalues and Eigenvectors.		
	o Normal forms for matrices.		
	o Cayley-Halmiton theorem.

Methodologies			
Methodologies	s Description		
Guest lecture /	concept development and problem solving		
keynote speech			
	Contingency plan (by mor do Covid19):		
	Teams: in weekly sessions in the time slot assigned to the subject in the faculty classroom calendar.		
Problem solving	Questionnaires, bulletins and exams of other courses that will be periodically made available to students on different content and that students will have to solve.		
	Contingency plan (by mor do Covid19):		
	Teams: in weekly sessions in the time slot assigned to the subject for a small group in the faculty classroom calendar.		

Supervised projects	Work on topics proposed by the teacher, a theoretical summary will be presented along with a bulletin of problems solved on
	the corresponding topic
	Contingency plan (by mor do Covid19):
	Teams: in weekly sessions in the time slot assigned to the subject for a small group in the faculty classroom calendar.
Multiple-choice	Multiple choice test
questions	
	Contingency plan (by mor do Covid19):
	The test will be carried out via Moodle and Teams.

	Personalized attention		
Methodologies	Description		
Supervised projects	The personalized attention described in relation to these methodologies is conceived as face-to-face moments of work for the		
	students with the teacher, for which they imply a participation for the students; the form and the moment in which it will be		
	carried out will be indicated in relation to each activity throughout the course according to the work plan of the subject.		
	The specific personalized attention measures for or "Students with recognition of part-time dedication and academic		
	exemption from attendance exemption" for the study of the subject, will be delivery of questionnaires, bulletins and exams of		
	other courses that will be periodically made available to the students about different contents and that the student will have to		
	solve.		
	Contingency plan (by mor do Covid19) ?Email: Daily. Of use to make consultations, request virtual meetings to resolve doubts and follow up on supervised work. ?Moodle: Daily to formulate the necessary queries. ?Teams: weekly sessions in the time slot assigned to the subject in the faculty classroom calendar.		

Assessment			
Methodologies	Competencies	Description	Qualification
Multiple-choice	A15 A16 A20 A24	Multiple-choice questions	60
questions	A25 A27 B1 B2 B3 B6		
	C1 C3 C6		
Problem solving	A15 B2 B3 C6	Delivery of exercises and solved exams. Competences A15, B2 and C3 will be assessed.	20
Supervised projects	A15 B2 B3 C6	Development of specific aspects with examples and solved problems. Competence B3 will be assessed.	10
Guest lecture / keynote speech	A15 B3 B2 C6	Questions to the students.	10

Assessment comments

To pass the course, it will be necessary to obtain, added the marks of all the activities, a minimum grade of 50% of the total. To obtain the grade of not presented, it will be sufficient that the student does not participate in the multiple-choice test and has not been evaluated in the supervised Works in more than 50%. In the second chance test, the criterion to pass the subject will be the previous one or to obtain a grade of not less than 50% in the multiple choice test. With regard to successive academic courses, the teaching-learning process, including assessment, refers to one academic course, and therefore a new course would be restarted, including all assessment activities and procedures that were scheduled for that course; however, it is allowed to request to maintain the practical qualification of a previous course.

Students enrolled in part-time regime and academic exemption from attendance exemption, can be evaluated in a personalized way regarding the methodologies of Maxistral Session, Problem Solving and Tutored Jobs. Students enrolled in part-time regimen are required to sit the multiple-choice test, as well as the partial tests throughout the course. For the first and second opportunity, the evaluation criteria for this student body is the same as for the others and the attendance waiver percentage will be 80%.

Students at the first opportunity have priority in the granting of honors.

Contingency plan (Covid19):

If the multiple-choice test is not face-to-face, it will have a percentage of 30% and the other methodologies 70%

They have priority in the granting of matrícula of honour the students at the earliest opportunity.

Recommendations		
Subjects that it is recommended to have taken before		
Subjects that are recommended to be taken simultaneously		
Subjects that continue the syllabus		
Other comments		
It is convenient to have knowledges of mathematics of 2 bachillerato, if		
it does not have them recommend do the course of nivelación.
