| General description | The objective of this course is to introduce students to the basics of differential calculus of several variables and | | | | | |
| | mathematical programming, which | will be neces | sary for learning oth | er subjects of the gra | de and for their future career. The | |
| student will understand the basic concepts presented and the results that relate them, and will be able to pro- | | | | d will be able to properly and | | |
| | rigorously apply this knowledge to solving practical problems. An special emphasis will be made on the application of the | | | | | |
| | course contents to economic proble | ems, and on | the interpretation of | the results. | | |
| | Another aim is to help students develop generic skills such as analysis and synthesis, logical reasoning, problem solving, | | | | | |
| | critical thinking, independent learning, or retrieving and using information from various sources. | | | | | |

| | Study programme competences / results |
|------|--|
| Code | Study programme competences / results |
| A3 | Evaluate and foreseeing, from relevant data, the development of a company. |
| A4 | Elaborate advisory reports on specific situations of companies and markets |
| A6 | Identify the relevant sources of economic information and to interpret the content. |
| A8 | Derive, based on from basic information, relevant data unrecognizable by non-professionals. |
| A9 | Use frequently the information and communication technology (ICT) throughout their professional activity. |
| A10 | Read and communicate in a professional environment at a basic level in more than one language, particularly in English |
| A11 | To analyze the problems of the firm based on management technical tools and professional criteria |
| A12 | Communicate fluently in their environment and work by teams |
| B1 | CB1-The students must demonstrate knowledge and understanding in a field of study that part of the basis of general secondary |
| | education, although it is supported by advanced textbooks, and also includes some aspects that imply knowledge of the forefront of their |
| | field of study |
| B2 | CB2 - The students can apply their knowledge to their work or vocation in a professional way and have competences typically demostrated |
| | by means of the elaboration and defense of arguments and solving problems within their area of work |
| B3 | CB3- The students have the ability to gather and interpret relevant data (usually within their field of study) to issue evaluations that include |
| | reflection on relevant social, scientific or ethical |
| B4 | CB4-Communicate information, ideas, problems and solutions to an audience both skilled and unskilled |
| B5 | CB5-Develop skills needed to undertake further studies learning with a high degree of autonomy |
| B10 | CG5-Respect the fundamental and equal rights for men and women, promoting respect of human rights and the principles of equal |
| | opportunities, non-discrimination and universal accessibility for people with disabilities. |
| C1 | Express correctly, both orally and in writing, in the official languages of the autonomous region |
| C4 | To be trained for the exercise of citizenship open, educated, critical, committed, democratic, capable of analyzing reality and diagnose |
| | problems, formulate and implement knowledge-based solutions oriented to the common good |
| C5 | Understand the importance of entrepreneurial culture and know the means and resources available to entrepreneurs |

| C6 | Assess critically the knowledge, technology and information available to solve the problems and take valuable decisions |
|----|---|
| C7 | Assume as professionals and citizens the importance of learning throughout life. |
| C8 | Assess the importance of research, innovation and technological development in the economic and cultural progress of society. |

| Learning outcomes | | | | |
|--|-----------|---|----|--|
| Learning outcomes | | Study programme competences / | | |
| | | | | |
| | | Identify the notable sets of a subset of IRn. | A8 | |
| | A11 | | | |
| Understand the basic concepts of the euclidean space IRn. | A8 | | | |
| | | | | |
| Determine if a set is open, closed, bounded, compact and convex. | A8 | | | |
| | A11 | | | |
| Understand the concept of function of several variables. | A8 | | | |
| | A11 | | | |
| Draw the level set of a function of two variables. | A8 | | | |
| aw the level set of a function of two variables. | | | | |
| Understand the concept of continuous function. | A8 | | - | |
| inderstand the concept of continuous function. | | | | |
| Determine if a function is continuous or not. | A8 | | | |
| | A11 | | | |
| Recognize a linear function. | A8 | | | |
| | A11 | | | |
| Recognize a quadratic form. | A8 | | | |
| | A11 | | | |
| Classify a quadratic form by examining the signs of the principal minors. | A8 | | | |
| | A11 | | | |
| Classify a constrained quadratic form. | A8 | | | |
| | A11 | | | |
| Calculate and interpret partial derivatives and elasticities. | A4 | B1 | C1 | |
| | A8 | B2 | C7 | |
| | A11 | B5 | | |
| | | B10 | | |
| Find the Taylor polynomial of a function. | A8 | 510 | | |
| | A0 A11 | | | |
| Calculate the partial derivatives of a compounded function. | A11 A8 | | | |
| | A0 A11 | | | |
| Use the existence theorem to analyze if a equation defines an implicit real function. | | | | |
| | A8 A11 | | | |
| Find the partial derivatives and electricities of an implicit function, and interpret them | | | | |
| Find the partial derivatives and elasticities of an implicit function, and interpret them. | A8 | | | |
| Analyze the equality (converting of a function | A11 | | | |
| Analyze the concavity/convexity of a function. | A8 | | | |
| | A11 | | | |

| | 4.0 | D. | 04 |
|---|-----|----------|----------|
| Formulate mathematical programming problems. | A3 | B1 | C1 |
| | A4 | B2 | C4 |
| | A6 | B3 | C5 |
| | A8 | B4 | C6 |
| | A9 | B5 | C7 |
| | A10 | B10 | C8 |
| | A11 | | |
| Distinguish between local and global optima. | A8 | | |
| | A11 | | |
| Graphically solving an optimization problem | A8 | B3 | |
| | A11 | | |
| Analyze the existence of global optima using the Weierstrass theorem. | A8 | | |
| | A11 | | |
| Find the critical points of a function of several variables. | A8 | | |
| | A11 | | |
| Classify the critical points using the second-order conditions. | A8 | | |
| | A11 | | |
| Determine the local or global character of the optima of an unconstrained problem. | A8 | | |
| | A11 | | |
| Formulate economic problems as mathematical programs with equality constraints. | A8 | | |
| | A11 | | |
| Find the critical points of a mathematical program with equality constraints. | A8 | | |
| | A11 | | |
| Classify the critical points and interpret the Lagrange multipliers. | A8 | | |
| | A11 | | |
| Determine the local or global character of the optima of an equality-constrained problem. | A8 | | |
| | A11 | | |
| Know the structure and basic properties of a linear program. | A8 | | |
| | A11 | | |
| Formulate simple economic problems as linear programs. | A3 | B1 | C1 |
| · · · · · · · · · · · · · · · · · · · | A4 | B2 | C4 |
| | A8 | B3 | C6 |
| | A11 | B4 | C7 |
| | A12 | B5 | C8 |
| | | B10 | |
| Solve linear programs by the simplex algorithm. | A3 | B10 | C1 |
| | | B2 | C1 C4 |
| | A4 | B2 B3 | C4 C5 |
| | A6 | | |
| | A8 | B4 | C6 |
| | A9 | B5 | C7 |
| | A11 | B10 | C8 |

| Contents | | |
|-----------------------------|---|--|
| Торіс | Sub-topic | |
| 1. The euclidean space IRn. | The vector space IRn. | |
| | Inner product. Norm. Distance. | |
| | Interior, closure, isolated, limit and boundary points. | |
| | Open and closed sets. | |
| | Compact sets. | |

| 2. Functions of several variables. | Basic concepts. |
|---|---|
| | Graphical representation of real functions. Level sets. |
| | Limit of a function at a point. |
| | Continuity. |
| | Linear functions. |
| | Quadratic forms. Classification. Constrained quadratic forms. |
| 3. Derivatives of functions of several variables. | Partial derivatives. |
| | Partial derivatives of higher order. Class one function |
| | Chain's Rule. |
| | Taylor's theorem. |
| | Implicit function theorem. |
| 4. Convexity of sets and functions. | Convex sets. Properties. |
| | Convex functions. Properties. |
| | Characterization of twice continuously differentiable convex functions. |
| 5. Introduction to mathematical programming. | Formulation of a mathematical program. |
| | Local and global optima. |
| | Graphic solving. |
| | Basic Theorems in optimization. |
| 6. Unconstrained optimization. | First-order necessary conditions. |
| | Second-order conditions. |
| | The convex case. |
| | Sensitivity analysis. |
| 7. Equality-constrained optimization | Formulation. |
| | First-order necessary conditions: the Lagrange theorem. |
| | Second-order conditions. |
| | The convex case. |
| | Sensitivity analysis. |
| 8. Linear programming. | Formulation of linear programs. |
| | Basic feasible solutions. |
| | Fundamental theorems. |
| | The simplex algorithm. |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| | Methodologies |
|---------------|---------------|
| Methodologies | Description |

| Introductory activities | It will be the presentation of the course (one hour). |
|-------------------------|--|
| Multiple-choice | There will be two multiple-choice exams. These exams will have questions with several given answersonly one will be |
| questions | correct related to theoretical and practical concepts covered in the course. |
| Mixed | At the end of the course, there will be a mixed (theoretical/practical) exam. This exam will take place at the official date |
| objective/subjective | determined by the Faculty. |
| test | |
| Guest lecture / | There will be 15 hours of keynote speech, that will be focused on the exposition of the theoretical contents. |
| keynote speech | |
| Seminar | The group will be divided into two subgroups for the seminars. |
| Practical test: | There will two in-class practical exams. |
| Problem solving | There will be 25 hours of problem solving classes, which will be focused on the formulation and solving of problems related to |
| | the practical contents of the subject. |

| | Personalized attention | | |
|-----------------|---|--|--|
| Methodologies | Description | | |
| Problem solving | The student will be able to contact the teacher by the following means: | | |
| Seminar | - Moodle (using the forums or direct messages). | | |
| | - Email. | | |
| | - Personal tutoring in the office (at the official dates or at other dates upon request). | | |
| | - Seminars in small groups (group tutorials). | | |
| | | | |

| | | Assessment | |
|----------------------|----------------------------|---|---------------|
| Methodologies | Competencies / Description | | Qualification |
| | Results | | |
| Practical test: | A8 A11 B1 B2 B3 B4 | There will be two presential exams. Each of them will represent a 15% of the final | 30 |
| | B5 C1 | grade (1.5 points each). It will be valued a good understanding of the concepts, the | |
| | | use of appropriate reasoning, the proper use of mathematical language, and the skills | |
| | | in formulating and solving problems. | |
| Mixed | A10 B2 B3 B4 | The final (presential) exam will represent a 50% of the final mark (5 points). It will be | 50 |
| objective/subjective | | valued a good understanding of the concepts, the use of appropriate reasoning, the | |
| test | | proper use of mathematical language, and the skills in formulating and solving | |
| | | problems. | |
| Multiple-choice | A10 B2 B3 B4 | There will be two multiple-choice presential exams. Each of them will represent a 10% | 20 |
| questions | | of the final grade (1 point each). | |

Assessment comments

The first and second opportunities will be graded in the same way. Students with partial-time enrollment must fill the same requirements for assessment that students on full-time enrollment.Continuous assessment will consist of two in-class multiple-choice quizzes (10% each) and two in-class exams (15% each). Non-attendance to more than four class sessions (lecture, practice or seminar) will lead to not computing the continuous assessment qualification, which represents a 50% of the final mark. To qualify an absence as justified or not we will follow the provisions of Article 12, points 1 and 5, of the Normas de avaliación, revisión e reclamación das cualificacións dos estudos de grao e mestrado universitarios. In case of disrespectful behavior with peers or teacher, or using electronic devices (tablet, computer, telephone, ...) or other material unrelated to the class activities, you will be required to leave the classroom, and it will be counted as a non-justified absence. The qualification of NOT-TAKEN will also be awarded to the student who has only participated in assessment activities that have a weighting below 20% of the final grade, regardless of the qualification obtained. The final grade for students applying to the call of December will be the qualification of the final exam valued on 10 points.Conditions for carrying out exams: During the examination, you cannot have access to any device that allows communication with the outside and/or storage of information. Entry to the examination room with these devices may be denied. The student may use a scientific calculator non-graphic and non-programmable. Exams written in pencil will not be admitted.Virtual Platform: It will be used the Moodle virtual platform (http://moodle.udc.es).

| Recommendations |
|--|
| Subjects that it is recommended to have taken before |
| Aathematics I/611G02009 |
| Subjects that are recommended to be taken simultaneously |
| |
| Subjects that continue the syllabus |
| |
| Other comments |
| t is advisable to have passed Mathematics I. Students must be familiar with the concepts and fundamental results of linear algebra (matrices, |
| leterminants and systems of linear equations), and differential calculus in one variable (limit, continuity, derivative, elasticity, optima, convexity). |

(*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
