Teaching Guide				
Identifying Data			2020/21	
Subject (*)	Financial Operations Analysis		Code	611G02004
Study programme	Grao en Administración e Dirección de Empresas			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	First	Basic training	6
Language	Galician			
Teaching method	Face-to-face			
Prerequisites				
Department	Empresa			
Coordinador	Suarez Massa, Maria Isabel Ana	E-mail	isabel.suarez.massa@udc.es	
Lecturers	Alvarez Garcia, Begoña Lagoa Varela, Maria Dolores Llano Paz, Fernando de Rodríguez Gulías, María Jesús Suarez Massa, Maria Isabel Ana	E-mail	begona.alvarez@udc.es dolores.lagoa@udc.es fernando.de.llano.paz@udc.es maria.gulias@udc.es isabel.suarez.massa@udc.es	
Web	udc.fernandoaguilar.es			
General description	The objective of the subject is to know: a) The elements that intervene in financial operations. b) The financial laws most used in financial practice. c) The characteristics, operations and usefulness of the most common financial operations.			

Contingency plan	<p>1. Changes in content All content is maintained.</p>
	<p>2. Methodologies</p> <p>* Teaching methodologies that are maintained</p> <p>Master Session</p> <p>Problem resolution</p> <p>Seminar</p> <p>Short answer test</p> <p>Mixed tests</p> <p>* Teaching methodologies that are modified</p> <p>3. Mechanisms for personalized attention to students</p> <p>Microsoft Teams: It would be used to give the classes in the habitual schedule.</p> <p>It would also be used in the tutoring hours of each teacher and the small group tutoring for student care.</p> <p>Moodle: To carry out the tests (exams) and to carry out, if applicable, forums, at the end of each topic.</p> <p>Email: To request virtual team meetings or make specific inquiries.</p> <p>4. Modifications in the evaluation</p> <p>If it is prohibited or not advisable due to the Covid-19, the tests will be carried out virtually through the Moodle platform.</p> <p>Except for the above, there will be no changes in them.</p> <p>* Evaluation observations:</p> <p>In case of having to carry out the tests virtually, in order to be able to monitor the exam, students must have microphones and cameras open for the entire duration of the exam. We could also ask, for the same purpose, that they share the desk with the teachers or that they show us the environment (room) where the test is being done with the camera. In the event that a student does not meet this standard, the test would be canceled for him and it would be replaced by an oral test to be performed at another time.</p> <p>5. Modifications of the bibliography or webgraphy</p> <p>no modifications</p>

Study programme competences	
Code	Study programme competences
A1	Manage an enterprise or small organization, understanding their competitive and institutional position and identifying their strengths and weaknesses
A2	Integrate in any functional area of micro-firms or SMEs and perform fluently any management task commissioned
A3	Evaluate and foreseeing, from relevant data, the development of a company.
A4	Elaborate advisory reports on specific situations of companies and markets
A5	Write projects about specific functional areas (e.g. management, marketing, financial) of the company
A6	Identify the relevant sources of economic information and to interpret the content.
A8	Derive, based on from basic information, relevant data unrecognizable by non-professionals.
A9	Use frequently the information and communication technology (ICT) throughout their professional activity.
A11	To analyze the problems of the firm based on management technical tools and professional criteria
A12	Communicate fluently in their environment and work by teams
B1	CB1-The students must demonstrate knowledge and understanding in a field of study that part of the basis of general secondary education, although it is supported by advanced textbooks, and also includes some aspects that imply knowledge of the forefront of their field of study

B2	CB2 - The students can apply their knowledge to their work or vocation in a professional way and have competences typically demonstrated by means of the elaboration and defense of arguments and solving problems within their area of work
B3	CB3- The students have the ability to gather and interpret relevant data (usually within their field of study) to issue evaluations that include reflection on relevant social, scientific or ethical
B4	CB4-Communicate information, ideas, problems and solutions to an audience both skilled and unskilled
B5	CB5-Develop skills needed to undertake further studies learning with a high degree of autonomy
B6	CG1-Perform duties of management, advice and evaluation in business organizations
B7	CG2-Know how to use the concepts and techniques used in the various functional areas of the company and understand the relationships between them and with the overall objectives of the organization
B8	CG3- Know how to make decisions, and, in general, assume leadership roles.
B9	CG4-Learn to identify and anticipate opportunities, allocate resources, organize information, select and motivate people, make decisions under conditions of - uncertainty, achieve the proposed objectives and evaluate results
B10	CG5-Respect the fundamental and equal rights for men and women, promoting respect of human rights and the principles of equal opportunities, non-discrimination and universal accessibility for people with disabilities.
C1	Express correctly, both orally and in writing, in the official languages of the autonomous region
C4	To be trained for the exercise of citizenship open, educated, critical, committed, democratic, capable of analyzing reality and diagnose problems, formulate and implement knowledge-based solutions oriented to the common good
C5	Understand the importance of entrepreneurial culture and know the means and resources available to entrepreneurs
C6	Assess critically the knowledge, technology and information available to solve the problems and take valuable decisions
C7	Assume as professionals and citizens the importance of learning throughout life.
C8	Assess the importance of research, innovation and technological development in the economic and cultural progress of society.

Learning outcomes			
Learning outcomes	Study programme competences		
Use the appropriate computer tools to achieve more efficiency in the calculations necessary in the previous sections.	A9 A11		C6
Be able to value financial income as well as identify in which economic-financial operations and for what such values ??must be applied.	A5 A6 A8 A9 A11		C8
Know the principles that govern the operation of financial laws used in practice, along with their application to specific financial operations.	A1 A2 A8 A9 A11		C4 C5
Know and identify the concept of financial operation, as well as its components, costs and returns. Know how to use these concepts in specific financial operations and, particularly, in the concepts of APR and Amortized Cost.	A3 A4 A8 A9 A11		C1
Know, value and develop loan operations, both from the point of view of the lender and the borrower.	A8 A9 A11 A12		C7

<p>Know how to apply the knowledge to your work in a professional way and possess the competences that are usually demonstrated through the preparation and defense of arguments and the resolution of problems within your area of work.</p> <p>- Know how to collect and interpret relevant data (usually within their area of study) to issue judgments that include a reflection on relevant issues of a social, scientific or ethical nature</p> <p>- Transmit information, ideas, problems and solutions to a specialized and non-specialized audience</p> <p>-Develop learning skills necessary to undertake further studies with a high degree of autonomy</p> <p>-Know how to perform management, advisory and evaluation tasks in business organizations</p> <p>- Know how to manage the concepts and techniques used in the different functional areas of the company, as well as understand the relationships that exist between them and with the general objectives of the organization.</p> <p>- Know how to make decisions, and, in general, assume managerial tasks.</p>		B1	
		B2	
		B3	
		B4	
		B5	
<p>Know how to identify and anticipate opportunities, allocate resources, organize information, select and motivate people, make decisions in uncertainty, achieve the proposed objectives and evaluate results.</p> <p>- Respect the fundamental rights and equality between men and women, respect the promotion of Human Rights and the principles of equal opportunities, non-discrimination and universal accessibility for people with disabilities.</p>		B6	
		B7	
		B8	
		B9	
		B10	

Contents	
Topic	Sub-topic
Finance laws. General concepts	<ol style="list-style-type: none"> 1. Concept of economic good. 2. Economic activity and financial activity. 3. Concept of financial capital and graphic representation. 4. Financial projection: concept and classes. 5. Financial laws: concept, characteristics and properties.
Financial laws used in practice.	<ol style="list-style-type: none"> 1. Simple and compound capitalization. 2. Simple commercial and rational or mathematical discount. Commercial and rational compound discount. 3. Continuous capitalization. 4. Equivalent interest rates.
Financial operations	<ol style="list-style-type: none"> 1. Concept, classes and components. Financial balance. 2. Mathematical reserve or financial balance. Concept and methods of determination. 3. Actual costs and returns. 4. Practical applications. The APR concept. The effective cost and performance in the valuation rules of the General Accounting Plan. The Amortized Cost table according to the valuation rules of the General Accounting Plan. 5. Financial sum and unified capital.
Income valuation	<ol style="list-style-type: none"> 1. Concept, components and classes of income. 2. Valuation of income. General method and particular cases. 3. Practical applications. Obtaining the Net Present Value or Capital Value of an investment. Capital formation.

Loan operations	<ol style="list-style-type: none"> 1. Concept of loan. Typology of loans. 2. The financial balance in loan operations. 3. Amortization tables. Concept, classes and obtaining these according to the different typologies. 4. Financial value of a loan. 5. Commercial characteristics of the loans: the lack and early repayment. 6. The calculation of the effective cost for the lender, of the yield for the lender and of the APR and the CER second regulation of the Bank of Spain.

Methodologies	
Methodologies	Description
Mixed objective/subjective test	<p>1. A theoretical-practical exam consists of two contents of the subject, with short questions, questions to be developed, questions about practical subjects, test-type questions (true / false), multiple-choice questions or a combination of two types mentioned.</p> <p>2. Or it can be oral or written. If nothing to the contrary is published on the web page of the subject (Moodle) 48 hours in advance, or it will be written.</p> <p>3. Celebrate nas data, hours and classrooms that or Dean set officially.</p>
Short answer questions	<p>1. They consist of an exam on a part of the subject and can be short answers, test type (true / false), multiple choice, questions to develop and questions about practical cases or a combination of them.</p> <p>2. The exam can be oral or written. If nothing to the contrary is said in the call for the test in Moodle, the exam will be written. Its duration is between 20 and 60 minutes.</p> <p>3. The group can be subdivided to carry out the tests into as many subgroups as the teacher of the subject deems appropriate.</p>

Problem solving	<p>1. Presentation and solution of practical examples about the theoretical contents.</p> <p>2. The practices and examples are interspersed with the theoretical contents in order to facilitate the understanding of the subject.</p> <p>3. In the solution of the practical examples the student can intervene: a) the own initiative, after asking for a word b) on the initiative of the teacher, who will expressly request the intervention of the student.</p> <p>4. Exercises to be carried out by the student during non-contact hours or autonomous work will be formulated. In subsequent face-to-face hours, a review of the exercises in which the student can intervene will be carried out and the corresponding series of questions will be opened in order to clarify those aspects that the student formulates about the content of these.</p>
Seminar	<p>It is a total of 4 additional hours of teaching to be taught throughout the semester in small groups of students. They will be done through Microsoft Teams outside the normal class time on the date and time agreed with the teacher. The objectives of the seminar are:</p> <p>a) Discuss with the student any theoretical doubt about the part of the subject explained up to that moment</p> <p>b) Resolution of exercises for the part of the subject explained up to that moment.</p> <p>It is a total of 4 additional hours of teaching to be taught throughout the semester in small groups of students. Please contact two Microsoft teams during the normal time for the class at the data and time agreed with the teacher. The objectives of the seminar are:</p> <p>a) Discuss with the student the theoretical duplicate decal about part of the subject explained at that time</p> <p>b) Resolution of exercises gives part of matter explained at that time</p>
Guest lecture / keynote speech	<p>Master Session</p> <p>1. Presentation in face-to-face classes of the theoretical and practical contents of the subject in order to guide the student in his preparation.</p> <p>2. The time dedicated to each of the chapters into which the subject is divided will be proportional to the degree of difficulty in the preparation of these and their length, so that the same time will not be dedicated to each of the chapters, but that will delve deeper into some than others. All this, in the opinion of the teacher who teaches the subject.</p> <p>3. For the preparation of the chapters with the least difficulty in understanding, the student could be referred to the bibliography, although in this case, in-person classes will be guided about: a) what specific sources are recommended to use b) what aspects are the most relevant and of greatest interest in order to achieve the learning outcomes established for the subject.</p>

Personalized attention

Methodologies	Description
Problem solving	1. In the master session, the student can intervene, after asking for the floor, to ask, clarify or present their point of view on the subject that is being discussed at the time of their intervention.
Seminar	2. In the solution of problems and in the seminars the student can intervene as it is exposed in the methodologies section.
Short answer questions	3. In the tutoring schedules set by each teacher, the student will be attended, upon request for an appointment and with the limits established by the regulations of teaching dedication of the UDC faculty to clarify those doubts that arise for the preparation of the subject .
Guest lecture / keynote speech	<p>4. Without mentioning the person who evacuated the query, it can be published in Moodle, along with their response, so that other students can take advantage of it. All this if the teacher considers it appropriate and of general interest.</p> <p>5. Students with recognition of part-time dedication and academic waiver of attendance exemption, will agree at the beginning of the course a specific schedule of tutoring compatible with their dedication. To do this, you must contact the teacher during the first ten days of the semester in which the subject is taught.</p>

Assessment			
Methodologies	Competencies	Description	Qualification
Mixed objective/subjective test	A5 A6 A8 A11 B3 B2	1. This is a single test for each of the evaluation opportunities of the call. 2. It represents 40% of the final evaluation. 3. It consists of an examination following the criteria set forth in methodologies.	40
Short answer questions	A5 A6 A8 B2 B3 B4 B5	1. Three tests throughout the course. 2. Each one of them represents 20% of the final evaluation, so that as a whole it represents 60% of this. 3. They consist of an examination following the criteria set forth in methodologies	60

Assessment comments

1. Qualification of not presented. Corresponds to the student, when he only participates in assessment activities that have a weight of less than or 20% over the final grade, independently gives a final grade.

2. Second opportunity. For a second opportunity of assessment and in order to guarantee the possibility that the student passes the subject, an additional continuous assessment test will be carried out before the final exam on all the subject taught.

The value of this will prove 4 points out of 10 in the final evaluation.

A final qualification of the second opportunity will be the sum of the grade obtained, not the final exam of the second opportunity (mixed test) and the higher one of the next two:

a) or obtained continuous assessment tests carried out in the first semester.

b) a obtained additional proof born.

3. A call for applications. In this case, there will be a mixed test aimed at assessing all skills and content. The result obtained in this test will coincide with the final grade obtained by the student.

4. Students with part-time dedication recognition and academic exemption from attendance. In evaluating these students, the same criteria must be applied to the student body.

5. Valuation conditions. The only tools that are allowed or access to the site are the basic ones to answer the exam: lapis, ballpoint pen or lapis, eraser and non-programmable electronic calculator. It is expressly forbidden or access to the exam room with: a) mobile phones and other devices capable of remote communication and / or storage of information; b) notes, annotations, books or similar material that is not expressly authorized in the exam session or on the web page of the subject (Moodle). Or non-compliance with this norm supposes that it is considered that a fraud has been carried out and that regardless of the person who has such devices or the material indicated in the testing room, they used you or not in the long term.

6. Student identification. Or the student must accredit their personalities according to the co-normative agreement.

7. Outras valuation observations. The tests that were not carried out will score zero. Carried out with fraud, they suppose a qualification of zero points to the final evaluation.

The scoring criteria of each test day will be announced at the moment of probability and will be administered by the declaration of probability.

We take test exams (true / false) and in multiple choice tests, badly answered questions will get a negative mark.
