General description	<p>The subject of Macroeconomics, Growth and Dynamics is taught during the second semester of the third year of the Degree in Economics at the Faculty of Economics and Business of the University of Coruña. This course introduces students to the study of modern dynamic macroeconomics. The specific objectives are to teach the standard instruments to apply them to key issues in economic growth. The issues are (i) causes of sustained growth in per capita income in each country; (ii) determinants of the differences in per capita income maintained between countries; (iii) effects of government policies in those contexts. This course complements macroeconomics training and leads to more advanced research-based topics in the area of ??Dynamic and Economic Growth Theory..</p>					
Contingency plan	<p>1. Modifications to the contents - None</p> <p>2. Methodologies *Teaching methodologies that are maintained - All of them. In-person classes will be replaced by virtual sessions</p> <p>*Teaching methodologies that are modified - Lectures will take place through virtual platforms</p> <p>3. Mechanisms for personalized attention to students - Teams and e-mail.</p> <p>4. Modifications in the evaluation - The criteria will be adapted to the recommendations of the Universidade da Coruña</p> <p>*Evaluation observations: - None</p> <p>5. Modifications to the bibliography or webgraphy - None</p>					

Study programme competences	
Code	Study programme competences
A1	CE1- Contribuir á boa xestión da asignación de recursos tanto no ámbito privado como no público.
A2	CE2-Identificar e anticipar problemas económicos relevantes en relación coa asignación de recursos en xeral, tanto no ámbito privado como no público.
A3	CE3-Aportar racionalidade á análise e á descripción de calquera aspecto da realidade económica.

A4	CE4-Avaliar consecuencias e distintas alternativas de acción e seleccionar as mellores, dados os obxectivos.
A5	CE5-Emitir informes de asesoramento sobre situación concretas da economía (internacional, nacional ou rexional) ou de sectores da mesma.
A8	CE8-Entender as institucións económicas como resultado e aplicación de representacións teóricas ou formais acerca de cómo funciona a economía.
A9	CE9-Derivar dos datos información relevante imposible de recoñecer por non profesionais.
A10	CE10-Usar habitualmente a tecnoloxía da información e as comunicación en todo a seu desempeño profesional.
B1	CB1 - Que os estudantes demostren posuir e comprender coñecementos nun área de estudo que parte da base da educación secundaria xeral, e que soe encontrar nun nivel que, ainda que se apoia en libros de texto avanzados, inclue tamén algúns aspectos que implican coñecementos procedentes da vanguarda do seu campo de estudo.
B2	CB2 - Que os estudantes saibam aplicar os seus coñecementos ó seu traballo ou vocación dun xeito profesional e posúan as competencias que se demostran por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da su entorna de traballo.
B3	CB3 - Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da su área de estudo) para emitir xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética
B4	CB4 - Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como non especializado
B5	CB5 - Que os estudantes desenvolvesen aquelas habilidades de aprendizaxe necesarias para emprender estudos posteriores cun alto grao de autonomía
B6	CG1- Que os estudantes formados se convertan en profesionais capaces de analizar, reflexionar e intervir sobre os diferentes elementos que constitúen un sistema económico
B7	CG2 - Que os estudantes coñezan o funcionamento e as consecuencias dos sistemas económicos, as distintas alternativas de asignación de recursos, acumulación de riqueza e distribución da renda e esteán en condicións de contribuír ao seu bo funcionamento e mellora
B8	CG3 -Que os estudantes sexan capaces de identificar e anticipar os problemas económicos relevantes, identificar alternativas de resolución, seleccionar as más axeitadas e avaliar os resultados aos que conduce.
B9	CG4 -Que os estudantes respecten os dereitos fundamentais e de igualdade de oportunidades, non discriminación e accesibilidade universal das persoas con minusvalidez.
C1	CT1-Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C4	CT2-Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C5	CT3-Entender a importancia da cultura emprendedora e coñecer os medios ao alcance das persoas emprendedoras.
C6	CT4-Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C7	CT5-Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	CT6-Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes			
Learning outcomes		Study programme competences	
Knowing the tools to study the long run trends of national income and its world distribution. Understanding the main theoretical models allowing us to analyse the sources of sustained economic growth. Knowing to compare the predictions of those models to the empirical results using the available data. Knowing to use international statistics and interpret economic graphs.		A1	B2 C1
		A2	B3 C4
		A3	B6 C7
		A5	B7
		A8	
		A10	

- Contribute to the integral formation of the student, complementing theoretical and practical learning. - Facilitate the knowledge of the work methodology appropriate to the professional reality. - Encourage the development of technical, methodological, personal and participatory skills. - Obtain a practical experience that facilitates integration into the job market. - Favor the values of innovation, creativity and entrepreneurship.	A2 A4 A9	B1 B5 B8 B9	C2
In general, knowing the interrelationships between the macroeconomic variables and how they derive implications in the macroeconomic picture of the countries. Evaluate both production and consumption or financial expectations. In particular, develop the ability to analyze macroeconomic data sources and their application to theory-based forecasting models.	A1 A3	B4 C5	C3
Valuing, in a critical sense, knowledge of information technology to solve the problems you face			C6 C8

Contents

Topic	Sub-topic
Chapter 1: Long-term macroeconomic analysis	1.1. The importance of growth 1.2. The distribution of world income 1.3. Empirical regularities in relation to economic growth 1.4. A Brief History of Modern Theory of Economic Growth
Chapter 2: The empirical facts of economic growth	2.1. Convergence concepts 2.2. Interregional convergence 2.3. Barro regressions and national evidence 2.4. Empirical cross-sectional analysis of a sample of countries 2.5. The wealth and poverty of nations: growth and distribution of world income
Chapter 3: Introduction to the Solow Growth Model	3.1. The Foundations of the Neoclassical Solow-Swan Model 3.2. Steady state analysis 3.3. The growth rate over time 3.4. A quantitative measure of the duration of the transition 3.5. The convergence hypothesis
Chapter 4: The Solow Model and Data: Growth Accounting and the Facts	4.1. The Solow model 4.2. The Solow Model Expanded with Human Capital 4.3. Empirical evidence 4.4. Theory dissatisfaction with neoclassical theory
Chapter 5: The Ramsey-Cass-Koopmans model. Dynamic optimization	5.1. Ramsey-Cass-Koopmans model. The planner model 5.2. The solution with competitive markets 5.3. Steady state analysis 5.4. The dynamics of transition
Chapter 6: Population and economic growth. The Malthus model	6.1. The classical theory of population and growth 6.2. Endogenous population growth and fertility rate 6.3. The death rate, health spending and economic growth 6.4. Barro and Sala-i-Martín's fertility choice model
Chapter 7: Convex endogenous growth models. The AK model	7.1. The model of producer families 7.2. The utility dimension 7.3. The dynamics of transition 7.4. Evaluation of endogenous growth models
Chapter 8: The role of government and fiscal policy in neoclassical growth models	8.1. The model of producer families 8.2. The relationship between the size of the state and the growth rate 8.3. The economics of the central planner and optimal growth 8.4. The role that the State should play in the economy 8.5. How the State influences growth

Personalized attention		15	0	15

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	The classroom teacher explains each of the themes of the program content. Use the waxed and technologies available. Students solve any doubts that it faces. At the end of each master class it opens a time of clarification, comments, etc.
Problem solving	During the teaching period problem sets will be proposed to be solved by the students, as well as the realization of works. The problems and cases will be closely related to each of the topics explained in the lecture sessions. As the topics are explained, evaluations of the topics covered may be proposed.
Objective test	The first opportunity is replaced by the midterm exams (two multiple choice exams, the first one will take place during the teaching period and the second will coincide with the date set for the first opportunity in the official calendar) which may consist of a series of tests such as multiple choice exam, problem solving, short questions development, etc. In the midterms exams, incorrect questions will subtract score There will only be the exam on the second opportunity (July call) where the weight of this exam will be 100% of the final grade for the subject. This test may consist of a battery of multiple choice questions with multiple answers, only one of the answers being correct. The exam may also include questions for the development of the contents of the program and / or problems solving. In the case of multiple choice exams, wrong answers will have penalization.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	Personalized attention in small group and in individual office hours, especially in relation to the work and other activities presented in the classroom or in Moodle.
Objective test	
Problem solving	The Small Group Office hours as well as the individual ones will be preferably virtual

Assessment			
Methodologies	Competencies	Description	Qualification

Objective test	A1 A2 A3 A4 A5 B3 B4 B8	<p>The first opportunity is replaced by the continuous evaluation of the student, which may consist of a series of tests such as a multiple-choice exam, problem solving, short questions and completion and presentation of works. There will be two partial exams, the first one will take place during the class period and the second one will coincide with the date set in the official calendar for the first opportunity exam. In the proposed questionnaires, incorrect questions will subtract score, as will be specified in the exam. It will be necessary to achieve a minimum of 5 points out of 10 in each one of the partial exams in order to pass the course in the continuous assessment mode.</p> <p>There will only be the exam on the second opportunity (July call) where the weight of this exam will be 100% of the final grade for the subject. This test may consist of a battery of multiple choice questions with multiple answers, only one of the answers being correct. The exam may also include questions for the development of the contents of the program and / or problems solving. In the case of multiple choice exams, wrong answers will have penalization</p>	100

Assessment comments

A) EVALUATION REGULATIONS: 1. Evaluation conditions: It is forbidden to access the exam room with any device that allows communication with the outside and / or storage of information. 2. Identification of the student: The student must bring and show his/her ID card or passport the day of the exam in accordance with current regulations.

B) TYPES OF GRADINGS: 1. "No presentado" grading: Corresponds to the student, when he only participates in evaluation activities that have a weighting of less than 20% on the final grading, regardless of the grading achieved. 2. Students with recognition of part-time dedication and academic exemption of waiver attendance: Except for the dates approved in the "Junta de Facultad" for the "mixed tests", for the remaining tests a specific timetable compatible with their dedication will be agreed at the beginning of the course

C) GRADING OPPORTUNITIES: 1. First opportunity: Besides the evaluation criteria previously indicated in this section, the first opportunity is substituted for two midterms exams which will be carried out during the teaching period. Each midterm will weight between 40%-60% of the final grade (for instance if the first midterm weights 60% the second will weight 40% and viceversa to ensure a final grade of 100%). Each of midterms will consist of a multiple choice questions (with only one correct answer per question). The midterms may also include short questions to explain contents of the subject and/or problems solving. For the case of multiple choice questions, wrong answers will have penalization

2. Second opportunity : There will be only the exam at the "second opportunity" (July call) where the weight of this exam will be 100% of the final grade for the subject. This exam may consist of a multiple choice questions (with only one correct answer per question). The exam may also include short questions to explain contents of the subject and/or problems solving.

For the case of multiple choice questions, wrong answers will have penalization.

3. Advance call : The evaluation conditions of the advanced call will be specific for this opportunity. This will be evaluated through a mixed test that will represent 100% of the final grade
