

Teaching Guide

Teaching Guide				
Identifying Data				2022/23
Subject (*)	Ecology I: Individuals and Ecosystems		Code	610G02039
Study programme	Grao en Bioloxía			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Third	Obligatory	6
Language	SpanishEnglish			
Teaching method	Face-to-face			
Prerequisites				
Department	Bioloxía			
Coordinador	Martínez Abraín, Alejandro	E-mail	a.abrain@udc.es	
Lecturers	Martínez Abraín, Alejandro	E-mail	a.abrain@udc.es	
	Piñeiro Corbeira, Cristina		c.pcorbeira@udc.es	
	Ruiz De la Rosa, Jose Miguel		jose.miguel.ruiz.delarosa@udc.es	
Web				
General description	Distribution patterns : the individual and the environment. The ecosystem.			

Study programme competences / results

Code	Study programme competences / results
A1	Recoñecer distintos niveis de organización nos sistemas vivos.
A17	Realizar bioensaios e diagnósticos biolóxicos.
A20	Muestrear, caracterizar e manexar poboacións e comunidades.
A21	Deseñar modelos de procesos biolóxicos.
A24	Xestionar, conservar e restaurar poboacións e ecosistemas.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A30	Manexar adecuadamente instrumentación científica.
B4	Traballar de forma autónoma con iniciativa.
B6	Organizar e planificar o traballo.
B7	Comunicarse de maneira efectiva nunha contorna de traballo.
B8	Sintetizar a información.
B12	Adaptarse a novas situacións.

Learning outcomes

Learning outcomes	Study programme competences / results		
To describe ecological concepts at the individual, population, community and ecosystem level.	A1 A24		
To discuss ecological concepts by critically considering the evidence in support of them.		B8	
To face with some success the specialised literature.	A30		
To use some basic techniques from the vast ecological methodology.	A17 A20 A21 A26 A30	B4 B6 B7 B12	

Contents

Topic	Sub-topic
Section 1. Ecology and evolution (2h)	Unit 1. Ecology and evolution

Section 2. The individual and the environment (9h)	Unit 2: Generalities Unit 3. Responses and adaptations to the abiotic environment: temperature, water and light. Unit 4. Other responses to environmental variations.
Section 3. The ecosystem (13h)	Unit 5. The ecosystem and its functioning. Unit 6. Production. Unit 7. Flow of energy Unit 8. Cycles of matter. Unit 9. Decomposition and nutrients regeneration. Unit 10. Global cycles.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	28	56	84
Laboratory practice	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	15	15	30
Seminar	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	8	8	16
Long answer / essay questions	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	0	1	1
Case study	A1 A17 A20 A21 A24 A26 A30	0	14	14
Objective test	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	3	0	3
Personalized attention		2	0	2
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral presentations to transfer knowledge and facilitate learning. Most of the graphical support of presentations is available in the virtual campus (Moodle).
Laboratory practice	For the students to learn effectively through the completion of practical activities in the field and/or in the laboratory.
Seminar	Demonstration and study of numerical models for a better understanding and resolution of ecological problems. Most models will be executed with UDC PCs if students do not have their own laptops.
Long answer / essay questions	Partial examination of the subject (mid-term). One or two mid-terms will take place during the course. They will be eliminatory and altogether they will account for 30% of the final mark. Mid-term exams will be written in-person and they will have the structure decided by the professor in charge of that teaching. Usually 6 questions to be developed in written. Multiple-choice exams could be scheduled in special occasions, in which attendance in-person is not possible (e.g. COVID pandemia).
Case study	Reports of the activities carried out in Seminars and Labs.
Objective test	Written exam on all sections of the course: theory, labs and seminars.

Personalized attention

Methodologies	Description
Objective test	Preparation, explanation and revision of exams. Elucidation of possible doubts emerging as the subjects are implemented. Orientation and tuition to make the most of practicums. Orientation and tuition to make the most of seminars.
Laboratory practice	
Seminar	
Long answer / essay questions	
Case study	

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Objective test	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	Final written exam of the contents of the ENTIRE subject: theory (only material not covered in the mid-term examination), labs and seminars (see observations). 50%	50
Long answer / essay questions	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	Partial exam/s or mid-terms of the subject developed throughout the course (see observations) 30%. Subjects covered by the mid-term exam are eliminatory, and hence will not be asked in the final exam.	30
Case study	A1 A17 A20 A21 A24 A26 A30	Reports of the activities developed in Seminars and Labs (see observations). 20%	20
Others			

Assessment comments

The final grade will result from the student performance in all the activities under evaluation, which will include the three parts of the subject: Theory, Seminars and Labs, with a contribution to the final grade proportional to its contribution in time planning:

60% Theory

20% Seminars

20% Labs

All students will have two opportunities to pass the course.

In the first opportunity, a continuous evaluation will be carried out, including assignments, mid-term tests and a final exam (on a date set by the Faculty Board), with the following relative weighting:

60% Theory (30% mid-term tests + 30% final exam)

20% Seminars (10% assignments + 10% final exam)

20% Labs (10% assignments + 10% final exam)

In the second opportunity, there will be only a single final exam

(on a date set by the Faculty Board) that will include questions on the three parts of the subject with the following relative weighting:

60% Theory

20% Seminars

20% Labs

Both in the first and in the second opportunities it will be necessary to pass each and every one of the three parts simultaneously (Theory, Seminars and Labs) to pass the subject. A failed part may be offset with others if its grade is at least 4/10. The average grade to pass the course must be a 5.0 out of 10.

Those students who submit and/or attend to any of the continuous evaluation activities will be considered as presented (attended), receiving the corresponding grade for the work submitted and/or tests carried out according to their weighting, and a grade of zero in those works and/or tests in which they have not presented anything or not attended to. In the event of not submitting any assignments and not taking any of the tests, the student will be considered as ?not presented? (NP).

Attendance to Seminars and Labs is not mandatory, but will be recorded.

The assignments to be handed in (linked to Seminars and Labs) will consist on exercises of the activities carried out in Seminars and Labs. Those reports will be prepared and handed in following the indications given by the professor in charge of the subject (number, format, content, deadlines, etc.) and their qualification will be subject to individual oral examination, if necessary. These exercises must collect the work and interpretation of each student.

The achievement of the Honours mark (maximum qualification) will require, at least, a final grade of 9.0 or

higher, and the execution of all the assignments of the course.

For students who can use the

early December opportunity, the evaluation will consist of a final global exam

with a value of 100%, similar to that described for the second opportunity.

Students with officially recognized academic exemption are able to

participate in the proposed or equivalent activities and will have support by

tutoring (onsite or online).

Subjects covered by the mid-term exam are eliminatory, and hence will not be asked in the final exam. Second-opportunity final exams will cover all material covered during the whole course.

The fraudulent execution of the exam or activities (once verified) will directly imply the failing of the subject and a grade of '0' in the corresponding call (first and second opportunities).
