| General description | This course aims to develope the necessary skills to obtain a critical knowledge in differential and integral calculus as well as a small introduction to linear algebra and differential equations. |  |  |  |  |

|  |  |
| :---: | :--- |
| Code | Study programme competences |
| A15 | Ability to recognise and analyse new problems and develop solution strategies |
| A16 | Ability to source, assess and apply technical bibliographical information and data relating to chemistry |
| A20 | Ability to interpret data resulting from laboratory observation and measurement |
| A24 | Ability to explain chemical processes and phenomena clearly and simply |
| A25 | Ability to recognise and analyse link between chemistry and other disciplines, and presence of chemical processes in everyday life |
| A27 | Ability to teach chemistry and related subjects at different academic levels |
| B1 | Learning to learn |
| B2 | Effective problem solving |
| B3 | Application of logical, critical, creative thinking |
| B6 | Ethical, responsible, civic-minded professionalism |
| C1 | Ability to express oneself accurately in the official languages of Galicia (oral and in written) |
| C3 | Ability to use basic information and communications technology (ICT) tools for professional purposes and learning throughout life |
| C6 | Ability to assess critically the knowledge, technology and information available for problem solving |
|  |  |

| Learning outcomes |  |  |  |
| :---: | :---: | :---: | :---: |
| Learning outcomes | Study programme competences |  |  |
| The study, representation and interpretation of elementary functions of one and several variables | A15 | $\begin{aligned} & \text { B2 } \\ & \text { B3 } \end{aligned}$ | C6 |
| Skillful use of primitive calculation techniques and their applications | A15 | $\begin{aligned} & \text { B2 } \\ & \text { B3 } \end{aligned}$ | C6 |
| Solve systems of linear equations and operate with matrix calculus | A15 | $\begin{aligned} & \text { B2 } \\ & \text { B3 } \end{aligned}$ | C6 |
| State and solve simple models involving equations and systems of differential equations. | A15 <br> A16 <br> A20 <br> A24 <br> A25 <br> A27 | $\begin{aligned} & \text { B1 } \\ & \text { B2 } \\ & \text { B3 } \\ & \text { B6 } \end{aligned}$ | $\begin{aligned} & \mathrm{C} 1 \\ & \mathrm{C} 3 \\ & \mathrm{C} 6 \end{aligned}$ |

| Contents |  |
| :---: | :---: |
| Topic | Sub-topic |
| ?Differentiation | oBasic Rules of Differentiation. <br> o The Chain Rule. <br> oTechniques Differentiation. <br> oL'Hôpital's Rule. Taylor's Theorem. <br> oApplications of Differentiation. <br> o Maxima and Minima. <br> oOptimisation Problems. <br> oThe Newton-Raphson Method. |
| ? Integration | oIntegration as Summation. oFundamental Theorem of Calculus. oSome Basic Integrals. oIntegration by Substitution. olntegration by Parts. olntegration of Rational Functions. oGeometrical Applications of Integration. oNumerical Integration. Simpson's Rule. olmproper Integrals. <br> Integración numérica: método de Simpson. Integrales impropias. |
| ?Ordinary Differential Equations. | oFirst Order Differential Equations. <br> oSeparable First Order Differential Equations. <br> oLinear First Order Differential Equations. <br> oApplications of First Order Differential Equations. <br> oSecond Order Linear Differential Equations with Constant Coefficients. <br> oHomogeneous Linear Systems with Constant Coefficients. |
| ?Linear Algebra | oSystems of Linear Equations oElementary operations. <br> oThe Algebra of Matrices. <br> oDeterminants. Basic properties. <br> oThe determinant rank. oEigenvalues and Eigenvectors. oNormal forms for matrices. oCayley-Halmiton theorem. |

| Methodologies / tests | Competencies | Ordinary class <br> hours | Student?s personal <br> work hours | Total hours |

| Guest lecture / keynote speech | A15 B2 B3 C6 | 32 | 64 | 96 |
| Problem solving | A15 B2 B3 C6 | 8 | 18 | 26 |
| Supervised projects | A15 B2 B3 C6 | 8 | 16 | 24 |
| Multiple-choice questions | A15 A16 A20 A24 | 3 | 0 | 3 |
|  | A25 A27 B1 B2 B3 B6 |  |  |  |
| Cersonalized C3 C6 |  | 1 | 0 | 1 |

(*) $^{*}$ The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | Methodologies |
| :--- | :--- |
| Guest lecture / <br> keynote speech | concept development and problem solving |
| Problem solving | Questionnaires, bulletins and exams of other courses that will be periodically made available to students on different content <br> and that students will have to solve. |
| Supervised projects | Work on topics proposed by the teacher, a theoretical summary will be presented along with a bulletin of problems solved on <br> the corresponding topic |
| Multiple-choice | Multiple choice test |
| questions |  |

| Methodologies <br> Supervised projects <br> The personalized attention described in relation to these methodologies is conceived as face-to-face moments of work for the <br> students with the teacher, for which they imply a participation for the students; the form and the moment in which it will be <br> carried out will be indicated in relation to each activity throughout the course according to the work plan of the subject. <br> The specific personalized attention measures for or "Students with recognition of part-time dedication and academic <br> exemption from attendance exemption" for the study of the subject, will be delivery of questionnaires, bulletins and exams of <br> other courses that will be periodically made available to the students about different contents and that the student will have to <br> solve. |  |
| :---: | :--- |

| Assessment |  |  |  |
| :---: | :---: | :---: | :---: |
| Methodologies | Competencies | Description | Qualification |
| Multiple-choice questions | A15 A16 A20 A24 <br> A25 A27 B1 B2 B3 B6 <br> C1 C3 C6 | Multiple-choice questions | 60 |
| Problem solving | A15 B2 B3 C6 | Delivery of exercises and solved exams. Competences A15, B2 and C3 will be assessed. | 20 |
| Supervised projects | A15 B2 B3 C6 | Development of specific aspects with examples and solved problems. Competence B3 will be assessed. | 10 |
| Guest lecture / <br> keynote speech | A15 B2 B3 C6 | Questions to the students. | 10 |

## UNIVERSIDADE DA CORUÑA

To pass the course, it will be necessary to obtain, added the marks of all the activities, a minimum grade of $50 \%$ of the total. To obtain the grade of not presented, it will be sufficient that the student does not participate in the multiple-choice test and has not been evaluated in the supervised Works in more than $50 \%$. In the second chance test, the criterion to pass the subject will be the previous one or to obtain a grade of not less than $50 \%$ in the multiple choice test. The teaching-learning process, including assessment, refers to one academic course, and therefore a new course would be restarted, including all assessment activities and procedures that were scheduled for that course; however, it is allowed to request to maintain the practical qualification of a previous course.
Students enrolled in part-time regime and academic exemption from attendance exemption, can be evaluated in a personalized way regarding the methodologies of Maxistral Session, Problem Solving and Tutored Jobs. Students enrolled in part-time regimen are required to sit the multiple-choice test, as well as the partial tests throughout the course. For the first and second opportunity, the evaluation criteria for this student body is the same as for the others and the attendance waiver percentage will be $80 \%$.
Students at the first opportunity have priority in the granting of honors.
The fraudulent performance of tests or assessment activities will directly imply a qualification failure of ' 0 ' in the corresponding call, invalidating the qualification obtained in all the assessment activities for the extraordinary call.

## UNIVERSIDADE DA CORUÑA

It is convenient to have knowledges of mathematics of the second year of High School. In other situations is important to attend the "Level 0 course" which is organized at the beginning of the term. Daily sutdying of the contents taught in every session which sholud be completed with the recommended bibliography.

Green Campus Programme of the Faculty of Sciences

In order to achieve an inmediate susteinable environment and to comply with the 6th point of the "Declaración Ambiental da Facultade de Ciencias (2020)", the documentary works to develop in this subject:
a. Will be mostly asked to develop in virtual format and computer support.
b. If it is done on paper:

Plastics will be not used.

- Prints will be made in double-sided.
- Recycled paper will be used.
- Draft works will be avoided.
$\left(^{*}\right)$ The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
