General description	Ethology covers the study of the mechanisms and evolution of animal behaviour. We will examine behaviour within the			examine behaviour within the	
	framework of Tinbergen?s four areas of inquiry: causation (mechanisms), development, function and evo				
	with an emphasis on behavioral ecology. Topics include methods for the observation and quantification of			d quantification of behaviour,	
	natural selection and evolution of behaviour, habitat selection, migration, territoriality, feeding behaviour, sexual				
reproduction, mating systems, parental investment, communication and social behaviour.					

	Study programme competences			
Code	Study programme competences			
A1	Recoñecer distintos niveis de organización nos sistemas vivos.			
A7	Reconstruír as relacións filogenéticas entre unidades operacionales e pór a proba hipóteses evolutivas.			
A19	Analizar e interpretar o comportamento dous seres vivos.			
A20	Muestrear, caracterizar e manexar poboacións e comunidades.			
A23	Avaliar o impacto ambiental. Diagnosticar e solucionar problemas ambientais.			
A26	Deseñar experimentos, obter información e interpretar os resultados.			
A27	Dirixir, redactar e executar proxectos en Bioloxía.			
A28	Desenvolver e implantar sistemas de xestión relacionados coa Bioloxía.			
A30	Manexar adecuadamente instrumentación científica.			
A32	Desenvolverse con seguridade no traballo de campo.			
B1	Aprender a aprender.			
B2	Resolver problemas de forma efectiva.			
В3	Aplicar un pensamento crítico, lóxico e creativo.			
B4	Traballar de forma autónoma con iniciativa.			
B5	Traballar en colaboración.			
B6	Organizar e planificar o traballo.			
B7	Comunicarse de maneira efectiva nunha contorna de traballo.			
B8	Sintetizar a información.			
В9	Formarse unha opinión propia.			
B10	Exercer a crítica científica.			
B11	Debater en público.			
B12	Adaptarse a novas situacións.			
B13	Comportarse con ética e responsabilidade social como cidadán e como profesional.			

Learning outcomes		
Learning outcomes	Study programme	
	competences	

Be able to understand animal behaviour as a result of evolution in relation to the environment	A1		
	Α7		
	A19		
Be able to use basic sampling techniques in animal behaviour.	A20	В6	
	A23		
	A28		
	A30		
	A32		
Be able to design experiments, obtain information and discuss results.	A26	B2	
Be able to critically analyse, synthesize and present information.		В3	
		В7	
Develop the ability to work as a team member.		B5	
Behave ethically, being a conscious citizen and professional.		B13	
Be able to use information and communication tools, needed both for the professional life and the continuous learning of the	A28	B12	
student			
Be able to critically analyse the significance of scientific knowledge, available technology and information for solving problems.		B10	
Be able to direct, report and perform projects in Biology.	A27		
Know how to learn		B1	
Work autonomously and with initiative		B4	
Proper expression, both oral and written, in the official languages of the region.		В8	
		B11	
Assume, as professional and citizen, the importance of lifelong learning.		В9	
		B12	
Proper expression, both oral and written, in a foreign language.	A27	B8	

Contents				
Topic	Sub-topic Sub-topic			
Part 1. Fundamental concepts of Ethology	1.1 Introduction and history of Ethology.			
	1.2 Proximate causes and ontogeny of behaviour			
	1.3 Evolution and adaptative value of behaviour			
	1.4 Group selection and kin selection			
Part 2. Taking decissions	2.1 Optimality models in animal behaviour			
	2.2 Predation and anti-predator behaviour			
	2.3 Habitat selection. Dispersal, philopatry and territoriality			
	2.4 Orientation and migration			
Part 3. Sex and behaviour	3.1 Sexual reproduction: costs and benefits			
	3.2 Ecology of mating systems			
	3.3 Sexual selection			
	3.4 Parental care			
Part 4. Group living	4.1 Communication. Ecology and evolution of signals			
	4.2 Some aspects of social organization			
	4.3 Altruism and cooperation

	Methodologies
Methodologies	Description
Introductory activities	PRESENTATION: The course will be briefly presented during the first class. Contents, activities, schedules and grading will be
	explained in this session.
Guest lecture /	LECTURES (20) will consist mainly in oral sessions, where experiments, graphs and videos will be analysed. The slides used
keynote speech	by the professor will be available through the Moodle platform.
Supervised projects	ASSIGNMENTS: Students will be asked to prepare and defend a short presentation in groups of 2-3 persons. Drafts of the
	presentation will be discussed and improved together with the professor, in person or via email. Those students participating in
	Service-Learning activities are exempt from this task.
Seminar	SEMINARS: An important part of the seminars will involve reading and discussion of primary scientific literature related to
	class contents. We will work also on subjects and methods related to class assignments. Students will be graded depending
	on their active participation and/or through short exams.
Research (Research	PRACTICAL WORK: Practical work will involve the analysis of videos and material for introducing students to the methods for
project)	the observation and quantification of behaviour. Whenever possible, we will perform part of the practical work in outdoor
	facilities (ex. the Aquarium Finisterrae). Students will produce a final research report. Those students involved in
	Service-Learning activities may be exempt from doing some activities of the practical work.
Short answer	SHORT ANSWER EXAM: One final exam will be given. It will consist of 10 objective, short answer questions that will require
questions	detailed and precise responses.
Aprendizaxe servizo	SERVICE-LEARNING (SL): Students may have the option to voluntarily participate in a Service-Learning activity. The aim is to
	reduce pet abandonment due to behavioural problems of the animals. Participation in this activity will exempt students form
	the elaboration of the class short presentation. Depending on the time required for the SL activity, students may be exempt
	also from doing some activities of the practical work.

Personalized attention			
Description			
The professor will solve doubts and provide support for class assignments, seminars and practical work during the office hours			
or by appointment, in person or via email. Students will be assisted by the professor in the preparation of class expositions, so			
they attain a minimum quality. Only class expositions already reviewed by the professor will be allowed to be presented and			
graded. Students may ask for clarifications in any activity, including exams.			

		Assessment	
Methodologies	Competencies	Description	Qualification

Research (Research	A20 A23 A26 A27	PRACTICAL WORK: MANDATORY. Students will prepare a report in a scientific	20
project)	A28 A30 A32 B13	format that will include: the objectives of the work, material and methods used, the	
		results obtained and a short discussion. Those students unable to attend the practical	
		lessons will be required to prepare a report on a field work, under the supervision of	
		the professor.	
Supervised projects	A19 B1 B3 B4 B5 B8	CLASS ASSIGNMENTS: MANDATORY. They will be graded depending on their	15
	B10	originality, the clear connection with the class contents, the quality of the sources and	
		the quality of the exposition. The assignment will be optional for those students	
		involved in a Service-Learning activity.	
Short answer	A7 A19 B2	SHORT ANSWER EXAM: MANDATORY. The final exam will consist of 10 objective,	60
questions		short answer questions that will require precise and well-reasoned responses. Literally	
		reproduction of class slides will lower the grade. For passing the exam students are	
		REQUIRED TO OBTAIN AT LEAST 4 POINTS OUT OF 10.	
Aprendizaxe servizo	A7 A19 B2 B7 B8 B13	SERVICE-LEARNING: OPTIONAL. Students will be graded through individual and	0
		group interviews. Grading will depend on the quality of the materials prepared, the	
		contents learnt, and the active and responsible participation in all the activities.	
Seminar	A19 B1 B3 B7 B9 B10	SEMINARS: Students will be graded depending on attendance and active	5
	B11	participation. Assessment might include also short exams. ABSENT STUDENTS WILL	
		EARN NO POINTS FOR THE SEMINARS unless absence is clearly justified.	
Others			

## **Assessment comments**

Most of the lectures contents will be assessed in a final exam. This exam will count 6 points, and students are required to obtain at least 2.4 points out of 6 to pass it (the exam will have 10 questions, so students are required to obtain at least 4 points). IMPORTANT: Students have the right to be assessed in the official languages of the UDC (Galician and Spanish) in an appointment process.

Seminars, practical work reports and class assignments will count 4 points. Active participation in these activities is expected, and group working is strongly recommended.

Students who do not complete all the required tasks and activities will not be able to attain the maximum grade (10 points) in any of the grading opportunities. Points earned in seminars, practical work and class assignments (or Service-Learning activities) will be kept for the two grading opportunities.

Students are required to obtain at least 5 points out of 10 to pass the course.

For being classified as ?Absent?, students can not take the final exam (the short answer exam).

Other comments

Class slides will be available to students through the Moodle platform. However, slides are only a guiding tool, and students are expected to do extra reading and work to pass the course. Attendance to classes and reading of texts and extra materials is strongly recommended.
