General description	The Faculty of Science has been	succesfully rui	nning an internsl	nip progra	m since 2005, v	with an average participation of
	50-70 students per year. Every y	ear, our studen	ts can conduct i	nternships	in private com	panies or institutions equivalent to
	6 or 12 ECTS credits, in exchange	ge for 1 or 2 opt	ional courses.			
	In order to participate in the internships program, students must: i) Be enrolled in one of the degrees run by the Faculty of Science.					
	ii) Have passed courses compris	-	•		courses.	
	1	•				a contractual relationship with the
	' ' '	•				·
	private company or institution offering the internship are not eligible, unless they are granted special permission according to the University of A Coruña (UDC) regulations.					
	In order to be academically valid, internships must:					
	a) Be offered through or approved by the Faculty of Science. Positions offered by other institutions (Social Council UDC, UDC Foundation, etc.) must abide by UDC regulations, specially those ensuring equal opportunity and no discrimination.b) Be filled in a fair process based on merit.					
	c) Be conducted under the super	vision of a qual	lified professiona	al (BSc, M	Sc or PhD), pre	eferably in a related field.
	d) Obtain a positive report issued by the academic supervisor about the conducted activity, based on the report submitted by the student and the assessment report by the academic and professional supervisors (Annexes III and IV).			•		
	The assessment process, prior to	o the decision o	of the academic	supervisor	, will follow all U	JDC regulations.

	Study programme competences		
Code	Study programme competences		
B1	Learning to learn		
B2	Effective problem solving		
В3	Application of logical, critical, creative thinking		
B4	Working independently on own initiative		
B5	B5 Teamwork and collaboration		
B6	B6 Ethical, responsible, civic-minded professionalism		

В7	Effective workplace communication
C1	Ability to express oneself accurately in the official languages of Galicia (oral and in written)
C3	Ability to use basic information and communications technology (ICT) tools for professional purposes and learning throughout life
C4	Self-development as an open, educated, critical, engaged, democratic, socially responsible citizen, equipped to analyse reality, diagnose
	problems, and formulate and implement informed solutions for the common good
C5	Understanding importance of entrepreneurship, and knowledge of resources available for people with business ideas
C6	Ability to assess critically the knowledge, technology and information available for problem solving
C7	Acceptance as a professional and as a citizen of importance of lifelong learning
C8	Understanding role of research, innovation and technology in socio-economic and cultural development

Methodologies

Methodologies Description

Summary The report submitted by the student will include the following parts, and in the following order: 1. CONTENTS 1.1 This section must include a list of all the documents of the report 2. DETAILS OF THE STUDENT 2.1 Brief information about the student, including surnames, name, ID number (DNI for Spanish students), address, telephone number and e-mail 3. DETAILS OF THE COMPANY/INSTITUTION 3.1 Brief information about the company/institution, including name, address, activities, number of employees, etc...) 4. SUMMARY OF THE TASKS CONDUCTED DURING THE INTERNSHIP 4.1 Summary of the work done by the student during the internship 5. DESCRIPTION OF THE ACTIVITIES OF THE STUDENT 5.1 Aims of the internship. 5.2 Tasks conducted. Describe the experimental and theoretical basis of the student?s activities during the internship. If necessary, the student must consider the need to avoid disclosure of confidential information. 5.3 Schedule. Time and duration of the activities conducted. Information about the company/institution sections or units in which the student performed his/her tasks. 5.4 Courses or seminars taken by the student that are related to the internship. Specific knowledge acquired by the student during the internship (use of computer tools, particular skills, etc...) 5.5 Integration of the student in the section/unit of the company/institution. Include an analysis of the student?s working

6. CONCLUSIONS

- 6.1 Assessment of the usefulness of the skills acquired during the degree and the tasks conducted in the internship.
- 6.2 Personal evaluation of the skills acquired during the internship.

relationship with the staff of the company/institution.

6.3 Declaration of responsibility signed by the student (following the form included as Annex I).

Supervised projects

The company or institution will appoint a supervisor (BSc, MSc or PhD) with the following functions:

- 1. Submit to the Faculty of Science a document including a brief description of the tasks to be conducted by the student. In addition to this, the supervisor will list in the document the specific skills the student will need to complete the tasks during the internship. Finally, the learning outcomes for the student should also be included in the document.
- 2. Guide the student during the internship.
- 3. Write a final report, addressed to the Dean of the Faculty of Science, assessing the quality of the student?s work.

The student will also have an academic supervisor at the Faculty of Science. He/She will evaluate the report submitted by the student offering advice and suggesting improvements. A second version of the report will be submitted to the Faculty of Sciences administration together with a form requesting its assessmen

Personalized attention		
Methodologies	Description	
Supervised projects	Personalized attention will be available to the student from the academic and the professional supervisors. Personalized	
Summary	attention will also be a tool for the continuous assessment of the student.	

Assessment

3/5

Methodologies	Competencies	Description	Qualification
Supervised projects	B1 B2 B3 B4 B5 B6	The company or institution will appoint a supervisor who will submit a final report,	50
	B7 C1 C3 C4 C5 C6	addressed to the Dean of the Faculty of Science, wherein he/she will assess the	
	C7 C8	quality of the work conducted by the student.	
Summary	B3 C1 C6 C7	In order to be evaluated and to attain academic recognition for the internship, the	50
		student must submit a report, addressed to the Dean of the Faculty of Science,	
		including a detailed summary of the different activities conducted. The report should	
		follow the guidelines including in section 5 of this teaching guide (Methodologies).	
		The academic supervisor will revise the report and will suggest changes and	
		corrections. The student will consider these corrections and will prepare a final version	
		of the report. This final version will be again submitted, this time to the Negociado de	
		alumnos (student's office) together with a form requesting its evaluation.	

Assessment comments

The final grade will be based on the performance of the student during his/her internship and on the quality of the submitted report.

It is highly recommended that all students consult the rubric of assessment on the web of Facultade de Ciencias.

Those students who do not complete the number of hours requiered at the company/institution or who do no submit the final report on time will have a maximum mark of 4,5 (out of 10). When the total period of time in the company/institution are not fullfilled, the final mark will be proportional to the number of worked hours, and always less than 4,5 (out of 10). Under exceptional circumstances, the student can ask for a waiver to pass the subject without having finished the period of the internship; this application have to be done to the dean of the faculty.

Other comments

Internships should be undertaken in the summer between the third and the fourth years of the degree, once the semester is finished. Students who do this will have more time during the second semester of their third year, which is usually stressful.
