General description	O obxectivo deste curso é ofrecer ao alumno un panorama dos modelos macroeconómicos que se basan na teoría do equilibrio xeral. Incidirase na importancia das expectativas dos axentes na determinación do equilibrio macroeconómico, así como nas consideracións dinámicas necesarias para desenvolver modelos formalmente consistentes. O curso cubrirá os dous modelos básicos da macroeconomía dinámica (o modelo de horizonte infinito o o modelo de xeracións solapadas) e ofrecerá varias aplicacións de ambos modelos
