| General description | This subject aims at developing skills that will allow to the studens to develop a critical knowledge of differential calculus and integration, as well as at providing a small introduction to linear algebra and to differential equations |        |  |           |

## Study programme competences

| Code | Study programme competences  |
|------|--|
| A21  | Deseñar modelos de procesos biolóxicos.  |
| B1   | Aprender a aprender.   |
| B2   | Resolver problemas de forma efectiva.  |
| B3   | Aplicar un pensamento crítico, lóxico e creativo.                                |
| B4   | Traballar de forma autónoma con iniciativa.                                      |
| B5   | Traballar en colaboración.   |
| B6   | Organizar e planificar o traballo.   |
| B7   | Comunicarse de maneira efectiva nunha contorna de traballo.                      |
| B8   | Sintetizar a información.  |
| B9   | Formarse unha opinión propia.  |
| B10  | Exercer a crítica científica.  |
| B12  | Adaptarse a novas situacións.  |
| B13  | Comportarse con ética e responsabilidade social como cidadán e como profesional. |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies                  |   |
|--------------------------------|---|
| Methodologies                  | Description   |
| Guest lecture / keynote speech | Desenvolvemento dos conceptos e resolución de problemas   |
| Problem solving                | Cuestionarios, boletins e exames doutros cursos que periodicamente poranse a disposición dos alumnos sobre distintos contidos e que o alumno terá que resolver. |
| Supervised projects            | Traballo sobre temas propostos polo profesor, presentarase un resumo teórico xunto cun boletín de problemas resoltos acerca do tema correspondente              |
| Objective test                 | Desenvolvemento de cuestións e problemas da materia   |

| Personalized attention         |  |
|--------------------------------|--|
| Methodologies                  | Description  |
| Guest lecture / keynote speech | <p>The personalised attention that describes in relation to these methodologies conceive like moments of face-to-face work for the student with the professor, by what involve a participation for the student; the form and the moment in that it will develop will indicate in relation to each activity along the course according to the plan of work of the subject.</p> <p>The measures of specific personalised attention for or student with recognition of dedication part time and dispenses academician of exemption of assistance for the study of the matter, will be delivery of questionnaires, bulletins and examinations of other courses that will put to disposal of the students on distinct contents and that the student will have to resolve.</p> |
| Supervised projects            |  |
| Problem solving                |  |
|                                |  |

| Assessment                     |  |  |               |
|--------------------------------|--|--|---------------|
| Methodologies                  | Competencies                           | Description  | Qualification |
| Guest lecture / keynote speech | A21 B2 B3 B6 B13                       | Questions to the students.   | 10            |
| Supervised projects            | A21 B1 B2 B3 B8 B9 B10 B12 B13         | Development of specific aspects with examples and solved problems. Competence B3 will be assessed. | 10            |
| Problem solving                | A21 B1 B2 B3 B4 B5 B6 B7 B8 B9 B10 B12 | Delivery of exercises and solved exams. Competences A15, B2 and C3 will be assessed.               | 10            |
| Objective test                 | B1 B2 B3 B4 B8 B9 B10 B13              | Desenvolvemento de cuestións e resolución de problemas da materia                                  | 70            |

| Assessment comments  |
|--|
| <p>To surpass the subject it will be necessary to obtain, after adding the qualifications of all the activities, a minimum note of 50% of the total. To obtain the qualification of no presented, it will be sufficient that the student do not participate in the objective proof and have not been evaluated in more than 50% of the guided works. In the second opportunity the criterion to surpass the subject will be the previous or to reach a mark no less than 50% in the objective proof. Regarding successive academic courses, the process of education-learning, included the evaluation, refers to an academic course; nevertheless it allows request keep the qualification of practices of a previous course. Guided work qualifications are only kept between courses on student demand.</p> <p>The students enrolled in regime of partial time and academic exemption from attendance exemption, can be evaluated in a personalised way regarding the methodologies of theory sessions, problem solving and guided works. For the students enrolled in the partial time regime it is compulsory to make the objective proof, as well as the partial proofs along the course. For the first and second opportunity the criteria of evaluation for this students, is the same that for the others and the percentage of dispenses of assistance will be of 80%.</p> <p>The objective proof is equal for all the students.</p> <p>The priority for obtaining qualifications "with honours", will be for the students that achieve this mark at the earliest opportunity.</p> |

## Recommendations

### Subjects that it is recommended to have taken before

### Subjects that are recommended to be taken simultaneously

### Subjects that continue the syllabus

### Other comments

It is convenient to have studied Mathematics in the final course of Secondary Education. For those students who have not, the nivelation course offered by the Faculty of Science is strongly recommended.&nbsp;
