| General description | Development is an outstanding process of selfconstruction (and also renovation) of all multicellular organisms from the unicellular condition. This course is an optional subject in the second semester of 4th year (8th semester) in which it integrates information and biological knowledge taken in previous years. This course cover the study of the cellular basis and molecular mechanisms involved in the process of ontogenetic development of multicellular organisms, especially in the processes of differentiation and morphogenesis, emphasizing primarily in the development of metazoans. |        |                     |           |

## Study programme competences

| Introductory activities | This session consists of a presentation of the subject, which sets out and explains the purpose and objectives of the subject, its structure, activities, evaluation criteria, etc ... (all contained in summary in the teaching guide) and where student can solve any queries related to them. |

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Directed discussion             | Sessions (flipped classrooms) will be 50 minutes long covering the topics of the program, on which the student must have previously worked from the recommended texts and the edited document of the topic provided by the lecturer. In the session, the most important and complex concepts will be analyzed and, doubts arising from personal work or from those activities carried out in the session (study cases, design and interpretation of experiments, gamified activities...) will be solved. |
| Seminar                         | Each seminar session will be presented and discussed among participants about a scheduled topic. Students should prepare their own theme or part of the intended subject assigned. The teacher will assist any questions that may arise along the preparation.                                                                                                                                                                                                                                           |
| Laboratory practice             | The practices are an essential complement to the theoretical lessons which addresses some of the processes of animal development and elaborates on some of them.                                                                                                                                                                                                                                                                                                                                         |
| Workbook                        | This section includes specifically selected audiovisual media (videos from the JoVe or YouTube platforms) about methodological, experimental or illustrative aspects of the embryogenesis of some animal species.                                                                                                                                                                                                                                                                                        |
| Mixed objective/subjective test | The examination shall be written and consist of short answer questions of the contents treated in lectures, seminars and practical lessons.                                                                                                                                                                                                                                                                                                                                                              |

## Personalized attention

| Directed discussion             | A26 A1 B1 B10 B11           | In the modality of continuous evaluation, the activities carried out throughout the course in these sessions may be taken into account and valued, representing 70% of the final grade, and may be replaced by the mixed test. The student who does not complete a minimum of 80% of these activities will not be able to opt for this evaluation modality and must take the mixed test.                                                                                                                                 | 0             |
| Mixed objective/subjective test | A1                          | the examination will be written and consist of short answer questions, doing schemas, definitions ...                                                                                                                                                                                                                                                                                                                                                                                                                    | 70            |
| Seminar                         | A29 B1 B4 B6 B8 B10 B11 B13 | For each seminar session the student must give a talk on a topic previously assigned and give the teacher a brief one-page summary including the main ideas of the subject worked. In the seminar session, the ideas in common will be discussed among participants. Both the presentation and the discussion will be valued. The 8 seminars represent the 30 percent of the final grade (each seminar is worth 0,375 points over 10). Abstracts not presented and defended in the seminar session will not be assessed. | 30            |
| Others                          |                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |               |

## Assessment comments

It is not necessary to achieve a minimum score on the topics of the seminars and the directed discussion activities/ mixed test for the calculation of the final grade. Students who followed the continuous assessment modality can choose to increase their grade by taking the mixed test. In the second call only the score of the written exam in which knowledge derived from theoretical, practical sessions and seminars will be assessed, will be considered. The fraudulent performance of the tests or activities, once verified, will directly imply a failure grade "0" in the contents of the corresponding opportunity.

Exceptionally, in case the student under justified reasons (students with part-time dedication and academic exemption or specific circumstances of learning and support for diversity) or supervening circumstances, cannot take all the continuous assessment tests, appropriate alternative measures or activities there will be adopted that do not affect the student rating.

 Animal Physiology II/610G02036

### Subjects that are recommended to be taken simultaneously

### Subjects that continue the syllabus

### Other comments

Assistance and active participation to all activities is highly recommended. It is also encouraged previous consulting and personal working on the programmed issues before discussion in the flipped classroom sessions. Continued study throughout the course is also recommended to strengthen knowledge and for better understanding the new content being treated.

(\*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
